

Sun Life Assurance Company of Canada

INFORMATION FOR VOTING POLICYHOLDERS

Notice of our 2019 annual meeting
2018 Report to Voting Policyholders

Life's brighter under the sun

Welcome

As a voting policyholder of Sun Life Assurance, you have the right to vote at our annual meeting.

This booklet includes the notice of our 2019 annual meeting as well as our *2018 Report to Voting Policyholders*, which includes information about:

- the business of the meeting (page 7)
- how to vote (page 4)
- policyholder dividends (page 20)
- our financial performance in 2018 (page 24).

Your vote is important. You can attend the meeting and vote in person or you can complete the policyholder proxy form in this package and have someone vote on your behalf. Please take some time to review this report and contact us if you have any questions.

In this document:

- *we, us, our, the company* and *Sun Life Assurance* mean Sun Life Assurance Company of Canada
- *you, your and policyholder* mean voting policyholders of Sun Life Assurance
- *Sun Life Financial* means our sole shareholder, Sun Life Financial Inc., which is a publicly traded company on the Toronto (TSX), New York (NYSE) and Philippine (PSE) stock exchanges under the ticker symbol SLF
- all dollar amounts are in Canadian dollars unless stated otherwise.

Sun Life Assurance Company of Canada

Dear voting policyholder:

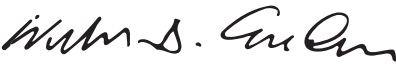

You are invited to attend the annual meeting of voting policyholders and the sole shareholder on Thursday, May 9, 2019 at 9:00 a.m. (Toronto time). The meeting will be held at Sun Life Financial's head office at 1 York Street (at Harbour Street), 35th floor, Toronto, Ontario, Canada and will also be webcast at www.sunlife.com.

This document includes the notice of our 2019 annual meeting and our 2018 Report to Voting Policyholders, which includes important information about the meeting, how to vote, policyholder dividends and our financial performance in 2018.

We will be conducting the annual meeting of the common shareholders of Sun Life Financial Inc. at the same time. The formal business of each meeting will be conducted separately, however, management's presentation will address policyholders and shareholders. A joint question and answer period will then follow.

Your vote is important. If you cannot attend the meeting, please vote by submitting your proxy by mail, internet or telephone by 5:00 p.m. (Toronto time) on Thursday, May 2, 2019, as described on pages 4 to 6.

We look forward to seeing you at the meeting.

William D. Anderson
Chairman of the Board

Dean A. Connor
President & Chief Executive Officer

Si vous désirez recevoir l'avis de convocation à l'assemblée annuelle de 2019 et le rapport 2018 à l'intention des titulaires de contrat ayant droit de vote en français, veuillez communiquer avec le secrétaire en écrivant au 1 York Street, 31st Floor, Toronto (Ontario) Canada M5J 0B6, en composant le 1-877-786-5433, ou en envoyant un courriel à servicesauxactionnaires@sunlife.com.

Notice of our 2019 Annual Meeting

You are invited to our annual meeting of voting policyholders and the sole shareholder of Sun Life Assurance Company of Canada:

When Thursday, May 9, 2019 at 9:00 a.m. (Toronto time)

Where 1 York Street (at Harbour Street)
35th floor
Toronto, Ontario, Canada

What the meeting will cover

1. Receipt of the 2018 consolidated financial statements
2. Election of the directors
3. Appointment of the auditor
4. Consideration of any other business that may properly be brought before the meeting.

As of March 15, 2019 (the record date), a total of **1,084,091** votes are eligible to be cast by voting policyholders and **427,179,546** votes are eligible to be cast by the sole shareholder at the meeting.

The annual meeting of common shareholders of Sun Life Financial Inc. will also be held at the same time and place.

If you cannot attend the meeting, please complete the enclosed proxy form to cast your vote and mail it in the envelope provided.

The board of directors has approved the contents of this report and has authorized us to send it to you.

Troy Krushel

Vice-President, Associate General Counsel & Corporate Secretary

Toronto, Ontario

Voting

Who can vote

Only voting policyholders and our sole shareholder can vote at our annual meeting.

You are a voting policyholder if on March 15, 2019 (the record date) you owned one of the following:

- a participating policy issued by Sun Life Assurance or The Mutual Life Assurance Company of Canada (Mutual Life). Mutual Life changed its name to Clarica Life Insurance Company on July 21, 1999.
- a non-participating product with voting rights issued by Mutual Life before April 1, 1995.

The table below shows the breakdown of voting policyholders as of March 15, 2019:

Country	Voting Policyholders	
	#	%
Canada	928,439	85.6
United States	47,318	4.4
Other	108,334	10.0
Total	1,084,091	100.0

Voting policyholders are entitled to cast one vote on each item of business, regardless of the number of policies owned, except for the election of the shareholder's directors. Sun Life Financial, our sole shareholder, is entitled to cast one vote on each item of business for each common share it holds, except for the election of the policyholders' directors.

See *Electing the directors* on page 6 for more information.

How to vote

You have two ways to vote:

- by proxy
- by attending the meeting and voting in person.

Voting by proxy

Voting by proxy is the easiest way to vote because you are giving someone else the authority to attend the meeting and vote for you (called your proxyholder). If you specify on your proxy form how you want to vote on a particular matter, then your proxyholder must vote according to your instructions.

The enclosed proxy form names William D. Anderson, Chairman of the Board, or in his absence Scott F. Powers, Chair of the Governance, Nomination & Investment Committee (GNIC), or in his absence another director appointed by the board, as your proxyholder to vote at the meeting according to your instructions.

If you appoint them as proxyholders but do not specify on the proxy form how you want to vote, your vote will be cast:

- **FOR** electing each of the director nominees who are listed on the proxy form (called policyholders' directors)
- **FOR** appointing Deloitte LLP (Deloitte) as auditor.

You can appoint another person to vote for you by printing his or her name in the space provided on the proxy form. This person does not need to be a voting policyholder, but your vote can only be counted if he or she attends the meeting and votes for you. Regardless of who you appoint as your proxyholder, if you do not specify how you want to vote, your proxyholder can vote as he or she sees fit. Your proxyholder can also vote as he or she decides on any other items of business that properly come before the meeting, and on any amendments to the items listed above.

If you do not want to attend the meeting and vote in person, indicate your voting instructions on the enclosed proxy form, then sign, date and return it using one of the methods below:

- Mail it in the envelope provided
- Scan and email the signed page to proxyvote@astfinancial.com.

Alternatively, you may submit your voting instructions by telephone or on the Internet. You will need the 13-digit control number in the top right-hand corner of the proxy form to complete your voting instructions using one of these methods. The control number is to verify your identity.

Voting by phone (Canada & U.S. only) Call 1-888-489-7352 from a touchtone telephone and follow the instructions.

Voting on the Internet Go to www.astvotemyproxy.com and follow the instructions on screen.

Our agent, AST Trust Company (Canada) ("AST"), must receive your completed and signed proxy form by 5:00 p.m. (Toronto time) on Thursday, May 2, 2019 to have your vote recorded.

If the meeting is adjourned, AST must receive your completed proxy form by 5:00 p.m. (Toronto time) on the date that is two business days before the meeting is reconvened.

Voting in person

Attending the meeting in person gives you an opportunity to hear directly from management and meet the individuals who have been nominated to serve on our board.

If you want to attend the meeting and vote in person, do not complete or return the proxy form. When you arrive at the meeting, register with a representative of AST to receive a ballot.

If you change your mind

You can revoke instructions you have already provided on your proxy form by giving us new instructions in one of four ways:

- complete and sign a proxy form with a later date than the one you previously sent, and deliver or deposit it to AST as described above before 5:00 p.m. (Toronto time) on Thursday, May 2, 2019
- submit new voting instructions to AST by telephone or the Internet before 5:00 p.m. (Toronto time) on Thursday, May 2, 2019
- deliver or deposit a notice in writing with your new instructions signed by you, or your attorney as authorized by you in writing, to Sun Life Assurance at the address below before 5:00 p.m. (Toronto time) on Wednesday, May 8, 2019, or if the meeting is adjourned, before 5:00 p.m. (Toronto time) on the business day before the meeting is reconvened
- give your written instructions signed by you, or your attorney as authorized by you in writing, to the Chairman of the meeting before the start of the meeting or before the meeting is reconvened.

Processing the votes

A simple majority of votes cast, in person or by proxy, is required for the approval of each of the matters being voted on at the meeting.

AST counts and tabulates the proxies on our behalf. Proxy forms are only shown to management if it is clear that the policyholder wants to communicate directly with them, or when the law requires it.

We will file the voting results on SEDAR (www.sedar.com) and publish them on our website (www.sunlife.com) shortly after the meeting.

Questions?

You can contact the Corporate Secretary if you have any questions related to voting:

The Corporate Secretary, Sun Life Assurance
 1 York Street, Toronto, Ontario, Canada M5J 0B6
 E-mail: boarddirectors@sunlife.com

Our 2019 annual meeting

Business of the meeting

Financial statements (see page 24)

You will receive the consolidated financial statements for the year ended December 31, 2018, the auditors' reports thereon and the actuary's report on the policy liabilities reported in the financial statements, and have the opportunity to ask questions. These are all included in this document.

Electing the directors (see page 8)

A total of 11 directors will be elected to serve on our board until the next annual meeting. All of the director nominees currently serve on our board. All 11 individuals are also nominated to serve as directors of Sun Life Financial, the sole shareholder of Sun Life Assurance.

Voting policyholders are legally entitled to elect at least one-third of our board as policyholders' directors. That means you can elect at least four of the directors who will serve on our board. Sun Life Financial elects the remaining members of the board as the shareholder's directors.

Under the *Insurance Companies Act (Canada)*, we must designate each member of the board as either a policyholders' director or a shareholder's director. All directors, regardless of who they were elected by, have a duty to act in the best interests of Sun Life Assurance, taking into account the interests of the policyholders and the shareholder.

The table below lists the directors who are currently designated as policyholders' directors, and the 11 individuals nominated to serve on our board for 2019. Their terms will expire at the close of the 2020 annual meeting.

Current Policyholders' Directors	Policyholders' Director Nominees for 2019	Shareholder's Director Nominees for 2019
William D. Anderson	William D. Anderson	Dean A. Connor
Stephanie L. Coyles	Stephanie L. Coyles	Ashok K. Gupta
Martin J.G. Glynn	Martin J.G. Glynn	Sara Grootwassink Lewis
M. Marianne Harris	M. Marianne Harris	James M. Peck
Scott F. Powers	Scott F. Powers	Hugh D. Segal
		Barbara G. Stymiest

Appointing the auditor (see page 16)

You will vote on the appointment of Deloitte as our auditor for 2019. Deloitte has been the auditor of Sun Life Assurance since 1875.

The director nominees

As of the date of this report, we have 12 directors on our board. Under our by-laws, the board can have eight to 20 directors. At its meeting held on February 13, 2019, the board fixed the number of directors at 11, effective with the retirement of Christopher J. McCormick at the conclusion of the 2019 annual meeting. At the 2019 annual meeting, 11 directors are to be elected for a term ending at the conclusion of the next annual meeting. All of the 11 nominees currently serve on our board.

The GNIC has reviewed each of the nominees and confirmed that they have the competencies, skills and qualities necessary for the board to fulfil its mandate.

We do not expect that any of the nominees will not be able to serve as a director. If for any reason a nominee is unable to serve, the persons named in the proxy form have the right to vote at their discretion for another nominee proposed according to the company's by-laws and applicable law.

The board recommends that policyholders vote **for** electing each of the individuals nominated as policyholders' directors profiled below. **If you do not specify in the proxy form how you want to vote on the election of directors, the persons named in the form will vote for electing each of William D. Anderson, Stephanie L. Coyles, Martin J. G. Glynn, M. Marianne Harris and Scott F. Powers, who have been nominated as policyholders' directors.** See *Electing the directors* on page 7 for more information about your voting rights.

Sun Life Financial, as the sole shareholder of Sun Life Assurance, intends to vote for electing the other individuals profiled below who have been nominated as shareholder's directors.

Our policy on majority voting

The election of directors at the meeting is expected to be an uncontested election, meaning that the number of nominees will be equal to the number of directors to be elected. If a director receives more "withheld" than "for" votes in an uncontested election, he or she must tender a written offer to resign to the board. The board will accept the resignation within 90 days unless there are exceptional circumstances and will disclose the reasons for its decision in a news release. The director will not participate in these deliberations.

Director nominee profiles

The following profiles provide information about each of the director nominees, including when they joined our board, their business experience, their current committee memberships and their attendance at board and committee meetings in 2018, and other public company directorships held in the last five years. Our 11 director nominees have an average board tenure of 4.91 years and four of them (36%) are women.

William D. Anderson,
FCPA, FCA
 Toronto, ON, Canada

Director since May 2010

Independent

Age: 69

Mr. Anderson is the Chairman of the Boards of Sun Life Financial and Sun Life Assurance. He was President of BCE Ventures, the strategic investment unit of the global telecommunications company BCE Inc., until he retired in December 2005. Mr. Anderson held senior positions including Chief Financial Officer of BCE Inc. and Bell Canada during his 14 years with that company. He spent 17 years with the public accounting firm KPMG, where he was a partner for nine years. Mr. Anderson was appointed a Fellow of the Institute of Chartered Professional Accountants of Ontario in October 2011 and is also a Fellow of the Institute of Corporate Directors.

Toronto, ON, Canada

Director since May 2012

Independent

Age: 62

Ms. Stymiest, a corporate director, was Chair of BlackBerry Limited, a company that provides technology that allows endpoints to trust one another, communicate securely, and maintain privacy, from January 2012 to November 2013. She was a member of the Group Executive at Royal Bank of Canada, an international banking and financial services organization, from 2004 to June 2011. Ms. Stymiest was Royal Bank's Group Head, Strategy, Treasury and Corporate Services from 2010 to June 2011 and Chief Operating Officer from 2004 to 2009. Prior to that she held senior positions in the financial services sector including Chief Executive Officer, TSX Group Inc., Executive Vice-President and Chief Financial Officer, BMO Nesbitt Burns, and Partner, Financial Services Group, Ernst & Young LLP.

Ms. Stymiest is a Fellow of the Institute of Chartered Professional Accountants of Ontario and received an Award of Outstanding Merit from that organization in 2011. In addition to the public company boards listed below, she is the Chair of the Canadian Institute for Advanced Research and the Vice-Chair of the University Health Network in Toronto. She holds an Honours Business Administration degree. In November 2018 Ms. Stymiest was named to the 2018 National Association of Corporate Directors (NACD) Directorship 100.

	Total	8 of 8	100%

To the knowledge of the company, other than as set out below, no proposed director is, as at the date of this booklet, or has been, in the last ten years (a) a director, chief executive officer or chief financial officer of any company (including Sun Life Financial) that was subject to a cease trade or similar order or an order that denied the relevant company access to any exemption under securities legislation, that was in effect for a period of more than 30 consecutive days that: (i) was issued while the proposed director was acting in the capacity as director, chief executive officer or chief financial officer; or (ii) was issued after the proposed director ceased to be a director, chief executive officer or chief financial officer and which resulted from an event that occurred while that person was acting in the capacity as director, chief executive officer or chief financial officer; or (b) a director or executive officer of any company (including Sun Life Financial) that, while that person was acting in that capacity, or within a year of that person ceasing to act in that capacity, became bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency or was subject to or instituted any proceedings, arrangement or compromise with creditors or had a receiver, receiver manager or trustee appointed to hold its assets.

Further, to the knowledge of the company, other than as set forth below, no proposed director has been (a) bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency, or become subject to or instituted any proceedings, arrangement or compromise with creditors, or had a receiver, receiver manager or trustee appointed to hold the assets of the proposed director; or (b) subject to (i) any penalties or sanctions imposed by a court relating to securities legislation or by a securities regulatory authority or has entered into a settlement agreement with a securities regulatory authority; or (ii) any other penalties or sanctions imposed by a court or regulatory body that would likely be considered important to a reasonable security holder in deciding whether to vote for a proposed director:

- Ms. Coyles was a director of Postmedia Network Canada Corp. while it completed a restructuring following an arrangement plan under the *Canada Business Corporations Act* in 2016. Ms. Coyles is no longer a director of Postmedia Network Canada Corp.
- Mr. Glynn was a director of MF Global Holdings Ltd. when it filed a voluntary petition under Chapter 11 of the Bankruptcy Code in the United States in October 2011. Mr. Glynn is no longer a director of MF Global Holdings Ltd.
- Mr. Peck was a director and President & Chief Executive Officer of TransUnion when it agreed to settle a Civil Investigative Demand by the U.S. Consumer Financial Protection Bureau (CFPB) in December 2016 focused on common industry practices relating to the advertising, marketing and sale of consumer reports, credit scores or credit monitoring products to consumers by TransUnion's Consumer Interactive segment. TransUnion executed a Stipulation and Consent to the Issuance of a Consent Order which was issued by the CFPB in January 2017, which required them to implement certain practice changes in the way they advertise, market and sell products and services to consumers, develop a comprehensive compliance plan, and pay approximately US\$13.9 million for redress to eligible customers and a civil money penalty to the CFPB in the amount of US\$3.0 million.

The auditor

The board, on the recommendation of the Audit Committee, recommends that policyholders vote **for** the appointment of Deloitte as auditor of Sun Life Assurance for 2019. Deloitte has been our auditor since 1875. **If you do not specify in the proxy form how you want to vote, the persons named in the form will vote for the appointment of Deloitte as auditor.**

Auditor's fees

The following table shows the fees relating to services provided by Deloitte for the past two years:

Year ended December 31	(\$millions)	
	2018	2017 ¹
Audit fees	13.3	13.3
Audit-related fees	0.3	0.2
Tax fees	0.2	0.1
All other fees	0.1	0.1
Total	13.9	13.7

¹ There was an adjustment of \$(0.1) to 2017 fees.

Audit fees relate to professional services rendered by the auditors for the audit of our annual consolidated financial statements, the statements for our segregated funds and services related to statutory and regulatory filings.

Audit-related fees include assurance services not directly related to performing the audit of the annual consolidated financial statements of the company. These include internal control reviews, specified procedure audits and employee benefit plan audits.

Tax fees relate to tax compliance, tax advice and tax planning.

All other fees relate to products and services other than audit, audit-related and tax as described above.

We have a policy that requires the Audit Committee to pre-approve any services to be provided by the external auditor. The committee has, subject to certain fee thresholds and reporting requirements, pre-approved certain audit, audit-related and other permissible non-audit services that are consistent with maintaining the independence of the external auditor. You can find more information about this policy in Sun Life Financial's 2018 annual information form which is filed with the Canadian Securities Regulators (www.sedar.com) and on EDGAR (www.sec.gov/edgar.shtml).

Policyholder proposals

We did not receive any policyholder proposals for consideration at the meeting.

Policyholder proposals for our 2020 annual meeting must be sent to us in writing. We must receive them by 5:00 p.m. (Toronto time) on December 16, 2019 to consider including them in our Report to Voting Policyholders for the 2020 meeting.

Send the proposal to the Corporate Secretary at Sun Life Assurance:

Fax: 416-585-9907

E-mail: boarddirectors@sunlife.com

Mail: 1 York Street, 31st Floor, Toronto, Ontario, Canada M5J 0B6

Director compensation

We have designed our director compensation program to be fair and competitive and allow the board to attract well qualified directors.

Directors receive an annual retainer, committee retainers and travel fees for serving on the boards of Sun Life Assurance and Sun Life Financial. The cost is shared equally between the two companies. Directors are also reimbursed for travel and other expenses they incur to attend our board and committee meetings. Committee chairs receive an additional retainer because of their increased responsibilities.

Directors receive a portion of their annual board retainer in deferred share units (DSUs) (see page 18). A DSU is equal in value to a common share of Sun Life Financial but cannot be redeemed until a director leaves the board. Directors can choose to receive the balance of their compensation in any combination of cash, additional DSUs and common shares of Sun Life Financial acquired on the open market.

The Chairman of the Board receives a separate annual retainer that includes a portion in DSUs (see page 18). He is also reimbursed for travel and other expenses he incurs while carrying out his duties as Chairman. He does not receive travel fees.

Mr. Connor does not receive any director compensation because he is our President and Chief Executive Officer.

Directors' compensation for 2018

The table below shows the directors' compensation structure for 2018¹:

Chairman of the Board's retainer	\$	405,000 ²
Directors' retainers	\$	210,000 ³
Committee chairs' retainers	\$	40,000
Committee members' retainers	\$	10,000

¹ Travel fees are (i) \$1,500 when travel time for a round trip was two to six hours and (ii) \$3,000 when travel time for a round trip was six hours or more.

² \$105,000 of which must be received in DSUs with the balance to be received in cash, DSUs and/or shares.

³ 50% of which was received in DSUs and 50% of which was received in cash, DSUs and/or shares.

Changes to directors' compensation for 2019

In 2019, the GNIC retained Meridian Compensation Partners (Meridian), an independent compensation consultant, to provide a competitive review of our director compensation program. Meridian used data from our peer group and data from a 2018 Meridian survey of the TSX60. Based on Meridian's analysis the GNIC recommended, and the board approved, the compensation structure set out below effective January 1, 2019:

Chairman of the Board's retainer	\$	440,000 ¹
Directors' retainers	\$	225,000 ²
Committee chairs' retainers	\$	45,000
Committee members' retainers	\$	10,000

¹ \$140,000 of which must be received in DSUs with the balance to be received in cash, DSUs and/or shares.

² \$120,000 of which must be received in DSUs with the balance to be received in cash, DSUs and/or shares.

The revised 2019 structure resulted in the following changes:

- Cash retainer: *unchanged*
- DSU retainer: increased from \$105,000 to \$120,000
- Committee chairs' retainers: increased by \$5,000
- Committee members' retainers: *unchanged*
- Chairman retainer: increased by \$35,000 (in DSUs)
- Travel fees: *unchanged*.

The GNIC reviews director compensation every two years. Given the timing of this review, the board approved these changes in order to keep Sun Life's director compensation structure approximately aligned with competitive market pay levels and practices, over the next two years.

Share compensation plan

The board adopted a directors' share compensation plan on December 6, 2000. In 2018, directors received at least 50% of their annual director retainer in DSUs and the Chairman of the Board was required to receive at least \$105,000 of his retainer in DSUs. Starting January 1, 2019, the directors will receive at least \$120,000 of their retainers in DSUs (approximately 53% of their annual director retainer) and the Chairman of the Board will be required to receive at least \$140,000 of his retainer in DSUs. They can choose to receive the balance of their compensation in any combination of cash, additional DSUs and common shares of Sun Life Financial acquired on the open market. Directors cannot convert DSUs to common shares or cash until they leave the board. To date, directors have converted all DSU awards under this plan to cash when they retired from the board.

Compensation details

Director compensation table

We paid a total of \$2,686,131 to the directors of Sun Life Assurance and Sun Life Financial for their services in 2018, compared to \$2,776,931 in 2017.

Name	Fees earned (\$)	Share-based awards (\$)	Travel fees (\$)	Option-based awards ¹ (\$)	Non-equity incentive plan compensation (\$)	Pension value (\$)	All other compensation ² (\$)	Total (\$)
William D. Anderson	201,000	204,000	-	-	-	-	-	405,000
Stephanie L. Coyles	-	230,000	3,000	-	-	-	-	233,000
Martin J. G. Glynn	125,000	105,000	15,000	-	-	-	-	245,000
Ashok K. Gupta	67,788	80,701	9,000	-	-	-	-	157,489
M. Marianne Harris	-	260,000	3,000	-	-	-	-	263,000
Sara Grootwassink Lewis	-	260,000	18,000	-	-	-	-	278,000
Christopher J. McCormick	-	230,000	15,000	-	-	-	-	245,000
Scott F. Powers	38,750	221,250	12,000	-	-	-	-	272,000
Réal Raymond ²	41,071	41,071	3,000	-	-	-	5,000	90,142
Hugh D. Segal	125,000	105,000	4,500	-	-	-	-	234,500
Barbara G. Stymiest	31,000	229,000	3,000	-	-	-	-	263,000
TOTAL								2,686,131

¹ Independent directors do not participate in the company's stock option plan.

² The amount for Mr. Raymond was a charitable donation made on his behalf when he retired from the board.

Policyholder dividends and participating account management

Participating policies are eligible to receive policyholder dividends because they share, or 'participate in', a portion of the earnings associated with life insurance, which fluctuate over time due to factors such as changing investment returns, expenses, taxes and inflation. Non-participating policies do not qualify for policyholder dividends. Your eligibility to receive policyholder dividends is described in your policy.

Policyholder dividends vs. shareholder dividends

Policyholder dividends are not the same as shareholder dividends.

Shareholder dividends depend on a company's overall performance, including earnings from its different businesses.

Policyholder dividends depend on the earnings of a group of policies in a company's *participating account*. Policyholder dividends are not guaranteed and vary in relation to the assumptions about various factors, including, among other things:

- investment return
- invested assets that might default
- expenses (including taxes)
- inflation
- mortality rates, and
- the number of policyholders who may terminate their policies.

While all of these factors can change over time, investment returns have the biggest impact on policyholder dividends. None of the factors, however, affect any of the guaranteed amounts in your policy, such as guaranteed death benefits and guaranteed cash surrender values.

We sometimes use techniques such as reinsurance to help reduce the risks associated with these factors worsening. Reinsurance transfers the risk to another insurance company, but we are still responsible for paying the benefits under your policy.

Sun Life Assurance and Clarica Life Insurance Company (Clarica) were both mutual companies at one time, owned by their participating policyholders. Each company changed from a mutual company to a publicly traded stock company in a process called *demutualization*.

At that time, eligible policyholders received shares or cash as compensation for their ownership position, and they approved conversion plans outlining their ongoing rights as participating policyholders.

Clarica was acquired by Sun Life Financial on May 29, 2002.

Questions?

For more information, see *Answers about participating (par) life insurance*. Although the pamphlet has been written for our Canadian policyholders, it generally applies to all participating policyholders.

You can download a copy from our Canadian website (www.sunlife.ca) – go to *Insurance*, select *Life insurance*, then *Participating life insurance*. The link to the pamphlet is at the right hand side of the screen under "*Related Resources*".

You can also request a copy from the Corporate Secretary. Please refer to the contact information on page 6.

Our policyholder dividend and participating account management policies

These two policies apply to all participating policies that we (or our predecessors) issued or assumed. These were primarily issued or assumed in Canada, Bermuda, the United States, and the Philippines.

The policies describe how we manage our participating business funds, which are referred to as accounts, and how we determine policyholder dividends.

Our policyholder dividend and participating account management policies are provided in Appendix A of this report and are also publicly available at no charge at the link described on the previous page. You can also request a copy from the Corporate Secretary. Please refer to the contact information on page 6.

Safeguards for our policyholder dividend and participating account management processes

We have many safeguards in place to make sure our policies continue to be fair and that participating business is managed in accordance with all legal requirements, professional standards and our internal policies.

The board has appointed an actuary to carry out certain responsibilities relating to participating policyholders that are required under the *Insurance Companies Act* (Canada) (ICA). The Appointed Actuary is a member of management and follows professional standards of practice set by the Canadian Institute of Actuaries.

Every year, the Appointed Actuary:

- analyses our financial condition and prepares a report for the board that includes reviewing our capital and surplus requirements (including the local capital requirements in each jurisdiction where we operate) and testing our capital adequacy under possible economic and business conditions
- provides opinions as to the fairness of the dividend policy and par account management policies, as to the fairness of policyholder dividends and whether they comply with the dividend policy, and whether the allocations of investment returns and expenses to the participating account are fair and equitable to participating policyholders
- reviews the status of the participating account and prepares a detailed report for the regulator
- signs an opinion as to whether the participating policies are being managed in accordance with the agreements made at the time of demutualization.

2019 dividend scales

The board reviewed the 2019 dividend scales for all accounts at their meetings on August 8, 2018 and November 7, 2018, and made the following decisions:

Country	Changes
Canada (Clarica)	<ul style="list-style-type: none"> no change
Canada (Sun Life)	<ul style="list-style-type: none"> no change to annual dividend scales no change to terminal dividend scales
United States	<ul style="list-style-type: none"> no change to annual dividend scales no change to terminal dividend scales
Philippines	<ul style="list-style-type: none"> Peso denominated dividend scales generally decreased no change to USD denominated dividend scales

Information about the financial position of our participating accounts

We maintain separate participating accounts for each territory. In Canada, accounts are separated between former Clarica business and policies issued by Sun Life Assurance.

When we demutualized, we grouped together the participating policies that had been issued before demutualization and put them into their own separate sub-accounts known as Closed Blocks. Canada (Sun Life) (including Bermuda), Canada (Clarica), the U.S. and the Philippines each have a Closed Block.

Policies issued after demutualization are in a separate sub-account called an Open Block. Canada (Sun Life) (including Bermuda), Canada (Clarica) and the U.S. each have an Open Block.

Pending final Office of the Superintendent of Financial Institutions (OSFI) approval, we plan to merge the small U.S. Open Block into the U.S. Closed Block on June 30, 2019 to simplify the management and reporting of our U.S. participating business. The merger will have no impact on the security of policy benefits or on policyholder dividends. Going forward, policies transferred from the U.S. Open Block to the U.S. Closed Block will have the same rights and guarantees as other U.S. Closed Block policyholders, including the guarantees on expense factors that can be charged to policyholder dividends. As part of the OSFI approval process, we obtained the opinion of an independent actuary that the merger will not negatively impact policyholders in either block.

The following tables show the change in surplus for the Closed and Open Blocks for 2018 and 2017.

Closed and Open sub-accounts 2018 (in millions of Canadian dollars)	Canada (Sun Life)		Canada (Clarica)		U.S.		Philippines
	Closed	Open	Closed	Open	Closed	Open	Closed
Opening surplus	0	472	0	59	0	77	0
Currency	-	-	-	-	-	1	-
Net earnings before policyholder dividends	198	575	325	23	77	4	32
Policyholder dividends paid	(198)	(188)	(325)	(10)	(77)	(3)	(32)
Transfers to shareholders ¹	-	(5)	-	0	-	0	-
Other transfers ²	-	(101)	-	(24)	-	(74)	-
Closing surplus	0	753	0	48	0	5	0
Total assets	8,383	2,168	10,418	428	5,560	143	855
Total liabilities	8,383	1,415	10,418	380	5,560	138	855

Closed and Open sub-accounts 2017 (in millions of Canadian dollars)	Canada (Sun Life)		Canada (Clarica)		U.S.		Philippines
	Closed	Open	Closed	Open	Closed	Open	Closed
Opening surplus	0	265	0	53	0	77	0
Currency	-	-	-	-	-	(4)	-
Net earnings before policyholder dividends	192	367	320	15	82	7	37
Policyholder dividends paid	(192)	(156)	(320)	(9)	(82)	(3)	(37)
Transfers to shareholders ¹	-	(4)	-	0	-	0	-
Other transfers	-	-	-	-	-	-	-
Closing surplus	0	472	0	59	0	77	0
Total assets	8,293	1,523	10,383	440	5,267	202	941
Total liabilities	8,293	1,051	10,383	381	5,267	125	941

¹ Transfers from Open Blocks to shareholders are at the maximum permitted by regulation. For 2018 and 2017, the maximum allowed percentage of the dividends paid to Open Block policyholders in the year is 2.7%. The amounts round to zero in millions of Canadian dollars for Canada (Clarica) and the U.S.

² In 2018, transfers from Open Blocks to shareholders also include transfers of Participating Account Seed Capital. In the first quarter of 2018, with OSFI's approval, seed capital, together with interest earned since demutualization, was transferred from the participating account to the shareholder account. At the time of demutualization, OSFI required shareholders to transfer seed capital into the participating account to support participating insurance policies sold after demutualization. It was anticipated that over time the seed capital would no longer be needed and that the seed capital and accumulated interest would be returned to the shareholders, subject to OSFI's approval. The transfer has no impact on regulatory capital requirements, and will have no adverse impact on the policy dividends or security of benefits of participating policyholders.

Financial Reporting Responsibilities

Management is responsible for preparing the Consolidated Financial Statements. This responsibility includes selecting appropriate accounting policies and making estimates and other judgments consistent with International Financial Reporting Standards. The financial information presented elsewhere in the policyholder booklet and Ontario Securities Commission filings is consistent with these Consolidated Financial Statements.

The Board of Directors (“Board”) oversees management’s responsibilities for financial reporting. An Audit Committee of non-management directors is appointed by the Board to review the Consolidated Financial Statements and report to the Board prior to their approval of the Consolidated Financial Statements for issuance to policyholders.

Management is also responsible for maintaining systems of internal control that provide reasonable assurance that financial information is reliable, that all financial transactions are properly authorized, that assets are safeguarded, and that Sun Life Assurance Company of Canada and its subsidiaries, collectively referred to as “the Company”, adhere to legislative and regulatory requirements. These systems include the communication of policies and the Company’s Code of Business Conduct throughout the organization. Internal controls are reviewed and evaluated by the Company’s internal auditors.

The Audit Committee also conducts such review and inquiry of management and the internal and external auditors as it deems necessary towards establishing that the Company is employing appropriate systems of internal control, is adhering to legislative and regulatory requirements and is applying the Company’s Code of Business Conduct. Both the internal and external auditors and the Company’s Appointed Actuary have full and unrestricted access to the Audit Committee, with and without the presence of management.

The Office of the Superintendent of Financial Institutions, Canada conducts periodic examinations of the Company. These examinations are designed to evaluate compliance with provisions of the *Insurance Companies Act* (Canada) and to ensure that the interests of policyholders, depositors and the public are safeguarded. The foreign operations of Sun Life Assurance Company of Canada and foreign subsidiaries are examined by regulators in their local jurisdictions.

The Company’s Appointed Actuary, who is a member of management, is appointed by the Board to discharge the various actuarial responsibilities required under the *Insurance Companies Act* (Canada), and conducts the valuation of the Company’s actuarial liabilities. The role of the Appointed Actuary is described in more detail in Note 10. The report of the Appointed Actuary accompanies these Consolidated Financial Statements.

The Company’s external auditor, Deloitte LLP, Independent Auditor, has audited the Consolidated Financial Statements for the years ended December 31, 2018 and December 31, 2017 and meets separately with both management and the Audit Committee to discuss the results of its audit. The auditors’ report to the policyholders and shareholder accompanies these Consolidated Financial Statements.

Appointed Actuary's Report

THE POLICYHOLDERS, SHAREHOLDER AND DIRECTORS OF
SUN LIFE ASSURANCE COMPANY OF CANADA

I have valued the policy liabilities and reinsurance recoverables of Sun Life Assurance Company of Canada and its subsidiaries for its Consolidated Statements of Financial Position at December 31, 2018 and December 31, 2017 and their change in the Consolidated Statements of Operations for the year ended December 31, 2018 in accordance with accepted actuarial practice in Canada, including selection of appropriate assumptions and methods.

In my opinion, the amount of policy liabilities net of reinsurance recoverables makes appropriate provision for all policy obligations and the Consolidated Financial Statements fairly present the results of the valuation.

Kevin Morrissey
Fellow, Canadian Institute of Actuaries

Toronto, Ontario, Canada
February 13, 2019

Independent Auditor's Report

To the Policyholders and Shareholder of Sun Life Assurance Company of Canada

Opinion

We have audited the consolidated financial statements of Sun Life Assurance Company of Canada and its subsidiaries (the "Company"), which comprise the consolidated statements of financial position as at December 31, 2018 and 2017, and the consolidated statements of operations, comprehensive income (loss), changes in equity and cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2018 and 2017, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards ("IFRS").

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

Management is responsible for the other information. The other information comprises of the Information for Voting Policyholders.

Our opinion on the financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon. In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

The Information for Voting Policyholders is expected to be made available to us after the date of the auditor's report. If, based on the work we will perform on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact to those charged with governance.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The engagement partner on the audit resulting in this independent auditor's report is William A. Cunningham.

Notes to the Consolidated Financial Statements

(Amounts in millions of Canadian dollars except for per share amounts and where otherwise stated. All amounts stated in U.S. dollars are in millions.)

1. Significant Accounting Policies

Description of Business

Sun Life Assurance Company of Canada ("Sun Life Assurance") and its subsidiaries are collectively referred to as "us", "our", "ours", "we", "the Enterprise" or "the Company". Sun Life Assurance is a wholly owned subsidiary of Sun Life Financial Inc. ("SLF Inc.").

We are an internationally diversified financial services organization providing savings, retirement and pension products, and life and health insurance to individuals and groups through our operations in Canada, the United States ("U.S."), Asia, and the United Kingdom ("U.K."). Sun Life Assurance is registered under the *Insurance Companies Act* (Canada), which is administered by the Office of the Superintendent of Financial Institutions, Canada ("OSFI").

Statement of Compliance

We prepared our Consolidated Financial Statements in accordance with International Financial Reporting Standards ("IFRS") as issued and adopted by the International Accounting Standards Board ("IASB"). Our accounting policies have been applied consistently within our Consolidated Financial Statements.

Basis of Presentation

Our Consolidated Statements of Financial Position are presented in the order of liquidity and each statement of financial position line item includes both current and non-current balances, as applicable.

We have defined our reportable segments and the amounts disclosed for those segments based on our management structure and the manner in which our internal financial reporting is conducted. Transactions between segments are executed and priced on an arm's-length basis in a manner similar to transactions with third parties.

The significant accounting policies used in the preparation of our Consolidated Financial Statements are summarized below and are applied consistently by us.

Estimates, Assumptions and Judgments

The application of our accounting policies requires estimates, assumptions and judgments as they relate to matters that are inherently uncertain. We have established procedures to ensure that our accounting policies are applied consistently and that the processes for changing methodologies for determining estimates are controlled and occur in an appropriate and systematic manner.

Use of Estimates and Assumptions

The preparation of our Consolidated Financial Statements requires us to make estimates and assumptions that affect the application of our policies and the reported amounts of assets, liabilities, revenue and expenses. Key sources of estimation uncertainty include the measurement of insurance contract liabilities and investment contract liabilities, determination of fair value, impairment of financial instruments, determination and impairment of goodwill and intangible assets, determination of provisions and liabilities for pension plans, other post-retirement benefits, income taxes, and the determination of fair value of share-based payments. Actual results may differ from our estimates thereby impacting our Consolidated Financial Statements. Information on our use of estimates and assumptions are discussed in this Note.

Judgments

In preparation of these Consolidated Financial Statements, we use judgments to select assumptions and determine estimates as described above. We also use judgment when applying accounting policies and when determining the classification of insurance contracts, investment contracts and service contracts; the substance of whether our relationship with a structured entity, subsidiary, joint venture or associate constitutes control, joint control or significant influence; functional currencies; contingencies; acquisitions; deferred income tax assets; and the determination of cash generating unit ("CGU").

Significant estimates and judgments have been made in the following areas and are discussed as noted:

Insurance contract and investment contract assumptions and measurement	Note 1 Insurance Contract Liabilities and Investment Contract Liabilities Note 10 Insurance Contract Liabilities and Investment Contract Liabilities
Determination of fair value	Note 1 Basis of Consolidation Note 1 Determination of Fair Value Note 3 Acquisitions Note 5 Total Invested Assets and Related Net Investment Income
Impairment of financial instruments	Note 1 Financial Assets Excluding Derivative Financial Instruments Note 6 Financial Instrument Risk Management
Income taxes	Note 1 Income Taxes Note 20 Income Taxes
Pension plans	Note 1 Pension Plans and Other Post-Retirement Benefits Note 25 Pension Plans and Other Post-Retirement Benefits
Goodwill and intangible assets on acquisition and impairment	Note 1 Goodwill Note 1 Intangible Assets Note 3 Acquisitions Note 9 Goodwill and Intangible Assets
Determination of control for purpose of consolidation	Note 1 Basis of Consolidation Note 16 Interests in Other Entities

Basis of Consolidation

Our Consolidated Financial Statements include the results of operations and the financial position of subsidiaries, which includes structured entities controlled by us, after intercompany balances and transactions have been eliminated. Subsidiaries are fully consolidated from the date we obtain control, and deconsolidated on the date control ceases. The acquisition method is used to account for the acquisition of a subsidiary from an unrelated party at the date that control is obtained, with the difference between the consideration transferred and the fair value of the subsidiary's net identifiable assets acquired recorded as goodwill. Judgment is required to determine fair value of the net identifiable assets acquired in a business combination.

We control an entity when we have power over an entity, exposure to or rights to variable returns from our involvement with an entity, and the ability to affect our returns through our power over an entity. Power exists when we have rights that give us the ability to direct the relevant activities, which are those activities that could significantly affect the entity's returns. Power can be obtained through voting rights or other contractual arrangements. Judgment is required to determine the relevant activities and which party has power over these activities. When we have power over and variable returns from an entity, including an investment fund that we manage, we also apply significant judgment in determining whether we are acting as a principal or agent. To make this determination, we consider factors such as how much discretion we have regarding the management of the investment fund and the magnitude and extent of variability associated with our interests in the fund. If we determine we are the principal rather than the agent, we would consolidate the assets and liabilities of the fund. Equity interests held by external parties in entities that we consolidate are recorded as Non-controlling interests in our Consolidated Statements of Changes in Equity. If we lose control of an entity, the assets and liabilities of that entity are derecognized from our Consolidated Statements of Financial Position at the date at which control is lost and any investment retained is remeasured to fair value.

A joint venture exists when Sun Life Assurance, or one of its subsidiaries, has joint control of a joint arrangement and has rights to the net assets of the arrangement. Joint control is the contractually agreed sharing of control and exists only when the decisions about the relevant activities require the unanimous consent of the parties sharing control. Associates are entities over which Sun Life Assurance or its subsidiaries are able to exercise significant influence. Significant influence is the power to participate in the financial and operating policy decisions of an investee but not have control or joint control over those decisions. Significant influence is generally presumed to exist when Sun Life Assurance or its subsidiaries hold greater than 20% of the voting power of the investee but does not have control or joint control. The equity method is used to account for our interests in joint ventures and associates. A joint operation exists when Sun Life Assurance, or one of its subsidiaries, has joint control of an arrangement that gives it rights to the assets and obligations for the liabilities of the operation, rather than the net assets of the arrangement. For joint operations, we record our share of the assets, liabilities, revenue and expenses of the joint operation. Judgment is required to determine whether contractual arrangements between multiple parties results in control, joint control or significant influence, with consideration of the relevant activities of the entity, voting rights, representation on boards of directors and other decision-making factors. Judgment is also required to determine if a joint arrangement is a joint venture or joint operation, with consideration of our rights and obligations and the structure and legal form of the arrangement.

Determination of Fair Value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. Fair value is measured using the assumptions that market participants would use when pricing an asset or liability. We determine fair value by using quoted prices in active markets for identical or similar assets or liabilities. When quoted prices in active markets are not available, fair value is determined using valuation techniques that maximize the use of observable inputs. When observable valuation inputs are not available, significant judgment is required to determine fair value by assessing the valuation techniques and valuation inputs. The use of alternative valuation techniques or valuation inputs may result in a different fair value. A description of the fair value methodologies, assumptions, valuation techniques, and valuation inputs by type of asset is included in Note 5.

Foreign Currency Translation

Translation of Transactions in Foreign Currencies

The financial results of Sun Life Assurance and its subsidiaries, joint ventures and associates are prepared in the currency in which they conduct their ordinary course of business, which is referred to as functional currency. Transactions occurring in currencies other than the functional currency are translated to the functional currency using the spot exchange rates at the dates of the transactions.

Monetary assets and liabilities in foreign currencies are translated to the functional currency at the exchange rate at the statement of financial position date. Non-monetary assets and liabilities in foreign currencies that are held at fair value are translated using the exchange rate at the statement of financial position date, while non-monetary assets and liabilities that are measured at historical cost are translated using the exchange rate at the date of the transaction.

The resulting exchange differences from the translation of monetary items and non-monetary items held at fair value, with changes in fair value recorded to income, are recognized in our Consolidated Statements of Operations. For monetary assets classified as available-for-sale ("AFS"), translation differences calculated on amortized cost are recognized in our Consolidated Statements of Operations and other changes in carrying amount are recognized in other comprehensive income ("OCI"). The exchange differences from the translation of non-monetary items classified as AFS are recognized in OCI.

Translation to the Presentation Currency

In preparing our Consolidated Financial Statements, the financial statements of foreign operations are translated from their respective functional currencies to Canadian dollars, our presentation currency. Assets

and liabilities are translated at the closing exchange rate at the statement of financial position date, and income and expenses are translated using the average exchange rates. The accumulated gains or losses arising from translation of functional currencies to the presentation currency, net of the effect of any hedges, are included as a separate component of OCI within equity. Upon disposal of a foreign operation that includes loss of control, significant influence or joint control, the cumulative exchange gain or loss related to that foreign operation is recognized in income.

Invested Assets

Financial Assets Excluding Derivative Financial Instruments

Financial assets include cash, cash equivalents and short-term securities, debt securities, equity securities, mortgages and loans, financial assets included in other invested assets and policy loans. Financial assets are designated as financial assets at fair value through profit or loss (“FVTPL”) or AFS assets, or are classified as loans and receivables at initial recognition.

The following table summarizes the financial assets included in our Consolidated Statements of Financial Position and the asset classifications applicable to these assets:

Cash, cash equivalents and short-term securities	FVTPL
Debt securities	FVTPL and AFS
Equity securities	FVTPL and AFS
Mortgages and loans	Loans and receivables
Other invested assets	FVTPL and AFS
Policy loans	Loans and receivables

Mortgages and loans include mortgages, loans and debt securities not quoted in an active market. Financial assets included in Other invested assets include investments in limited partnerships, segregated funds and mutual funds. Cash equivalents are highly liquid instruments with a term to maturity of three months or less, while short-term securities have a term to maturity exceeding three months but less than one year. Policy loans are fully secured by the policy values on which the loans are made. The accounting for each asset classification is described in the following sections.

i) Initial Recognition and Subsequent Measurement

Generally, debt securities, equity securities and other invested assets supporting our insurance contract liabilities or investment contract liabilities measured at fair value are designated as FVTPL, while debt securities, equity securities and other invested assets not supporting our insurance contract liabilities or that are supporting investment contract liabilities are measured at amortized cost or designated as AFS. Mortgages and loans and policy loans are classified as loans and receivables. Financial assets are recognized in the Consolidated Statements of Financial Position on their trade dates, which are the dates that we commit to purchase or sell the assets. Originated mortgages and loans are recognized in the Consolidated Statements of Financial Position on their funding dates.

Financial Assets at Fair Value Through Profit or Loss

Financial assets at FVTPL include financial assets that are held for trading (“HFT”), as well as financial assets that have been designated as FVTPL at initial recognition. A financial asset is classified as HFT if it is acquired principally for the purpose of selling in the near term. A financial asset can be designated as FVTPL if it eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring assets or liabilities or recognizing the gains and losses on them on different bases; or if a group of financial assets, financial liabilities or both, is managed and its performance is evaluated on a fair value basis. Cash equivalents and short-term securities have been classified as HFT.

Generally, debt securities, equity securities and other invested assets supporting insurance contract liabilities or investment contract liabilities measured at fair value have been designated as FVTPL. This designation has been made to eliminate or significantly reduce the measurement inconsistency that would arise due to the measurement of the insurance contract or investment contract liabilities, which are based

on the carrying value of the assets supporting those liabilities. Because the carrying value of insurance contract liabilities is determined by reference to the assets supporting those liabilities, changes in the insurance contract liabilities generally offset changes in the fair value of debt securities classified as FVTPL, except for changes that are due to impairment. The majority of equity securities and other invested assets classified as FVTPL are held to support products where investment returns are passed through to policyholders and therefore, changes in the fair value of those assets are significantly offset by changes in insurance contract liabilities.

Financial assets classified as FVTPL are recorded at fair value in our Consolidated Statements of Financial Position and transaction costs are expensed immediately. Changes in fair value as well as realized gains and losses on sale are recorded in Fair value and foreign currency changes on assets and liabilities in our Consolidated Statements of Operations. Interest income earned and dividends received are recorded in Interest and other investment income in our Consolidated Statements of Operations.

Available-for-Sale Financial Assets

Financial assets classified as AFS are recorded at fair value in our Consolidated Statements of Financial Position and transaction costs are capitalized on initial recognition. Transaction costs for debt securities are recognized in income using the effective interest method, while transaction costs for equity securities and other invested assets are recognized in income when the asset is derecognized. Changes in fair value are recorded to unrealized gains and losses in OCI. For foreign currency translation, exchange differences calculated on the amortized cost of AFS debt securities are recognized in income and exchange differences calculated on other changes in carrying amount are recognized in OCI. The exchange differences from the translation of AFS equity securities and other invested assets are recognized in OCI. Interest income earned and dividends received are recorded in Interest and other investment income in our Consolidated Statements of Operations. Net impairment losses and realized gains and losses on the sale of assets classified as AFS are reclassified from accumulated OCI to Net gains (losses) on available-for-sale assets in our Consolidated Statements of Operations.

Loans and Receivables

Loans and receivables are generally carried at amortized cost. Transaction costs for mortgages and loans are capitalized on initial recognition and are recognized in income using the effective interest method. Realized gains and losses on the sale of mortgages and loans, interest income earned, and fee income are recorded in Interest and other investment income in our Consolidated Statements of Operations.

ii) Derecognition

Financial assets are derecognized when our rights to contractual cash flows expire, when we transfer substantially all our risks and rewards of ownership, or when we no longer retain control.

iii) Impairment

Financial assets are assessed for impairment on a quarterly basis. Financial assets are impaired and impairment losses are incurred if there is objective evidence of impairment as a result of one or more loss events and that event has an impact on the estimated future cash flows that can be reliably estimated. Objective evidence of impairment generally includes significant financial difficulty of the issuer, including actual or anticipated bankruptcy or defaults and delinquency in payments of interest or principal or disappearance of an active market for that financial asset. Objective evidence of impairment for an investment in an equity instrument or other invested asset also includes, but is not limited to, the financial condition and near-term prospects of the issuer, including information about significant changes with adverse effects that have taken place in the technological, market, economic, or legal environment in which the issuer operates that may indicate that the carrying amount will not be recovered, and a significant or prolonged decline in the fair value of an equity instrument or other invested asset below its cost. Management exercises considerable judgment in assessing for objective evidence of impairment. Due to the inherent risks and uncertainties in our evaluation of assets or groups of assets for objective evidence of

impairment, the actual impairment amount and the timing of the recognition of impairment may differ from management assessment. The impairment assessment process is discussed in Note 6.

Financial Assets at Fair Value Through Profit or Loss

Since financial assets classified as FVTPL are carried at fair value with changes in fair value recorded to income, any reduction in value of the assets due to impairment is already reflected in income. However, the impairment of assets classified as FVTPL generally impacts the change in insurance contract liabilities due to the impact of asset impairment on estimates of future cash flows.

Available-for-Sale Financial Assets

When there is objective evidence that a financial asset classified as AFS is impaired, the loss in accumulated OCI is reclassified to Net gains (losses) on available-for-sale assets in our Consolidated Statements of Operations. Following impairment loss recognition, a debt security continues to be carried at fair value with changes in fair value recorded in OCI, and it is assessed quarterly for further impairment loss or reversal. Subsequent losses on an impaired equity security or other invested asset, including losses relating to foreign currency changes, are reclassified from OCI to income in subsequent reporting periods until the asset is derecognized. Once an impairment loss on a debt security classified as AFS is recorded to income, any reversal of impairment loss through income occurs only when the recovery in fair value is objectively related to an event occurring after the impairment was recognized. Impairment losses on an equity security or other invested asset classified as AFS are not reversed through income.

Loans and Receivables

If an impairment loss on an individual mortgage or loan has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. For collateralized financial assets, the present value of the estimated future cash flows reflects the cash flows that may result from foreclosure less costs to sell, whether or not foreclosure is probable. If no evidence of impairment exists for an individually assessed mortgage or loan, it is included in a group of loans with similar credit risk characteristics and collectively assessed for impairment.

When an impairment loss has been incurred, the carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognized in income. If the impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the initial impairment charge was recognized, the previous impairment charge is reversed by adjusting the allowance account and the reversal is recognized in income. Interest income is recognized on impaired mortgages and loans using the effective interest rate method and it is based on the estimated future cash flows used to measure the impairment loss. Changes in the allowance account, other than write-offs net of recoveries, are charged against Interest and other investment income in our Consolidated Statements of Operations. Write-offs, net of recoveries, are deducted from the allowance account when there is no realistic prospect of recovery, which is typically not before derecognition of the asset through foreclosure or sale.

Collateral

Cash received (pledged) as collateral is recognized (derecognized) in our Consolidated Statements of Financial Position with corresponding amounts recognized in Other liabilities (Other assets), respectively. All other types of assets received (pledged) as collateral are not recognized (derecognized) in our Consolidated Statements of Financial Position.

Derivative Financial Instruments

All derivative financial instruments are recorded at fair value in our Consolidated Statements of Financial Position. Derivatives with a positive fair value are recorded as Derivative assets while derivatives with a negative fair value are recorded as Derivative liabilities.

The accounting for the changes in fair value of a derivative instrument depends on whether or not it is designated as a hedging instrument for hedge accounting purposes. Changes in (i) fair value of derivatives that are not designated for hedge accounting purposes, which are defined as derivative investments, and (ii) embedded derivatives that are bifurcated, are recorded in Fair value and foreign currency changes on assets and liabilities in our Consolidated Statements of Operations. Income earned or paid on these derivatives is recorded in Interest and other investment income in our Consolidated Statements of Operations. Hedge accounting is applied to certain derivatives to reduce income statement volatility. When certain qualification criteria are met, hedge accounting recognizes the offsetting effects of hedging instruments and hedged items in income or defers the effective portion of changes in fair value of hedging instruments in OCI until there is a recognition event, such as the occurrence of a forecasted transaction or the disposal of an investment in a foreign operation, or hedge accounting is discontinued. All hedging relationships are documented at inception and hedge effectiveness is assessed at inception and on a quarterly basis to determine whether the hedging instruments are highly effective in offsetting changes attributable to the hedged risk in the fair value or cash flows of the hedged items.

Fair Value Hedges

Certain interest rate swaps and foreign currency forwards are designated as hedging instruments in fair value hedges of the interest rate or foreign exchange rate risks associated with AFS assets. Changes in fair value of the derivatives are recorded in Interest and other investment income in our Consolidated Statements of Operations. The change in fair value of the AFS assets related to the hedged risk is reclassified from OCI to income. As a result, ineffectiveness, if any, is recognized in income to the extent that changes in fair value of the derivatives and AFS assets do not offset. Interest income earned and paid on the AFS assets and swaps in the fair value hedging relationships are recorded in Interest and other investment income in our Consolidated Statements of Operations.

Cash Flow Hedges

Certain equity and foreign currency forwards are designated as hedging instruments in cash flow hedges for anticipated payments of awards under certain share-based payment plans and for anticipated foreign currency purchases of foreign operations. Changes in the fair value of derivatives for the effective portion of the hedge are recognized in OCI, while the ineffective portion of the hedge and any items excluded from the hedging relationship, such as the spot-to-forward differential, are recognized in Interest and other investment income in our Consolidated Statements of Operations. A portion of the amount recognized in OCI related to the equity forwards is reclassified to income as a component of Operating expenses as the liabilities for the share-based payment awards are accrued over the vesting period. A portion of the amounts recognized in OCI related to the foreign currency forwards would be reclassified to income upon disposal or impairment of the foreign operations. All amounts recognized in, or reclassified from OCI are net of related taxes.

Embedded Derivatives

An embedded derivative is a component of a host contract that modifies the cash flows of the host contract in a manner similar to a derivative, according to a specified interest rate, financial instrument price, foreign exchange rate, underlying index or other variable. We are required to separate embedded derivatives from the host contract, if an embedded derivative has economic and risk characteristics that are not closely related to the host contract, meets the definition of a derivative, and the combined contract is not measured at fair value with changes recognized in income. If an embedded derivative is bifurcated for accounting purposes from the host contract, it will be accounted for as a derivative. For further details on embedded derivatives in insurance contracts, see the Insurance Contract Liabilities accounting policy in this Note.

Investment Properties

Investment properties are real estate held to earn rental income, for capital appreciation, or both. Properties held to earn rental income or for capital appreciation that have an insignificant portion that is owner-occupied are classified as investment properties. Properties that do not meet these criteria are classified as

property and equipment, included in Other assets as described below. Expenditures related to ongoing maintenance of properties incurred subsequent to acquisition are expensed. Investment properties are initially recognized at cost in our Consolidated Statements of Financial Position. Various costs incurred associated with the acquisition of an investment property are either capitalized or expensed depending on whether or not the acquisition is considered a business combination. Investment properties are subsequently measured at fair value with changes in value recorded to Fair value and foreign currency changes on assets and liabilities in our Consolidated Statements of Operations.

When the use of a property changes from owner-occupied to investment property, any gain arising on the remeasurement of the property to fair value at the date of transfer is recognized in our Consolidated Statements of Operations to the extent that it reverses a previous impairment loss. Any remaining increase is recognized in OCI.

Other Invested Assets – Non-Financial Assets

Other invested assets also include non-financial assets such as investments in joint ventures and associates, which are accounted for using the equity method. Investments in joint ventures and associates are initially recorded at cost. The investment in joint ventures and associates is increased by our share of capital contributions and for purchases of additional interests and is reduced by distributions received. In addition, subsequent adjustments to the investment are made for our share of net income or loss and our share of OCI. Our share of net income is recorded in Interest and other investment income in our Consolidated Statements of Operations and our share of OCI is recorded in our Consolidated Statements of Comprehensive Income (Loss). Impairment losses on equity method investments are recognized when events or changes in circumstances indicate that they are impaired. The impairment loss recognized is the difference between the carrying amount and the recoverable amount.

Other Assets

Other assets, which are measured at amortized cost, include accounts receivable, investment income due and accrued, deferred acquisition costs, and property and equipment. Deferred acquisition costs arising from service contracts or from service components of investment contracts are amortized over the expected life of the contracts based on the future expected fees. Owner-occupied properties are amortized to their residual value over 25 to 49 years. Furniture, computers, other office equipment, and leasehold improvements are amortized to their residual value over 2 to 20 years.

Reinsurance Assets

In the normal course of business, we use reinsurance to limit exposure to large losses. We have a retention policy that requires that such arrangements be placed with well-established, highly rated reinsurers. Reinsurance assets are measured consistently with the amounts associated with the underlying insurance contracts and in accordance with the terms of each reinsurance contract. Amounts due to or from reinsurers with respect to premiums received or paid claims are included in Other assets and Other liabilities in the Consolidated Statements of Financial Position. Premiums for reinsurance ceded are presented as premiums ceded in the Consolidated Statements of Operations. Reinsurance expenses (recoveries), as presented in our Consolidated Statements of Operations, represent reinsurance expenses and expense recoveries resulting from reinsurance agreements.

Reinsurance assets are subject to impairment testing. If impaired, the carrying value is reduced, and an impairment loss is recognized in Reinsurance expenses (recoveries) in our Consolidated Statements of Operations. Impairment occurs when objective evidence exists (as a result of an event) after the initial recognition of the reinsurance asset indicating that not all amounts due under the terms of the contract will be received, and the impairment can be reliably measured.

Reinsurance assumed is accounted for as an insurance, investment or service contract depending on the underlying nature of the agreement and if it meets the definition of an insurance, investment or service contract. For the accounting for these types of contracts, see the respective policy section in this Note.

Intangible Assets

Intangible assets consist of finite life intangible assets. Finite life intangible assets are amortized on a straight-line basis over varying periods of up to 40 years, and are charged through operating expenses. The useful lives of finite life intangible assets are reviewed annually, and the amortization is adjusted as necessary.

Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the net identifiable tangible and intangible assets of the acquired businesses. It is carried at original cost less any impairment subsequently incurred. Goodwill is assessed for impairment annually or more frequently if events or circumstances occur that may result in the recoverable amount of a CGU or a group of CGUs falling below its carrying value. A CGU is the smallest identifiable group of assets that generates cash inflows that are largely independent of cash inflows from other groups of assets. We exercise significant judgment in determining our CGUs. The factors considered in determining our CGUs include product cash inflows, product distribution, target markets, and how management monitors and evaluates the operations.

The goodwill balances are allocated to either individual or groups of CGUs that are expected to benefit from the synergies of the business combination. Goodwill impairment is quantified by comparing a CGU's or a group of CGUs' carrying value to its recoverable amount, which is the higher of fair value less costs of disposal and value in use. Impairment losses are recognized immediately and cannot be reversed in future periods. Significant judgment is involved in estimating the model inputs used to determine the recoverable amount of our CGUs or group of CGUs, including those for discount rates, capital, the value of new business, expenses, cash flow projections, and market multiples, due to the uncertainty and the forward-looking nature of these inputs. The assumptions may differ from the actual experience, and estimates may change from period to period based on future events or revisions of assumptions. These key assumptions are discussed in Note 9.

Insurance Contract Liabilities

Insurance contracts are contracts under which we accept significant insurance risk from a policyholder by agreeing to compensate the policyholder if a specified uncertain future event adversely affects the policyholder. The presence of significant insurance risk in individual contracts is assessed by reviewing books of contracts with homogeneous risk features. Judgment is required to determine the classification of a contract as an insurance contract, investment contract or a service contract.

As discussed in the Segregated Funds section of this Note, certain insurance contracts under which the policyholder bears the risks associated with the underlying investments are classified as Insurance contracts for account of segregated fund holders in our Consolidated Statements of Financial Position.

Insurance contract liabilities, including policy benefits payable and provisions for policyholder dividends, are determined in accordance with Canadian accepted actuarial practice and any requirements of OSFI. As confirmed by guidance provided by the Canadian Institute of Actuaries ("CIA"), the current Canadian Asset Liability Method ("CALM") of valuation of insurance contract liabilities satisfies the IFRS 4 *Insurance Contracts* ("IFRS 4") requirements for eligibility for use under IFRS. Under CALM, liabilities are set equal to the statement of financial position value of the assets required to support them.

Some insurance contracts contain discretionary participation features ("DPF"), whereby the policyholder has the right to receive potentially significant additional benefits based on the actual investments and other experience on a block of similar contracts. IFRS allows the non-guaranteed, or participating, elements of such contracts to be classified as either a liability or as equity, depending on the nature of our obligation to the policyholder. The contracts issued by us contain constructive obligations to the policyholder with respect to the DPF of the contracts. We have therefore elected to classify these features as a liability, consistent with accounting treatment under CALM, and in accordance with guidance provided by the CIA.

Derivatives embedded in insurance contracts are treated as separate derivatives and measured at fair value with changes in fair value recognized in income, except when the embedded derivative itself meets the definition of an insurance contract under IFRS, or when the risks and characteristics are closely related to those of the host contracts or when the derivative is the policyholder's option to surrender an insurance contract for a fixed amount or an amount based on a fixed amount and an interest rate. The derivatives that have not been separated are accounted for as insurance contract liabilities.

Significant judgment is required in determining our liabilities for insurance contracts including the assumptions required for their determination. Application of different assumptions may result in different measurement of the insurance contract liabilities. Actual experience may differ from assumptions, and estimates may change from period to period based on future events or revisions of assumptions. Key assumptions and considerations in choosing assumptions are discussed in Note 10 and sensitivities are discussed in Note 7.

Financial Liabilities

Investment Contract Liabilities

Contracts issued by us that do not transfer significant insurance risk, but do transfer financial risk from the policyholder to us, are financial liabilities and are accounted for as investment contracts. Service components of investment contracts are treated as service contracts. For further details on how service components of investment contracts are treated, see the Service Contracts accounting policy in this Note.

Liabilities for investment contracts without DPF are measured at FVTPL or amortized cost. Contracts recorded at FVTPL are measured at fair value at inception and each subsequent reporting period. Contracts recorded at amortized cost are initially recognized at fair value, less transaction costs directly attributable to the issue of the contract. At each subsequent period, the contracts are measured at amortized cost using the effective interest method. Changes in fair value of investment contract liabilities recorded at FVTPL and amortization on contracts recorded at amortized cost are recorded as an increase (decrease) in investment contract liabilities in our Consolidated Statements of Operations. Deposits collected from and payments made to contract holders are recorded as an increase and decrease in Investment contract liabilities in our Consolidated Statements of Financial Position. These liabilities are derecognized when the obligation of the contract is discharged, cancelled or expired.

As discussed in the Segregated Funds section of this Note, certain investment contracts under which the policyholder bears the risks associated with the underlying investments are classified as Investment contracts for account of segregated fund holders in the Consolidated Statements of Financial Position. The accounting for investment contracts that contain DPF is described in the Insurance Contract Liabilities section of this Note.

Other Liabilities

Other liabilities, which are measured at amortized cost, include accounts payable, repurchase agreements, accrued expenses and taxes, and provisions. Liabilities for provisions, other than insurance contract liabilities and investment contract liabilities, are recognized for present legal or constructive obligations as a result of a past event if it is probable that they will result in an outflow of economic resources and the amount can be reliably estimated. The amounts recognized for these provisions are the best estimates of the expenditures required to settle the present obligations or to transfer them to a third party at the statement of financial position date, considering all the inherent risks and uncertainties, as well as the time value of money. These provisions are reviewed as relevant facts and circumstances change.

Senior Debentures, Subordinated Debt and Preferred Shares Liabilities

Senior debentures, subordinated debt, and preferred shares liabilities are recorded at amortized cost using the effective interest method. Transaction costs are recorded as part of the liability and are recognized in income using the effective interest method. These liabilities are derecognized when the obligation of the contract is discharged, cancelled or expired.

Service Contracts

Contracts issued by us to customers that do not transfer significant insurance risk and do not transfer financial risk from the customer to us, including contracts for investment management service, are classified as service contracts. Service components of investment contracts are also accounted for as service contracts. Fee income earned from these contracts is described in the Premium and Fee Income Recognition accounting policy section of this Note. Deferred acquisition costs are described under the Other Assets accounting policy section of this Note. Where the cost of meeting the obligations of the contract exceed the economic benefits expected to be received under it, a provision is recognized in Other liabilities.

Segregated Funds

Segregated funds are products for which we issue a contract where the benefit amount is directly linked to the fair value of the investments held in the particular segregated fund. Although the underlying assets are registered in our name and the segregated fund contract holder has no direct access to the specific assets, the contractual arrangements are such that the segregated fund policyholder bears the risks and rewards of the fund's investment performance. In addition, certain contracts include guarantees from us. We derive fee income from segregated funds, which is included in Fee income in our Consolidated Statements of Operations. Policyholder transfers between general funds and segregated funds are included in Net transfer to (from) segregated funds in our Consolidated Statements of Operations. Deposits to segregated funds are reported as increases in segregated funds liabilities and are not reported as revenues in our Consolidated Statements of Operations.

Investments for Account of Segregated Fund Holders

Investments for account of segregated fund holders are recorded separately from the Total general fund assets in our Consolidated Statements of Financial Position and are carried at fair value. Fair values are determined using quoted market values or, where quoted market values are not available, estimated fair values as determined by us.

Insurance Contracts for Account of Segregated Fund Holders

Insurance contracts for account of segregated fund holders are recorded separately from the Total general fund liabilities in our Consolidated Statements of Financial Position. Insurance contracts under which the segregated fund holders bear the risks associated with the underlying investments are classified as Insurance contracts for account of segregated fund holders. The liabilities reported as Insurance contracts for account of segregated fund holders are measured at the aggregate of the policyholder account balances. Changes in the fair value of the invested assets of the segregated funds are recorded in net realized and unrealized gains (losses) within the segregated fund and are not recorded in our Consolidated Statements of Operations.

Other assets and liabilities associated with these insurance contracts, such as origination costs and the liabilities associated with guarantees provided by us, are included in general fund liabilities in Insurance contract liabilities in our Consolidated Statements of Financial Position.

Investment Contracts for Account of Segregated Fund Holders

Investment contracts for account of segregated fund holders are recorded separately from the Total general fund liabilities in our Consolidated Statements of Financial Position. Investment contracts under which the segregated fund holders bear the risks associated with the underlying investments are classified as Investment contracts for account of segregated fund holders. The liabilities reported as Investment contracts for account of segregated fund holders are measured at the aggregate of the policyholder account balances.

Other liabilities associated with these investment contracts, such as onerous contract provisions required for service components, are included in general fund liabilities in Investment contract liabilities in our Consolidated Statements of Financial Position.

Income Taxes

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. Deferred income tax is provided using the liability method on temporary differences at the statement of financial position date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Current and deferred income tax relating to items recognized in the current or previous period in OCI or directly in equity is accordingly recognized in OCI or equity and not in our Consolidated Statements of Operations. Interest and penalties payable to taxation authorities are recorded in Interest expense and Operating expenses, respectively, in our Consolidated Statements of Operations.

Deferred income tax assets and liabilities are calculated based on income tax rates and laws that are expected to apply when the liability is settled or the asset is realized, which are normally those enacted or considered substantively enacted at our Consolidated Statements of Financial Position dates. Deferred income tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses to the extent of the probability that future taxable profit will be available against which these assets can be utilized. At each reporting period, we assess all available evidence, both positive and negative, to determine the amount of deferred income tax assets to be recognized. The recognition of deferred income tax assets requires estimates and significant judgment about future events, such as projections of future taxable profits, based on the information available at the reporting date.

The determination of the required provision for current and deferred income taxes requires that we interpret tax legislation in the jurisdictions in which we operate. For each reporting period, our income tax provision reflects our best estimate, based on the information available at the reporting date, of tax positions that are under audit or appeal by relevant tax authorities. To the extent that our estimate of tax positions or the timing of realization of deferred income tax assets or liabilities are not as expected, the provision for income taxes may increase or decrease in the future to reflect the actual experience.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, joint ventures and associates, except where we control the timing of the reversal of the temporary difference and it is apparent that the temporary difference will not reverse in the foreseeable future. No deferred income tax asset or liability is recognized in relation to temporary differences that arise from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, did not affect either the accounting profit or taxable profit or loss. Deferred income tax assets and deferred income tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities, the deferred income taxes relate to the same taxable entity and the same taxation authority and we intend either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

In determining the impact of taxes, we are required to comply with Canadian accepted actuarial practice and IFRS. CALM requires that all projected cash flows associated with insurance contract liabilities, including income taxes, be included in the determination of insurance contract liabilities. The insurance contract liabilities are therefore determined including all policy-related income tax effects on a discounted basis, and then adjusted for any related deferred income tax assets and liabilities held in accordance with IFRS. The net result of this adjustment is to leave the discounting effect of the deferred income taxes associated with temporary differences on policy-related tax items in the insurance contract liabilities.

Pension Plans and Other Post-Retirement Benefits

For defined benefit plans, the present value of the defined benefit obligation is calculated by independent actuaries using the projected unit credit method, and actuarial assumptions that represent best estimates of future variables that will affect the ultimate cost of these obligations. The discount rate used for our material defined benefit plans is determined with reference to market yields of high-quality corporate bonds that are denominated in the same currency in which the benefits will be paid, and that have terms to maturity approximating the terms of obligations. Plan assets are measured at fair value and are held in separate trustee administered funds or as qualifying insurance contracts. The difference between the fair value of the

plan assets and the present value of the defined benefit obligation is recognized on the Consolidated Statements of Financial Position as an asset or liability in Other assets or Other liabilities, respectively.

Costs charged to our Consolidated Statements of Operations include current service cost, any past service costs, any gains or losses from curtailments or settlements, and interest on the net defined benefit liability (asset). Remeasurement of the net defined benefit liability (asset), which includes the impact of changes to the actuarial assumption underlying the liability calculations, liability experience gains or losses, the difference between the return on plan assets and the amount included in the interest on the net defined benefit liability (asset), is reflected immediately in OCI. The calculation of the defined benefit expenses and obligations requires judgment as the recognition is dependent on various actuarial assumptions such as discount rates, health care cost trend rates and projected compensation increases. These key assumptions are discussed in Note 25.

Dividends

Dividends payable to holders of shares of Sun Life Assurance are recognized in the period in which they are authorized or approved.

Premium and Fee Income Recognition

Gross premiums for all types of insurance contracts excluding segregated fund contracts are generally recognized as revenue when due.

Fee income is generated from insurance contracts and service contracts.

Fee income from insurance contracts includes fees from segregated fund contracts, guarantee fees and other fees associated with insurance contracts and is typically recognized as revenue when services are rendered.

Fee income from service contracts represents fees associated with non-insurance contracts with customers, and includes Distribution fees, Fund management and other asset-based fees, and Administrative services and other fees. Distribution fees includes fees earned from the distribution of investment products and other intermediary activities. Fund management and other asset-based fees includes fees earned from investment management services. Administrative services and other fees includes fees earned from contract administration and other management services. Fee income from service contracts is typically recognized as revenue when services are rendered at either a point in time or over time. The majority of fee income from service contracts is comprised of variable consideration which is based on a percentage of assets under management or another variable metric and is recognized as revenue when it is highly probable that a significant reversal in the amount of the revenue recognized will not occur.

Share-Based Payments

Share-based payment plans based on the value of SLF Inc.'s common shares are accounted for as cash-settled share-based payment transactions. The total liabilities for these plans are computed based on the estimated number of awards expected to vest at the end of the vesting period. The liabilities are recomputed at the end of each reporting period and are measured at the fair value of the award at that reporting date. The liabilities are accrued and expensed on a straight-line basis over the vesting periods. The liabilities are settled in cash at the end of the vesting period.

Related Party Transactions

Our related parties include our parent company and its other subsidiaries, our joint ventures and associates, and our key management personnel. Transactions with related parties are accounted for in the same manner as transactions with unrelated parties with the exception of business combinations and certain reorganizations involving us and our parent company or its other subsidiaries. For these

transactions, the net assets acquired or sold are transferred at their carrying amount in the transferring entity, with any difference between the consideration paid or received and the carrying amount of the net assets transferred recorded to Retained earnings in our Consolidated Statements of Changes in Equity.

2. Changes in Accounting Policies

2.A New and Amended International Financial Reporting Standards Adopted in 2018

2.A.i IFRS 15 Revenue from Contracts with Customers

In May 2014, the IASB issued IFRS 15 *Revenue from Contracts with Customers* ("IFRS 15"), which replaces IAS 11 *Construction Contracts*, IAS 18 *Revenue* and various interpretations. Amendments to IFRS 15 were issued in September 2015 and April 2016. IFRS 15 establishes principles about the nature, amount, timing, and uncertainty of revenue arising from contracts with customers. IFRS 15 requires entities to recognize revenue to reflect the transfer of goods or services to customers measured at the amounts an entity expects to be entitled to in exchange for those goods or services. Insurance contracts and revenues arising from those contracts, primarily premium revenue, are not within the scope of this standard. Revenues from service contracts and service components of investment contracts (which are treated as service contracts) that are reported in Fee income are within the scope of IFRS 15. IFRS 15 also provides guidance related to the costs to obtain and to fulfill a contract. We adopted IFRS 15 on a cumulative retrospective basis and recognized differences on transition to IFRS 15 as at January 1, 2018 in retained earnings. As a result of the adoption of IFRS 15, we derecognized a portion of our deferred acquisition costs (previously recognized in Other assets) and the related deferred tax liability on our Consolidated Statements of Financial Position, which reduced opening retained earnings by \$3 on an after-tax basis as at January 1, 2018.

Additional disclosure on revenue from contracts with customers is included in Note 17.

2.A.ii Amendments to IFRS 4 (IFRS 9 deferral approach)

In September 2016, the IASB issued Amendments to IFRS 4 to allow insurance entities whose predominant activities are to issue contracts within the scope of IFRS 4 an optional temporary exemption from applying IFRS 9 *Financial Instruments* ("IFRS 9") ("deferral approach"). On January 1, 2018, we qualified and elected to defer the adoption of IFRS 9 under the amendments to IFRS 4 as our activities are predominantly connected with insurance in accordance with IFRS standards. Consequently, we will continue to apply IAS 39 *Financial Instruments: Recognition and Measurement* ("IAS 39"), the existing financial instrument standard.

To enable a comparison to entities applying IFRS 9, entities that apply the IFRS 9 deferral approach are required to provide fair value disclosures separately for (i) those financial assets that pass the Solely Payment of Principal and Interest ("SPPI") test and (ii) all other financial assets. We are also required to disclose credit ratings of financial assets that pass the SPPI test. Financial assets which pass the SPPI test are assets with contractual terms that give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Because we use CALM to value our insurance contract liabilities, the impact on net income in our Consolidated Statements of Operations of classifying assets supporting those liabilities as SPPI or non-SPPI is not material. For assets not supporting insurance contract liabilities, substantially all of these assets pass the SPPI test under IFRS 9.

Notes 5.A.i, 6.A.v and 10.D disclose the carrying value and fair value of our financial assets, the carrying value of Debt securities and Mortgages and loans by credit risk rating, and assets supporting insurance contracts liabilities and assets not supporting insurance contract liabilities, respectively.

2.A.iii Other New and Amended IFRS

The following new and amended IFRS are effective for annual periods beginning on or after January 1, 2018, and did not have a material impact on our Consolidated Financial Statements.

In June 2016, the IASB issued *Classification and Measurement of Share-based Payment Transactions*, which amends IFRS 2 *Share-based Payment*. The amendments clarify how to account for certain types of share-based payment transactions, such as the effects of vesting and non-vesting conditions on the measurement of cash-settled share-based payments. These amendments are applicable to awards granted on or after that date and to unvested and vested but unexercised awards outstanding at that date. These amendments were applied prospectively.

In December 2016, the IASB issued *Annual Improvements to IFRSs 2014-2016 Cycle*, which includes minor amendments to IFRS 1 *First-time Adoption of International Financial Reporting Standards* and IAS 28 *Investments in Associates and Joint Ventures* ("IAS 28").

In December 2016, the IASB issued *Transfers of Investment Property (Amendments to IAS 40)*. The amendments to IAS 40 *Investment Property* clarify that an entity shall transfer property to, or from, investment property when, and only when, there is evidence of a change in use.

In December 2016, the IASB issued IFRIC 22 *Foreign Currency Transactions and Advance Consideration* ("IFRIC 22"), which was developed by the IFRS Interpretations Committee. IFRIC 22 clarifies that for purposes of determining the exchange rate in transactions which include the receipt or payment of advance consideration in a foreign currency, the date of the transaction is the date of initial recognition of the non-monetary prepayment asset or deferred income liability.

2.B New and Amended International Financial Reporting Standards to be Adopted in 2019

The following new and amended IFRS were issued by the IASB and are expected to be adopted by us in 2019.

In January 2016, the IASB issued IFRS 16 *Leases* ("IFRS 16"), which replaces IAS 17 *Leases*, and related interpretations. IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. For lessees, IFRS 16 removes the classification of leases as either operating or financing and requires that all leases to be recognized on the statement of financial position, with certain exemptions allowed by this new standard. The accounting for lessors is substantially unchanged. The standard is effective for annual periods beginning on or after January 1, 2019, to be applied retrospectively, or on a modified retrospective basis. We will be adopting IFRS 16 on a modified retrospective basis. At the time of adoption of IFRS 16, we expect to recognize right-of-use assets of approximately \$500 and lease liabilities of approximately \$600 on our Consolidated Statements of Financial Position. Together with the derecognition of deferred balances previously recognized under IAS 17, the overall impact to retained earnings is not expected to be material.

In June 2017, the IASB issued IFRIC 23 *Uncertainty over Income Tax Treatments* ("IFRIC 23"), which was developed by the IFRS Interpretations Committee. IFRIC 23 clarifies how to apply the recognition and measurement requirements in IAS 12 *Income Taxes* ("IAS 12"), when there is uncertainty over income tax treatments, and requires an entity to determine whether tax treatments should be considered collectively or independently. In addition, IFRIC 23 addresses the assumptions an entity should make about the examination of tax treatments by taxation authorities, as well as how an entity should consider changes in facts and circumstances. IFRIC 23 also provides guidance on how to determine taxable profit (tax loss), tax bases, unused tax losses, unused tax credits, and tax rates, based on whether it is probable that a tax authority will accept an uncertain tax treatment used, or proposed to be used, by an entity in its income tax filings. IFRIC 23 is effective for annual periods beginning on or after January 1, 2019 and is to be applied retrospectively, or on a cumulative retrospective basis. We do not expect IFRIC 23 to have a material impact on our Consolidated Financial Statements.

In October 2017, the IASB issued narrow-scope amendments to IAS 28. The amendments clarify that long-term interests in an associate or joint venture to which the equity method is not applied should be accounted for following the requirements of IFRS 9. The amendments are effective for annual periods beginning on or after January 1, 2019, and are to be applied retrospectively with certain exceptions. As we will not adopt IFRS 9 until 2021, we will be required to apply IAS 39 to the long-term interests in associates or joint ventures covered by these amendments. We do not expect the adoption of these amendments to have a material impact on our Consolidated Financial Statements.

In December 2017, the IASB issued *Annual Improvements to IFRSs 2015-2017 Cycle*, which includes minor amendments to four IFRS standards. The amendments are effective for annual periods beginning on or after January 1, 2019. We do not expect the adoption of these amendments to have a material impact on our Consolidated Financial Statements.

In February 2018, the IASB issued *Plan Amendment, Curtailment or Settlement* which amends IAS 19 *Employee Benefits* ("IAS 19"). Under IAS 19, when an amendment, curtailment or settlement of a defined benefit pension plan occurs, the net defined benefit liability or asset is remeasured. The amendments require an entity to use the updated assumptions from this remeasurement to determine current service cost and net interest for reporting periods after the change to the plan. The amendments are applicable to plan amendments, curtailments or settlements occurring on or after January 1, 2019.

2.C New and Amended International Financial Reporting Standards to be Adopted in 2020 or Later

The following new and amended standards were issued by the IASB and are expected to be adopted by us in 2020 or later.

In July 2014, the IASB issued the final version of IFRS 9, which replaces IAS 39. IFRS 9 includes guidance on the classification and measurement of financial instruments, impairment of financial assets, and hedge accounting. Financial asset classification is based on the cash flow characteristics and the business model in which an asset is held. The classification determines how a financial instrument is accounted for and measured. IFRS 9 also introduces an impairment model for financial instruments not measured at fair value through profit or loss that requires recognition of expected losses at initial recognition of a financial instrument and the recognition of full lifetime expected losses if certain criteria are met. In addition, a new model for hedge accounting was introduced to achieve better alignment with risk management activities. This standard is effective for annual periods beginning on or after January 1, 2018. In October 2017, the IASB issued narrow-scope amendments to IFRS 9. The amendments clarify the classification of certain prepayable financial assets and the accounting of financial liabilities following modification. The amendments are effective for annual periods beginning on or after January 1, 2019. However, pursuant to the aforementioned amendments to IFRS 4, we elected the deferral approach permitted under IFRS 4 to continue to apply IAS 39. We are currently assessing the impact that IFRS 9, along with these amendments, will have on our Consolidated Financial Statements.

In May 2017, the IASB issued IFRS 17, which replaces IFRS 4. IFRS 17 establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts. IFRS 17 requires entities to measure insurance contract liabilities at their current fulfillment values using one of three measurement models, depending on the nature of the contract. IFRS 17 is effective for annual periods beginning on or after January 1, 2021 and is to be applied retrospectively to each group of insurance contracts unless impracticable. If, and only if, it is impracticable to apply IFRS 17 retrospectively for a group of insurance contracts, an entity shall apply IFRS 17 using a modified retrospective approach or a fair value approach. In November 2018, the IASB tentatively decided to defer the effective date of IFRS 17 by one year, to January 1, 2022. IFRS 17 will affect how we account for our insurance contracts and how we report our financial performance in our Consolidated Statements of Operations. We are currently assessing the impact that IFRS 17 will have on our Consolidated Financial Statements.

In March 2018, the IASB issued a revised *Conceptual Framework for Financial Reporting* ("2018 Conceptual Framework"), which replaces the *Conceptual Framework for Financial Reporting* issued in

2010. The 2018 Conceptual Framework includes revised definitions of an asset and a liability, as well as new guidance on measurement, derecognition, presentation and disclosure. The 2018 Conceptual Framework is effective for annual periods beginning on or after January 1, 2020. We are currently assessing the impact the adoption of this framework will have on our Consolidated Financial Statements.

In October 2018, the IASB issued *Definition of a Business*, which amends IFRS 3 *Business Combinations*. The amendments clarify the definition of a business to assist entities in determining whether a transaction represents a business combination or an acquisition of assets. The amendments are effective for annual periods beginning on or after January 1, 2020, to be applied prospectively. We will assess the impact the adoption of these amendments will have on the accounting treatment of future transactions.

In October 2018, the IASB issued *Definition of Material (Amendments to IAS 1 and IAS 8)*. The amendments clarify the definition of material and provide guidance to improve consistency in its application in IFRS standards. The amendments are effective for annual periods beginning on or after January 1, 2020. We are currently assessing the impact the adoption of these amendments will have on our Consolidated Financial Statements.

3. Acquisitions

Acquisition in Sun Life Financial Asia

On October 3, 2017, we completed the first stage of our acquisition of the pension business of FWD Life Insurance Company (Bermuda) Limited ("FWD") for total consideration of approximately \$105, consisting of \$92 initial cash consideration and estimated contingent consideration of \$13 to be paid if certain future performance targets are achieved. The first stage included the acquisition of the Mandatory Provident Fund business and the commencement of an exclusive 15-year distribution agreement with FWD that allows Sun Life Hong Kong Limited to distribute its pension products through FWD's agency force in Hong Kong. The fair value of the net identifiable assets acquired in the transaction was \$89, which included intangible assets of \$61 and a related deferred tax liability of \$10. The acquired intangible assets consist of client relationships and distribution intangible assets which are subject to amortization on a straight-line basis over their projected economic life of 30 years and 15 years, respectively. We recognized goodwill of \$16 as a result of this transaction. The completion of the second and final stage of the transaction involves the purchase of the Occupational Retirement Schemes Ordinance business of FWD, and is expected to close by the end of 2019, subject to the receipt of regulatory approvals and satisfaction of customary closing conditions. These transactions will strengthen our position in the Hong Kong pension market and will be reported in our Sun Life Financial Asia ("SLF Asia") reportable segment.

4. Segmented Information

We have four reportable segments: Sun Life Financial Canada ("SLF Canada"), SLF U.S., SLF Asia and Corporate.

These reportable segments operate in the financial services industry and reflect our management structure and internal financial reporting. Corporate includes the results of our U.K. business unit ("SLF U.K.") and our Corporate Support operations, which include run-off reinsurance operations as well as investment income, expenses, capital, and other items not allocated to our other business groups.

Effective the first quarter of 2018, a change in the organizational and reporting structure resulted in the International business unit being transferred from the SLF U.S. reportable segment to the SLF Asia reportable segment. Consequently, approximately \$10,000 of insurance contract liabilities pertaining to individual non-participating life and health policies transferred from SLF U.S. to SLF Asia, along with the associated assets. The information reported to the Chief Operating Decision Maker now includes the results of the International business unit in the SLF Asia reporting package and the segmental information presented in these

Consolidated Financial Statements now includes the results of the International business unit in the SLF Asia reportable segment. In accordance with IFRS 8 *Operating Segments*, the segmental information for prior reporting periods has been restated to conform with current period presentation.

Revenues from our reportable segments are derived principally from life and health insurance and annuities. Revenues not attributed to the strategic business units are derived primarily from Corporate investments and earnings on capital. Transactions between segments are executed and priced on an arm's-length basis in a manner similar to transactions with third parties.

The expenses in each business segment may include costs or services directly incurred or provided on their behalf at the enterprise level. For other costs not directly attributable to one of our business segments, we use a management reporting framework that uses assumptions, judgments, and methodologies for allocating overhead costs, and indirect expenses to our business segments.

Intersegment transactions consist primarily of internal financing agreements which are measured at fair values prevailing when the arrangements are negotiated. Intersegment investment income consists primarily of interest paid by SLF U.S. to Corporate. Intersegment transactions are presented in the Consolidation adjustments column in the following tables.

Management considers its external clients to be individuals and corporations. We are not reliant on any individual client as none is individually significant to our operations.

Results by segment for the years ended December 31, are as follows:

	SLF Canada	SLF U.S. ⁽¹⁾	SLF Asia ⁽¹⁾	Corporate	Consolidation adjustments	Total
2018						
Gross premiums:						
Annuities	\$ 3,261	\$ —	\$ 1	\$ (85)	\$ —	\$ 3,177

(1) Balances in 2017 have been changed to conform with current year presentation as a result of the resegmentation described in this Note.

Assets and liabilities by segment are as follows:

	SLF Canada	SLF U.S. ⁽¹⁾	SLF Asia ⁽¹⁾	Corporate	Consolidation adjustments	Total
As at December 31, 2018						
Total general fund assets	\$ 84,069	\$ 39,627	\$ 28,855	\$ 12,357	\$ 90	\$ 164,998
Investments for account of segregated fund holders	\$ 85,885	\$ 443	\$ 6,173	\$ 10,513	\$ —	\$ 103,014
Total general fund liabilities	\$ 78,932	\$ 36,245	\$ 23,692	\$ 8,072	\$ 90	\$ 147,031
As at December 31, 2017						
Total general fund assets	\$ 82,058	\$ 37,111	\$ 27,234	\$ 13,105	\$ 74	\$ 159,582
Investments for account of segregated fund holders	\$ 87,817	\$ 437	\$ 6,101	\$ 11,986	\$ —	\$ 106,341
Total general fund liabilities	\$ 76,677	\$ 34,945	\$ 21,748	\$ 9,199	\$ 74	\$ 142,643

⁽¹⁾ Balances in 2017 have been changed to conform with current year presentation as a result of the resegmentation described in this Note.

The revenue and assets of our reportable segments differ from geographic segments primarily due to the geographic segmenting of our Corporate segment.

The following table shows revenue by country for Corporate:

For the years ended December 31,	2018	2017
Revenue:		
United States	\$ 103	\$ 186
United Kingdom	142	577
Canada	14	4
Other countries	1	8
Total revenue	\$ 260	\$ 775

The following table shows total assets by country for Corporate:

As at December 31,	2018	2017
Total general fund assets:		
United States	\$ 1,895	\$ 1,914
United Kingdom	8,274	8,744
Canada	2,018	2,293
Other countries	170	154
Total general fund assets	\$ 12,357	\$ 13,105
Investment for account of segregated fund holders:		
United Kingdom	\$ 10,513	\$ 11,986
Total investment for account of segregated fund holders	\$ 10,513	\$ 11,986

5. Total Invested Assets and Related Net Investment Income

5.A Fair Value of Invested Assets

5.A.i Carrying Value and Fair Value of Financial Assets

The carrying values and fair values of our financial assets are shown in the following table:

As at	December 31, 2018		December 31, 2017	
	Carrying value	Fair value	Carrying value	Fair value
Assets				
Cash, cash equivalents and short-term securities	\$ 5,357	\$ 5,357	\$ 5,351	\$ 5,351
Debt securities – fair value through profit or loss	61,268	61,268	59,788	59,788
Debt securities – available-for-sale	9,422	9,422	9,067	9,067
Equity securities – fair value through profit or loss	4,014	4,014	5,078	5,078
Equity securities – available-for-sale	576	576	902	902
Mortgages and loans	46,623	48,237	42,627	45,229
Derivative assets	1,106	1,106	1,476	1,476
Other invested assets – fair value through profit or loss ⁽¹⁾	2,210	2,210	1,785	1,785
Other invested assets – available-for-sale ⁽¹⁾	600	600	541	541
Policy loans	3,204	3,204	3,086	3,086
Total financial assets⁽²⁾	\$ 134,380	\$ 135,994	\$ 129,701	\$ 132,303

⁽¹⁾ Other invested assets (FVTPL and AFS) include our investments in segregated funds, mutual funds, and limited partnerships.

⁽²⁾ Invested assets on our Consolidated Statements of Financial Position of \$143,040 (\$138,145 as at December 31, 2017) includes Total financial assets in this table, Investment properties of \$7,157 (\$7,067 as at December 31, 2017), and Other invested assets – non-financial assets of \$1,503 (\$1,377 as at December 31, 2017).

Derivative liabilities with a fair value of \$2,123 (\$1,995 as at December 31, 2017) are also included on the Consolidated Statements of Financial Position.

Our mortgages and loans are generally carried at amortized cost. The fair value of mortgages and loans, for disclosure purposes, is determined based on the methodology and assumptions described in Note 5.A.ii. As at December 31, 2018, \$40,533 and \$7,704 are categorized in Level 2 and Level 3, respectively, of the fair value hierarchy, described in this Note (\$38,424 and \$6,805 as at December 31, 2017).

Policy loans are carried at their unpaid principal balances. The fair value of policy loans, for disclosure purposes, is approximated by their carrying value, as policy loans are fully secured by policy values on which the loans are made and are categorized in Level 2 of the fair value hierarchy.

5.A.ii Fair Value Methodologies and Assumptions

The fair value of government and corporate debt securities is determined using quoted prices in active markets for identical or similar securities. When quoted prices in active markets are not available, fair value is determined using market standard valuation methodologies, which include discounted cash flow analysis, consensus pricing from various broker dealers that are typically the market makers, or other similar techniques. The assumptions and valuation inputs in applying these market standard valuation methodologies are determined primarily using observable market inputs, which include, but are not limited to, benchmark yields, reported trades of identical or similar instruments, broker-dealer quotes, issuer spreads, bid prices, and reference data including market research publications. In limited circumstances, non-binding broker quotes are used.

The fair value of asset-backed securities is determined using quoted prices in active markets for identical or similar securities, when available, or valuation methodologies and valuation inputs similar to those used for government and corporate debt securities. Additional valuation inputs include structural characteristics of the securities, and the underlying collateral performance, such as prepayment speeds and delinquencies. Expected prepayment speeds are based primarily on those previously experienced in the market at

projected future interest rate levels. In instances where there is a lack of sufficient observable market data to value the securities, non-binding broker quotes are used.

The fair value of equity securities is determined using quoted prices in active markets for identical securities or similar securities. When quoted prices in active markets are not available, fair value is determined using equity valuation models, which include discounted cash flow analysis and other techniques that involve benchmark comparison. Valuation inputs primarily include projected future operating cash flows and earnings, dividends, market discount rates, and earnings multiples of comparable companies.

The fair value of mortgages and loans is determined by discounting the expected future cash flows using a current market interest rate applicable to financial instruments with a similar yield, credit quality, and maturity characteristics. Valuation inputs typically include benchmark yields and risk-adjusted spreads from current lending activities or loan issuances. The risk-adjusted spreads are determined based on the borrower's credit and liquidity, as well as term and other loan-specific features. Long-term mortgages and loans are generally categorized in Level 3 of the fair value hierarchy. The significant unobservable input is a portion of these risk-adjusted spreads at or beyond the 20-year point for mortgages and at or beyond the 10-year point for loans.

The fair value of derivative financial instruments depends upon derivative types. The fair value of exchange-traded futures and options is determined using quoted prices in active markets, while the fair value of over-the-counter ("OTC") derivatives is determined using pricing models, such as discounted cash flow analysis or other market standard valuation techniques, with primarily observable market inputs. Valuation inputs used to price OTC derivatives may include swap interest rate curves, foreign exchange spot and forward rates, index prices, the value of underlying securities, projected dividends, volatility surfaces, and in limited circumstances, counterparty quotes. The fair value of OTC derivative financial instruments also includes credit valuation adjustments to reflect the credit risk of both the derivative counterparty and ourselves as well as the impact of contractual factors designed to reduce our credit exposure, such as collateral and legal rights of offset under master netting agreements. Inputs into determining the appropriate credit valuation adjustments are typically obtained from publicly available information and include credit default swap spreads when available, credit spreads derived from specific bond yields, or published cumulative default experience data adjusted for current trends when credit default swap spreads are not available.

The fair value of other invested assets is determined using quoted prices in active markets for identical securities or similar securities. When quoted prices in active markets are not available, fair value is determined using equity valuation models, which include discounted cash flow analysis and other techniques that involve benchmark comparison. Valuation inputs primarily include projected future operating cash flows and earnings, dividends, market discount rates, and earnings multiples of comparable companies.

The fair value of investment properties is generally determined using property valuation models that are based on expected capitalization rates and models that discount expected future net cash flows at current market interest rates reflective of the characteristics, location, and market of each property. Expected future net cash flows include contractual and projected cash flows and forecasted operating expenses, and take into account interest, rental, and occupancy rates derived from market surveys. The estimates of future cash inflows in addition to expected rental income from current leases, include projected income from future leases based on significant assumptions that are consistent with current market conditions. The future rental rates are estimated based on the location, type, and quality of the properties, and take into account market data and projections at the valuation date. The fair values are typically compared to market-based information for reasonability, including recent transactions involving comparable assets. The methodologies and inputs used in these models are in accordance with real estate industry valuation standards. Valuations are prepared externally or internally by professionally accredited real estate appraisers.

The fair value of short-term securities is approximated by their carrying amount, adjusted for credit risk where appropriate.

The fair value of investments for account of segregated fund holders is determined using quoted prices in active markets or independent valuation information provided by investment managers. The fair value of direct investments within investments for account of segregated fund holders, such as short-term securities and government and corporate debt securities, is determined according to valuation methodologies and inputs described above in the respective asset type sections.

The methodologies and assumptions for determining the fair values of investment contract liabilities are included in Note 10.B.

5.A.iii Fair Value Hierarchy

We categorize our assets and liabilities carried at fair value, based on the priority of the inputs to the valuation techniques used to measure fair value, into a three-level fair value hierarchy as follows:

Level 1: Fair value is based on the unadjusted quoted prices for identical assets or liabilities in an active market. The types of assets and liabilities classified as Level 1 generally include cash and cash equivalents, certain U.S. government and agency securities, exchange-traded equity securities, and certain segregated and mutual fund units held for account of segregated fund holders.

Level 2: Fair value is based on quoted prices for similar assets or liabilities traded in active markets, or prices from valuation techniques that use significant observable inputs, or inputs that are derived principally from or corroborated with observable market data through correlation or other means. The types of assets and liabilities classified as Level 2 generally include Canadian federal, provincial and municipal government, other foreign government and corporate debt securities, certain asset-backed securities, OTC derivatives, and certain segregated and mutual fund units held for account of segregated fund holders.

Level 3: Fair value is based on valuation techniques that require one or more significant inputs that are not based on observable market inputs. These unobservable inputs reflect our expectations about the assumptions market participants would use in pricing the asset or liability. The types of assets and liabilities classified as Level 3 generally include certain corporate bonds, certain other invested assets, and investment properties.

Our assets and liabilities that are carried at fair value on a recurring basis by hierarchy level are as follows:

As at	December 31, 2018				December 31, 2017			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Assets

(1) Included in Net investment income (loss) for Total invested assets measured at fair value in our Consolidated Statements of Operations.

(2) Transfers into Level 3 occur when the inputs used to price the assets and liabilities lack observable market data, and as a result, no longer meet the Level 1 or 2 definitions at the reporting date. Transfers out of Level 3 occur when the pricing inputs become more transparent and satisfy the Level 1 or 2 criteria and are primarily the result of observable market data being available at the reporting date, thus removing the requirement to rely on inputs that lack observability.

(3) Total gains and losses in net income (loss) and OCI are calculated assuming transfers into or out of Level 3 occur at the beginning of the period. For an asset or liability that transfers into Level 3 during the reporting period, the entire change in

fair value for the period is included in the table above. For transfers out of Level 3 during the reporting period, the change in fair value for the period is excluded from the table above.

- (4) Foreign currency translation relates to the foreign exchange impact of translating Level 3 assets and liabilities of foreign subsidiaries from their functional currencies to Canadian dollars.
- (5) Investment properties included in net income is comprised of fair value changes on investment properties of \$526 (\$209 in 2017) net of amortization of leasing commissions and tenant inducements of \$89 (\$53 in 2017).
- (6) Transfers into Level 3 in Investment properties includes the reclassification of our former head office location in 2017, previously classified as owner-occupied with a fair value of \$259 at the time of transfer from Other assets to Investment properties. The reclassification recognized a revaluation surplus of \$172, which was recorded as an increase of \$139 of accumulated other comprehensive income, net of taxes of \$33.

Unobservable Inputs and Sensitivity for Level 3 Assets

Our assets categorized in Level 3 of the fair value hierarchy are primarily Investment properties, Debt securities, and Other invested assets.

The fair value of Investment properties is determined by using the discounted cash flows methodology as described in Note 5.A.ii. The key unobservable inputs used in the valuation of investment properties as at December 31, 2018 include the following:

- **Estimated rental value:** The estimated rental value is based on contractual rent and other local market lease transactions net of reimbursable operating expenses. An increase (decrease) in the estimated rental value would result in a higher (lower) fair value. The estimated rental value varies depending on the property types, which include retail, office, and industrial properties. The estimated rental value (in dollars, per square foot, per annum) ranges from \$12.00 to \$76.00 for retail and office properties and from \$3.00 to \$11.00 for industrial properties.
- **Rental growth rate:** The rental growth rate is typically estimated based on expected market behaviour, which is influenced by the type of property and geographic region of the property. An increase (decrease) in the rental growth rate would result in a higher (lower) fair value. The rental growth rate (per annum) ranges from 0.00% to 3.00%.
- **Long-term vacancy rate:** The long-term vacancy rate is typically estimated based on expected market behaviour, which is influenced by the type of property and geographic region of the property. An increase (decrease) in the long-term vacancy rate would result in a lower (higher) fair value. The long-term vacancy rate ranges from 2.00% to 10.00%.
- **Discount rate:** The discount rate is derived from market activity across various property types and geographic regions and is a reflection of the expected rate of return to be realized on the investment over the next 10 years. An increase (decrease) in the discount rate would result in a lower (higher) fair value. The discount rate ranges from 4.00% to 10.25%.
- **Terminal capitalization rate:** The terminal capitalization rate is derived from market activity across various property types and geographic regions and is a reflection of the expected rate of return to be realized on the investment over the remainder of its life after the 10-year period. An increase (decrease) in the terminal capitalization rate would result in a lower (higher) fair value. The terminal capitalization rate ranges from 4.25% to 8.75%.

Changes in the estimated rental value are positively correlated with changes in the rental growth rate. Changes in the estimated rental value are negatively correlated with changes in the long-term vacancy rate, the discount rate, and the terminal capitalization rate.

Our Debt securities categorized in Level 3, which are included in Debt securities – FVTPL and Debt securities – AFS in the Level 3 roll forward table, consist primarily of corporate bonds. The fair value of these corporate bonds is generally determined using broker quotes that cannot be corroborated with observable market transactions. Significant unobservable inputs for these corporate bonds would include issuer spreads, which are comprised of credit, liquidity, and other security-specific features of the bonds. An increase (decrease) in these issuer spreads would result in a lower (higher) fair value. Due to the unobservable nature of these broker quotes, we do not assess whether applying reasonably possible alternative assumptions would have an impact on the fair value of the Level 3 corporate bonds. The majority of our debt securities categorized in Level 3 are FVTPL assets supporting insurance contract

liabilities. Changes in the fair value of these assets supporting insurance contract liabilities are largely offset by changes in the corresponding insurance contract liabilities under CALM. As a result, though using reasonably possible alternative assumptions may have an impact on the fair value of the Level 3 debt securities, it would not have a significant impact on our Consolidated Financial Statements.

The Other invested assets categorized in Level 3, which are included in Other invested assets – FVTPL and Other invested assets – AFS in the Level 3 roll forward table, consists primarily of limited partnership investments. The fair value of our limited partnership investments are based on net asset value (“NAV”) provided by management of the limited partnership investments. Based on the unobservable nature of these NAVs, we do not assess whether applying reasonably possible alternative assumptions would have an impact on the fair value of the Level 3 limited partnership investments.

Valuation Process for Level 3 Assets

Our assets categorized in Level 3 of the fair value hierarchy are primarily Investment properties, Debt securities, and limited partnership investments included in Other invested assets. Our valuation processes for these assets are as follows:

The fair value of Investment properties are based on the results of appraisals performed annually and reviewed quarterly for material changes. The valuation methodology used to determine the fair value is in accordance with the standards of the Appraisal Institute of Canada, the U.S., and the U.K. Investment properties are appraised externally at least once every three years. Investment properties not appraised externally in a given year are reviewed by qualified appraisers. A management committee, including investment professionals, reviews the fair value of Investment properties for overall reasonability.

The fair value of Debt securities is generally obtained by external pricing services. We obtain an understanding of inputs and valuation methods used by external pricing services. When fair value cannot be obtained from external pricing services, broker quotes, or internal models subject to detailed review and validation processes are used. The fair value of debt securities is subject to price validation and review procedures to ensure overall reasonability.

The fair value of limited partnership investments, included in Other invested assets, is based on NAV. The financial statements used in calculating the NAV are generally audited annually. We review the NAV of the limited partnership investments and perform analytical and other procedures to ensure the fair value is reasonable.

5.B Interest and Other Investment Income

Interest and other investment income consist of the following:

For the years ended December 31,	2018	2017
Interest income:		
Cash, cash equivalents and short-term securities	\$ 89	\$ 48
Debt securities – fair value through profit or loss	2,307	2,287
Debt securities – available-for-sale	272	258
Mortgages and loans	2,042	1,921
Derivative investments	46	71
Policy loans	174	164
Total interest income	4,930	4,749
Equity securities – dividends on fair value through profit or loss	161	159
Equity securities – dividends on available-for-sale	14	15
Investment properties rental income ⁽¹⁾	608	632
Investment properties expenses	(282)	(295)
Other income	244	228
Investment expenses and taxes	(206)	(196)
Total interest and other investment income	\$ 5,469	\$ 5,292

⁽¹⁾ Comprised of operating lease rental income.

5.C Fair Value and Foreign Currency Changes on Assets and Liabilities

Fair value and foreign currency changes on assets and liabilities recorded to net income consist of the following:

For the years ended December 31,	2018	2017
Fair value change:		
Cash, cash equivalents and short-term securities	\$ 8	\$ 1
Debt securities	(2,698)	1,626
Equity securities	(401)	441
Derivative investments	(1,318)	684
Other invested assets	39	(4)
Total change in fair value through profit or loss assets and liabilities	(4,370)	2,748
Fair value changes on investment properties	526	209
Foreign exchange gains (losses) ⁽¹⁾	453	(399)
Realized gains (losses) on property and equipment ⁽²⁾	28	—
Fair value and foreign currency changes on assets and liabilities	\$ (3,363)	\$ 2,558

⁽¹⁾ Primarily arises from the translation of foreign currency denominated AFS monetary assets and mortgage and loans. Any offsetting amounts arising from foreign currency derivatives are included in the fair value change on derivative investments.

⁽²⁾ In 2018, we sold and leased back a property in Waterloo, Ontario. The transaction qualified as a sale and operating lease and as a result, we recognized a gain of \$28.

5.D Cash, Cash Equivalents and Short-Term Securities

Cash, cash equivalents and short-term securities presented in our Consolidated Statements of Financial Position and Net cash, cash equivalents and short-term securities presented in our Consolidated Statements of Cash Flows consist of the following:

As at December 31,	2018	2017
Cash	\$ 879	\$ 863
Cash equivalents	2,641	2,408
Short-term securities	1,837	2,080
Cash, cash equivalents and short-term securities	5,357	5,351
Less: Bank overdraft, recorded in Other liabilities	104	140
Net cash, cash equivalents and short-term securities	\$ 5,253	\$ 5,211

5.E Derivative Financial Instruments and Hedging Activities

The fair values of derivative financial instruments by major class of derivatives are as follows:

As at December 31,	2018		2017	
	Fair value		Fair value	
	Assets	Liabilities	Assets	Liabilities
Interest rate contracts	\$ 921	\$ (325)	\$ 1,188	\$ (814)
Foreign exchange contracts	129	(1,764)	176	(1,177)
Other contracts	56	(34)	112	(4)
Total derivatives	\$ 1,106	\$ (2,123)	\$ 1,476	\$ (1,995)

The following table presents the fair values of derivative assets and liabilities categorized by type of hedge for accounting purposes and derivative investments:

As at December 31,	2018			2017		
	Total notional amount	Fair value		Total notional amount	Fair value	
		Assets	Liabilities		Assets	Liabilities
Derivative investments ⁽¹⁾	\$ 58,020	\$ 1,095	\$ (2,113)	\$ 53,065	\$ 1,437	\$ (1,995)
Fair value hedges	147	—	(2)	91	2	—
Cash flow hedges	151	11	(8)	132	37	—
Total derivatives	\$ 58,318	\$ 1,106	\$ (2,123)	\$ 53,288	\$ 1,476	\$ (1,995)

(1) Derivative investments are derivatives that have not been designated as hedges for accounting purposes.

We did not have any net investment hedges in 2018 or 2017.

Hedge ineffectiveness recognized in Interest and other investment income consists of the following:

For the years ended December 31,	2018	2017
Fair value hedging ineffectiveness:		
Gains (losses) on the hedged items attributable to the hedged risk	\$ 4	\$ (8)
Gains (losses) on the hedging derivatives	(4)	8
Net ineffectiveness on fair value hedges	\$ —	\$ —

For cash flow hedges, we had hedge ineffectiveness of \$1 in 2018 (\$3 in 2017). We expect to reclassify a loss of \$2 from accumulated OCI to net income within the next 12 months that relates to cash flow hedges of anticipated award payments under certain share-based payment plans that are expected to occur in 2019, 2020 and 2021. The reclassification of accumulated OCI to income relating to these foreign currency forwards occurs upon disposal or impairment of the foreign operation.

5.F Transfers of Financial Assets

We enter into transactions, including mortgage securitization, repurchase agreements and securities lending, where we transfer financial assets while retaining the risks and rewards of ownership of the assets. These transferred financial assets are not derecognized and remain on our Consolidated Statements of Financial Position. The carrying value of the transferred assets and the associated liabilities are described in the sections below.

5.F.i Mortgage Securitization

We securitize certain insured fixed rate commercial mortgages through the creation of mortgage-backed securities under the National Housing Act Mortgage-Backed Securities ("NHA MBS") Program sponsored by the Canada Mortgage and Housing Corporation ("CMHC"). The NHA MBS are then sold to Canada Housing Trust, a government-sponsored security trust that issues securities to third-party investors under the Canadian Mortgage Bond ("CMB") program. The securitization of these assets does not qualify for derecognition as we have not transferred substantially all of the risks and rewards of ownership. Specifically, we continue to be exposed to pre-payment and interest rate risk associated with these assets. There are no expected credit losses on the securitized mortgages, as the mortgages were already insured by the CMHC prior to securitization. These assets continue to be recognized as Mortgages and loans in our Consolidated Statements of Financial Position. Proceeds from securitization transactions are recognized as secured borrowings and included in Other liabilities in our Consolidated Statements of Financial Position.

Receipts of principal on the securitized mortgages are deposited into a principal reinvestment account ("PRA") to meet our repayment obligation upon maturity under the CMB program. The assets in the PRA are typically comprised of cash and cash equivalents and certain asset-backed securities. We are exposed to reinvestment risk due to the amortizing nature of the securitized mortgages relative to our repayment

obligation for the full principal amount due at maturity. We mitigate this reinvestment risk using interest rate swaps.

The carrying value and fair value of the securitized mortgages as at December 31, 2018 are \$1,328 and \$1,318, respectively (\$1,283 and \$1,267 as at December 31, 2017). The carrying value and fair value of the associated liabilities as at December 31, 2018 are \$1,453 and \$1,446, respectively (\$1,355 and \$1,346 as at December 31, 2017). The carrying value of asset-backed securities in the PRA as at December 31, 2018 and 2017 are \$124 and \$75, respectively. There are no cash and cash equivalents in the PRA as at December 31, 2018 and 2017.

The fair value of the secured borrowings from mortgage securitization is based on the methodologies and assumptions for asset-backed securities described in Note 5.A.ii. The fair value of these liabilities is categorized in Level 2 of the fair value hierarchy as at December 31, 2018 and 2017.

5.F.ii Repurchase Agreements

We enter into repurchase agreements for operational funding and liquidity purposes. Repurchase agreements have maturities ranging from 7 to 365 days, averaging 127 days, and bear interest at an average rate of 1.92% as at December 31, 2018 (1.25% as at December 31, 2017). The carrying values of the transferred assets and the obligations related to their repurchase, which approximate their fair values, are \$1,824 as at December 31, 2018 (\$1,976 as at December 31, 2017). These liabilities are categorized in Level 2 of the fair value hierarchy. Collateral primarily consists of cash and cash equivalents as well as government guaranteed securities. Details on the collateral pledged are included in Note 6.A.ii.

5.F.iii Securities Lending

The Company engages in securities lending to generate additional income. Certain securities from its portfolio are lent to other institutions for short periods. Collateral exceeding the fair value of the securities lent is deposited by the borrower with a lending agent, usually a securities custodian, and maintained by the lending agent until the underlying security has been returned to us. The fair value of the securities lent is monitored on a daily basis with additional collateral obtained or refunded as the fair values fluctuate. Collateral primarily consists of Canadian federal and provincial government securities and cash and cash equivalents. Certain arrangements allow us to invest the cash collateral received for the securities lent. The carrying values of the securities lent approximate their fair values. The carrying values of the securities lent and the related collateral held are \$2,217 and \$2,338 as at December 31, 2018 (\$1,467 and \$1,546 as at December 31, 2017).

6. Financial Instrument Risk Management

The significant risks related to financial instruments are credit risk, market risk (including equity risk, interest rate and spread risk, and foreign currency risk) and liquidity risk. The following sections describe how we manage these risks.

We use derivative instruments to manage market risks related to equity market, interest rate and currency fluctuations and in replication strategies for permissible investments. We do not engage in speculative investment in derivatives. The gap in market sensitivities or exposures between liabilities and supporting assets is monitored and managed within defined tolerance limits, by using derivative instruments, where appropriate. We use models and techniques to measure the effectiveness of our risk management strategies.

6.A Credit Risk

Risk Description

Credit risk is the possibility of loss from amounts owed by our borrowers or financial counterparties. We are subject to credit risk in connection with issuers of securities held in our investment portfolio, debtors,

structured securities, reinsurers, counterparties (including derivative, repurchase agreement and securities lending counterparties), other financial institutions and other entities. Losses may occur when a counterparty fails to make timely payments pursuant to the terms of the underlying contractual arrangement or when the counterparty's credit rating or risk profile otherwise deteriorates. Credit risk can also arise in connection with deterioration in the value of, or ability to realize, any underlying security that may be used as collateral for the debt obligation. Credit risk can occur as a result of broad economic conditions, challenges within specific sectors of the economy, or from issues affecting individual companies. Events that result in defaults, impairments or downgrades of the securities in our investment portfolio would cause the Company to record realized or unrealized losses and may cause an increase in our provisions for asset default, adversely impacting earnings.

Credit Risk Management Governance and Control

We rate fixed income investments primarily through the use of internally developed scorecards which combine an estimated probability of default and loss given default to determine an expected loss and credit risk rating. This rating is expressed using a 22-point scale that is generally consistent with those used by external rating agencies, and is based on detailed examination of the borrower's, or issuer's, credit quality and the characteristics of the specific instrument. The probability of default assessment is based on borrower-level or issuer-level analysis, which encompasses an assessment of industry risk, business strategy, competitiveness, strength of management and other financial information. The loss given default assessment is based on instrument-level analysis, which considers the impact of guarantees, covenants, liquidity and other structural features. These scorecards provide input to stochastic value-at-risk models and are used to stress test the portfolio, which provide insight into the distribution and characteristics of credit risk within our portfolios. In accordance with our policies and under normal circumstances, our ratings cannot be higher than the highest rating provided by certain Nationally Recognized Statistical Rating Organizations ("NRSROs"). Certain assets, including those in our sovereign debt and asset-backed securities portfolios, are assigned a rating based on ratings provided by NRSROs using a priority sequence order of Standard & Poor's, Moody's, Fitch and DBRS Limited.

We employ a wide range of credit risk management practices and controls, as outlined below:

- Credit risk governance practices are in place, including independent monitoring and review and reporting to senior management and the Risk & Conduct Review Committee.
- Risk appetite limits have been established for credit risk.
- Income and regulatory capital sensitivities are monitored, managed and reported against pre-established risk limits.
- Comprehensive Investment and Credit Risk Management Policy, guidelines and practices are in place.
- Specific investment diversification requirements are in place, such as defined investment limits for asset class, geography, and industry.
- Risk-based credit portfolio, counterparty, and sector exposure limits have been established.
- Mandatory use of credit quality ratings for portfolio investments has been established and is reviewed regularly. These internal rating decisions for new fixed income investments and ongoing review of existing rating decisions are independently adjudicated by Corporate Risk Management.
- Comprehensive due diligence processes and ongoing credit analyses are conducted.
- Regulatory solvency requirements include risk-based capital requirements and are monitored regularly.
- Comprehensive compliance monitoring practices and procedures including reporting against pre-established investment limits are in place.
- Reinsurance exposures are monitored to ensure that no single reinsurer represents an undue level of credit risk.
- Stress-testing techniques, such as Dynamic Capital Adequacy Testing ("DCAT"), are used to measure the effects of large and sustained adverse credit developments.
- Insurance contract liabilities are established in accordance with Canadian actuarial standards of practice.

- Internal capital targets are established at an enterprise level to cover all risks and are above minimum regulatory and supervisory levels. Actual capital levels are monitored to ensure they exceed internal targets.

6.A.i Maximum Exposure to Credit Risk

Our maximum credit exposure related to financial instruments as at December 31 is the balance as presented in our Consolidated Statements of Financial Position as we believe that these carrying amounts best represent the maximum exposure to credit risk. The credit exposure for debt securities may be increased to the extent that the amounts recovered from default are insufficient to satisfy the actuarial liability cash flows that the assets are intended to support.

The positive fair value of derivative assets is used to determine the credit risk exposure if the counterparties were to default. The credit risk exposure is the cost of replacing, at current market rates, all derivative contracts with a positive fair value. Additionally, we have credit exposure to items not on the Consolidated Statements of Financial Position as follows:

As at December 31,	2018	2017
Off-balance sheet items:		
Loan commitments ⁽¹⁾	\$ 2,443	\$ 1,716
Guarantees	—	12
Total off-balance sheet items	\$ 2,443	\$ 1,728

⁽¹⁾ Loan commitments include commitments to extend credit under commercial and multi-family residential mortgages and private debt securities not quoted in an active market. Commitments on debt securities contain provisions that allow for withdrawal of the commitment if there is deterioration in the credit quality of the borrower.

6.A.ii Right of Offset and Collateral

We invest in financial assets which may be secured by real estate properties, pools of financial assets, third-party financial guarantees, credit insurance, and other arrangements.

For OTC derivatives, collateral is collected from and pledged to counterparties to manage credit exposure according to the Credit Support Annex (“CSA”), which forms part of the International Swaps and Derivatives Association’s (“ISDA”) master agreements. It is common practice to execute a CSA in conjunction with an ISDA master agreement. Under the ISDA master agreements for OTC derivatives, we have a right of offset in the event of default, insolvency, bankruptcy, or other early termination. In the ordinary course of business, bilateral OTC exposures under these agreements are substantially mitigated through associated collateral agreements with a majority of our counterparties.

For exchange-traded derivatives subject to derivative clearing agreements with the exchanges and clearinghouses, there is no provision for set-off at default. Initial margin is excluded from the table below as it would become part of a pooled settlement process.

For repurchase agreements and reverse repurchase agreements, assets are sold or purchased with a commitment to resell or repurchase at a future date. Additional collateral may be pledged to or collected from counterparties to manage credit exposure according to bilateral repurchase or reverse repurchase agreements. In the event of default by a counterparty, we are entitled to liquidate the assets we hold as collateral to offset against obligations to the same counterparty.

In the case of securities lending, assets are lent with a commitment from the counterparty to return at a future date. Cash or securities are received as collateral from the counterparty. In the event of default by the counterparty, we are entitled to liquidate the assets we hold as collateral to offset against obligations to the same counterparty.

We do not offset financial instruments in our Consolidated Statements of Financial Position, as our rights of offset are conditional. The following tables present the effect of conditional netting and similar arrangements. Similar arrangements include global master repurchase agreements, security lending agreements, and any related rights to financial collateral.

As at December 31,	2018				2017			
	Related amounts not set off in the Consolidated Statements of Financial Position				Related amounts not set off in the Consolidated Statements of Financial Position

(1) Net amounts of the financial instruments presented in our Consolidated Statements of Financial Position are the same as our gross recognized financial instruments, as we do not offset financial instruments in our Consolidated Statements of Financial Position.

(2) Financial collateral excludes overcollateralization and for exchange-traded derivatives, initial margin. Total financial collateral, including initial margin and overcollateralization, received on derivative assets was \$470 (\$853 as at December 31, 2017), received on reverse repurchase agreements was \$17 (\$nil as at December 31, 2017), pledged on derivative liabilities was \$1,683 (\$1,118 as at December 31, 2017), and pledged on repurchase agreements was \$1,824 (\$1,976 as at December 31, 2017).

6.A.iii Concentration Risk

Concentrations of credit risk arise from exposures to a single debtor, a group of related debtors, or groups of debtors that have similar credit risk characteristics, such as groups of debtors in the same economic or geographic regions or in similar industries. Related issuers may have similar economic characteristics so that their ability to meet contractual obligations may be impacted similarly by changes in the economic or political conditions. We manage this risk by appropriately diversifying our investment portfolio through the use of concentration limits. In particular, we maintain policies which set counterparty exposure limits to manage the credit exposure for investments in any single issuer or to the same underlying credit. Exceptions exist for investments in securities which are issued or guaranteed by the Government of Canada, U.S. or U.K. and issuers for which the Risk & Conduct Review Committee have granted specific approval. Mortgages are collateralized by the related property, and generally do not exceed 75% of the value of the property at the time the original loan is made. Our mortgages and loans are diversified by type and location and, for mortgages, by borrower. Loans provide diversification benefits (name, industry and geography) and often provide stronger covenants and collateral than public debt securities, thereby providing both better credit protection and potentially higher recoveries in the event of default. The following tables provide details of the debt securities, mortgages, and loans held by issuer country, geographic location and industry sector, where applicable.

The carrying value of debt securities by geographic location is shown in the following table. The geographic location is based on the country of the creditor's parent.

As at December 31,	2018			2017

6.A.v Asset Quality

The following sections describe our assessment of the credit quality of our financial assets. We monitor credit quality based on internal risk ratings as well as ratings assigned by external rating agencies where available.

Debt Securities by Credit Rating

Investment grade debt securities are those rated BBB and above. Our debt security portfolio was 99% investment grade based on carrying value as at December 31, 2018 (98% as at December 31, 2017). The

credit risk ratings were established in accordance with the internal rating process described in the Credit Risk Management Governance and Control section.

The following table summarizes our debt securities by credit quality:

As at December 31,	2018			2017		
	Fair value through profit or loss	Available-for-sale	Total debt securities	Fair value through profit or loss	Available-for-sale	Total debt securities
Debt securities by credit rating:

BBB	17,592	1,741	19,333	16,836	1,834	18,670
BB and lower	731	127	858	874	274	1,148
Total debt securities	\$ 61,268	\$ 9,422	\$ 70,690	\$ 59,788	\$ 9,067	\$ 68,855

Mortgages and Loans by Credit Rating

The credit quality of mortgages and loans is evaluated internally through regular monitoring of credit-related exposures. We use judgment and experience to determine what factors should be considered when assigning an internal credit rating, which is validated through the use of credit scoring models, to a particular mortgage or corporate loan. The internal credit ratings reflect the credit quality of the borrower as well as the value of any collateral held as security.

The following tables summarize our mortgages and loans by credit quality indicator:

As at December 31,	2018	2017
Mortgages by credit rating:		
Insured	\$ 3,533	\$ 3,165
AAA	3	4
AA	2,169	1,689
A	4,742	4,235
BBB	4,892	5,004
BB and lower	901	1,209
Impaired	6	11
Total mortgages	\$ 16,246	\$ 15,317

As at December 31,	2018	2017
Loans by credit rating:		
AAA	\$ 341	\$ 400
AA	4,659	3,670
A	11,481	11,626
BBB	12,756	10,743
BB and lower	1,097	810
Impaired	43	61
Total loans	\$ 30,377	\$ 27,310

Derivative Financial Instruments by Counterparty Credit Rating

Derivative instruments consist of bilateral OTC contracts negotiated directly between counterparties, OTC contracts cleared through central clearing houses or exchange-traded contracts. Since a counterparty failure in an OTC derivative transaction could render it ineffective for hedging purposes, we generally transact our derivative contracts with highly rated counterparties. In limited circumstances, we enter into transactions with lower-rated counterparties if credit enhancement features are included.

We pledge and hold assets as collateral under CSAs for bilateral OTC derivative contracts. The collateral is realized in the event of early termination as defined in the agreements. The assets held and pledged are primarily cash and debt securities issued by the Canadian federal government and U.S. government and

agencies. While we are generally permitted to sell or re-pledge the assets held as collateral, we have not sold or re-pledged any assets. Exchange-traded and cleared OTC derivatives require the posting of initial margin, as well as daily cash settlement of variation margin. The terms and conditions related to the use of the collateral are consistent with industry practice.

Further details on collateral held and pledged as well as the impact of netting arrangements are included in Note 6.A.ii.

The following table shows the OTC derivative financial instruments with a positive fair value split by counterparty credit rating:

As at December 31,	2018			2017		
	Gross-positive replacement cost ⁽²⁾	Impact of master netting agreements ⁽³⁾	Net replacement cost ⁽⁴⁾	Gross positive replacement cost ⁽²⁾	Impact of master netting agreements ⁽³⁾	Net replacement cost ⁽⁴⁾
Over-the-counter contracts:						
AA	\$ 289	\$ (252)	\$ 37	\$ 113	\$ (95)	\$ 18
A	749	(507)	242	872	(589)	283
BBB	45	(9)	36	465	(10)	455
Total over-the-counter derivatives ⁽¹⁾	\$ 1,083	\$ (768)	\$ 315	\$ 1,450	\$ (694)	\$ 756

(1) Exchange-traded derivatives with a positive fair value of \$23 in 2018 (\$26 in 2017) are excluded from the table above, as they are subject to daily margining requirements. Our credit exposure on these derivatives is with the exchanges and clearinghouses.

(2) Used to determine the credit risk exposure if the counterparties were to default. The credit risk exposure is the cost of replacing, at current market rates, all contracts with a positive fair value.

(3) The credit risk associated with derivative assets subject to master netting arrangements is reduced by derivative liabilities due to the same counterparty in the event of default or early termination. Our overall exposure to credit risk reduced through master netting arrangements may change substantially following the reporting date as the exposure is affected by each transaction subject to the arrangement.

(4) Net replacement cost is positive replacement cost less the impact of master netting agreements.

Credit Default Swaps by Underlying Financial Instrument Credit Rating

Credit default swaps ("CDS") are OTC contracts that transfer credit risk related to an underlying referenced financial instrument from one counterparty to another. The purchaser receives protection against the decline in the value of the referenced financial instrument as a result of specified credit events such as default or bankruptcy. The seller receives a periodic premium in return for payment contingent on a credit event affecting the referenced financial instrument. CDS index contracts are those where the underlying referenced financial instruments are a group of assets. The Company enters into credit derivatives to replicate credit exposure of an underlying reference security and enhance investment returns. The credit risk ratings of the underlying reference securities for single name contracts were established in accordance with the internal rating process described in the Credit Risk Management Governance and Control section.

The following table provides a summary of the credit default swap protection sold by credit rating of the underlying reference security:

As at December 31,	2018		2017	
	Notional amount	Fair value	Notional amount	Fair value
Single name CDS contracts				
AA	\$ 48	\$ 1	\$ 67	\$ 1
A	611	9	584	15
BBB	674	13	446	9
Total single name CDS contracts	\$ 1,333	\$ 23	\$ 1,097	\$ 25
CDS index contracts	\$ 23	\$ —	\$ 24	\$ —
Total credit default swap contracts	\$ 1,356	\$ 23	\$ 1,121	\$ 25

Reinsurance Assets by Credit Rating

The table below presents the distribution of Reinsurance assets by credit rating:

As at December 31,	2018			2017		
	Gross exposure	Collateral	Net exposure	Gross exposure	Collateral	Net exposure
Ceded to related parties (Note 24)	\$ 8,538	\$ —	\$ 8,538	\$ 8,314	\$ —	\$ 8,314

Less: negative reinsurance assets	\$ 1,272			\$ 874		
Total Reinsurance assets	\$ 12,538			\$ 12,204		

6.A.vi Impairment of Assets

Management assesses debt and equity securities, mortgages and loans, and other invested assets for objective evidence of impairment at each reporting date. We employ a portfolio monitoring process to identify assets or groups of assets that have objective evidence of impairment, having experienced a loss event or events that have an impact on the estimated future cash flows of the asset or group of assets. There are inherent risks and uncertainties in our evaluation of assets or groups of assets for objective evidence of impairment, including both internal and external factors such as general economic conditions, issuers' financial conditions and prospects for economic recovery, market interest rates, unforeseen events which affect one or more issuers or industry sectors, and portfolio management parameters, including asset mix, interest rate risk, portfolio diversification, duration matching, and greater than expected liquidity needs. All of these factors could impact our evaluation of an asset or group of assets for objective evidence of impairment.

Management exercises considerable judgment in assessing for objective evidence of impairment and, based on its assessment, classifies specific assets as either performing or into one of the following credit quality lists:

“Monitor List” – the timely collection of all contractually specified cash flows is reasonably assured, but changes in issuer-specific facts and circumstances require monitoring. No impairment charge is recorded for unrealized losses on assets related to these debtors.

“Watch List” – the timely collection of all contractually specified cash flows is reasonably assured, but changes in issuer-specific facts and circumstances require heightened monitoring. An asset is moved from the Monitor List to the Watch List when changes in issuer-specific facts and circumstances increase the possibility that a security may experience a loss event on an imminent basis. No impairment charge is recorded for unrealized losses on assets related to these debtors.

“Impaired List” – the timely collection of all contractually specified cash flows is no longer reasonably assured. For these investments that are classified as AFS or amortized cost, an impairment charge is recorded or the asset is sold and a realized loss is recorded as a charge to income. Impairment charges and realized losses are recorded on assets related to these debtors.

Our approach to determining whether there is objective evidence of impairment varies by asset type. However, we have a process to ensure that in all instances where a decision has been made to sell an asset at a loss, the asset is impaired.

Debt Securities

Objective evidence of impairment on debt securities involves an assessment of the issuer's ability to meet current and future contractual interest and principal payments. In determining whether debt securities have objective evidence of impairment, we employ a screening process. The process identifies securities in an unrealized loss position, with particular attention paid to those securities whose fair value to amortized cost percentages have been less than 80% for an extended period of time. Discrete credit events, such as a ratings downgrade, are also used to identify securities that may have objective evidence of impairment. The securities identified are then evaluated based on issuer-specific facts and circumstances, including an evaluation of the issuer's financial condition and prospects for economic recovery, evidence of difficulty being experienced by the issuer's parent or affiliate, and management's assessment of the outlook for the issuer's industry sector.

Management also assesses previously impaired debt securities whose fair value has recovered to determine whether the recovery is objectively related to an event occurring subsequent to the impairment loss that has an impact on the estimated future cash flows of the asset.

Asset-backed securities are assessed for objective evidence of impairment. Specifically, we periodically update our best estimate of cash flows over the life of the security. In the event that there is an adverse change in the expected cash flows, the asset is impaired. Estimating future cash flows is a quantitative and qualitative process that incorporates information received from third parties, along with assumptions and judgments about the future performance of the underlying collateral. Losses incurred on the respective mortgage-backed securities portfolios are based on loss models using assumptions about key systematic risks, such as unemployment rates and housing prices, and loan-specific information such as delinquency rates and loan-to-value ratios.

Equity Securities and Other Invested Assets

Objective evidence of impairment for equity securities and investments in limited partnerships, segregated funds, and mutual funds involves an assessment of the prospect of recovering the cost of our investment. Instruments in an unrealized loss position are reviewed to determine if objective evidence of impairment exists. Objective evidence of impairment for these instruments includes, but is not limited to, the financial condition and near-term prospects of the issuer, including information about significant changes with adverse effects that have taken place in the technological, market, economic, or legal environment in which the issuer operates, and a significant or prolonged decline in the fair value of the instruments below their cost.

We apply presumptive impairment tests to determine whether there has been a significant or prolonged decline in the fair value of an instrument below its cost, and unless extenuating circumstances exist, the instrument is considered to be impaired.

Mortgages and Loans

Objective evidence of impairment on mortgages and loans involves an assessment of the borrower's ability to meet current and future contractual interest and principal payments. In determining whether objective evidence of impairment exists, we consider a number of factors including, but not limited to, the financial condition of the borrower and, for collateral dependent mortgages and loans, the fair value of the collateral.

Mortgages and loans causing concern are monitored closely and evaluated for objective evidence of impairment. For these mortgages and loans, we review information that is appropriate to the circumstances, including recent operating developments, strategy review, timelines for remediation, financial position of the borrower and, for collateral-dependent mortgages and loans, the value of security as well as occupancy and cash flow considerations.

In addition to specific allowances, circumstances may warrant a collective allowance based on objective evidence of impairment for a group of mortgages and loans. We consider regional economic conditions, developments for various property types, and significant exposure to struggling tenants in determining

whether there is objective evidence of impairment for certain collateral dependent mortgages and loans, even though it is not possible to identify specific mortgages and loans that are likely to become impaired on an individual basis.

Management also assesses previously impaired mortgages and loans to determine whether a recovery is objectively related to an event occurring subsequent to the impairment loss that has an impact on the estimated future cash flows of the asset.

Impairment of Fair Value Through Profit or Loss Assets

We generally maintain distinct asset portfolios for each line of business. Changes in the fair values of these assets are largely offset by changes in the value of insurance contract liabilities, when there is an effective matching of assets and liabilities. For assets designated as FVTPL, the change in fair value arising from impairment is not separately disclosed. The reduction in fair values of FVTPL debt securities attributable to impairment results in an increase in insurance contract liabilities charged through the Consolidated Statements of Operations.

Impairment of Available-For-Sale Assets

We recognized impairment losses on available-for-sale assets of \$12 for the year ended December 31, 2018 (\$7 during 2017).

We did not reverse any impairment on AFS debt securities during 2018 and 2017.

Past Due and Impaired Mortgages and Loans

The distribution of mortgages and loans past due or impaired is shown in the following tables:

As at December 31, 2018	Gross carrying value			Allowance for losses		
	Mortgages	Loans	Total	Mortgages	Loans	Total
Not past due	\$ 16,240	\$ 30,320	\$ 46,560	\$ —	\$ —	\$ —
Past due:						
Past due less than 90 days	—	14	14	—	—	—
Past due 90 days or more	—	—	—	—	—	—
Impaired	31	93	124	25	50	75
Total	\$ 16,271	\$ 30,427	\$ 46,698	\$ 25	\$ 50	\$ 75

As at December 31, 2017	Gross carrying value			Allowance for losses		
	Mortgages	Loans	Total	Mortgages	Loans	Total
Not past due	\$ 15,306	\$ 27,178	\$ 42,484	\$ —	\$ —	\$ —
Past due:						
Past due less than 90 days	—	71	71	—	—	—
Past due 90 days or more	—	—	—	—	—	—
Impaired	33	89	122	22	28	50
Total	\$ 15,339	\$ 27,338	\$ 42,677	\$ 22	\$ 28	\$ 50

Changes in Allowances for Losses

The changes in the allowances for losses are as follows:

	Mortgages	Loans	Total
Balance, January 1, 2017	\$ 23	\$ 7	\$ 30
Provision for (reversal of) losses	—	22	22
Write-offs, net of recoveries, and other adjustments	—	—	—
Foreign exchange rate movements	(1)	(1)	(2)
Balance, December 31, 2017	\$ 22	\$ 28	\$ 50
Provision for (reversal of) losses	3	19	22
Write-offs, net of recoveries, and other adjustments	(2)	—	(2)
Foreign exchange rate movements	2	3	5
Balance, December 31, 2018	\$ 25	\$ 50	\$ 75

6.B Market Risk

Risk Description

We are exposed to financial and capital market risk, which is defined as the risk that the fair value or future cash flows of an insurance contract or financial instrument will fluctuate because of changes or volatility in market prices. Market risk includes equity, interest rate and spread, real estate and foreign currency risks.

Market Risk Management Governance and Control

We employ a wide range of market risk management practices and controls as outlined below:

- Market risk governance practices are in place, including independent monitoring and review and reporting to senior management and the Risk & Conduct Review Committee.
- Risk appetite limits have been established for equity, interest rate, real estate and foreign currency risks.
- Income and regulatory capital sensitivities are monitored, managed and reported against pre-established risk limits.
- Comprehensive asset-liability management and hedging policies, programs and practices are in place.
- Regulatory solvency requirements include risk-based capital requirements and are monitored regularly.
- Product Design and Pricing Policy requires a detailed risk assessment and pricing provisions for material risks.
- Stress-testing techniques, such as DCAT, are used to measure the effects of large and sustained adverse market movements.
- Insurance contract liabilities are established in accordance with Canadian actuarial standards of practice.
- Internal capital targets are established at an enterprise level to cover all risks and are above minimum regulatory and supervisory levels. Actual capital levels are monitored to ensure they exceed internal targets.

Specific market risks and our risk management strategies are discussed below in further detail.

6.B.i Equity Risk

Equity risk is the potential for financial loss arising from declines or volatility in equity market prices. We are exposed to equity risk from a number of sources. A portion of our exposure to equity risk arises in connection with benefit guarantees on segregated fund contracts. These benefit guarantees may be triggered upon death, maturity, withdrawal or annuitization. The cost of providing for these guarantees is uncertain, and will depend upon a number of factors including general capital market conditions, underlying fund performance, policyholder behaviour, and mortality experience, which may result in negative impacts on our net income and capital.

We generate revenue in our asset management businesses and from certain insurance and annuity contracts where fees are levied on account balances that are affected directly by equity market levels. Accordingly, we have further exposure to equity risk as adverse fluctuations in the market value of such assets will result in corresponding adverse impacts on our revenue and net income. In addition, declining and volatile equity markets may have a negative impact on sales and redemptions (surrenders) in these businesses, and this may result in further adverse impacts on our net income and financial position.

We also have direct exposure to equity markets from the investments supporting other general account liabilities, surplus, and employee benefit plans. These exposures fall within our risk-taking philosophy and appetite, and are therefore generally not hedged.

The carrying value of equities by issuer country is shown in the following table:

As at December 31,	2018			2017		
	Fair value through profit or loss	Available-for-sale	Total equities	Fair value through profit or loss	Available-for-sale	Total equities
Canada	\$ 2,651	\$ 5	\$ 2,656	\$ 3,282	\$ 53	\$ 3,335
United States	508	354	862	765	631	1,396
United Kingdom	121	5	126	130	5	135
Other	734	212	946	901	213	1,114
Total equities	\$ 4,014	\$ 576	\$ 4,590	\$ 5,078	\$ 902	\$ 5,980

6.B.ii Interest Rate and Spread Risk

Interest rate and spread risk is the potential for financial loss arising from changes or volatility in interest rates or spreads when asset cash flows and the policy obligations they support are not matched. This may result in the need to either sell assets to meet policy payments and expenses or reinvest excess asset cash flows in unfavourable interest rate or spread environments. The impact of changes or volatility in interest rates or spreads is reflected in the valuation of our financial assets and liabilities for insurance contracts.

Our primary exposure to interest rate and spread risk arises from certain general account products and segregated fund contracts which contain investment guarantees in the form of minimum crediting rates, guaranteed premium rates, settlement options and benefit guarantees. If investment returns fall below guaranteed levels, we may be required to increase liabilities or capital in respect of these contracts. The guarantees attached to these products may be applicable to both past premiums collected and future premiums not yet received. Segregated fund contracts provide benefit guarantees that are linked to underlying fund performance and may be triggered upon death, maturity, withdrawal or annuitization. These products are included in our asset-liability management program and the residual interest rate exposure is managed within our risk appetite limits.

Declines in interest rates or narrowing spreads can result in compression of the net spread between interest earned on investments and interest credited to policyholders. Declines in interest rates or narrowing spreads may also result in increased asset calls, mortgage prepayments and net reinvestment of positive cash flows at lower yields, and therefore adversely impact our profitability and financial position. Negative interest rates may additionally result in losses on our cash deposits and low or negative returns on our fixed income assets impacting our profitability. In contrast, increases in interest rates or a widening of spreads may have a material impact on the value of fixed income assets, resulting in depressed market values, and may lead to lower Life Insurance Capital Adequacy Test ("LICAT") ratios or losses in the event of the liquidation of assets prior to maturity.

Significant changes or volatility in interest rates or spreads could have a negative impact on sales of certain insurance and annuity products, and adversely impact the expected pattern of redemptions (surrenders) on existing policies. Increases in interest rates or widening spreads may increase the risk that policyholders will surrender their contracts, potentially forcing us to liquidate assets at a loss and accelerate recognition of certain acquisition expenses. While we have established hedging programs in place and our insurance and annuity products often contain surrender mitigation features, these may not be sufficient to fully offset the adverse impact of the underlying losses.

We also have direct exposure to interest rates and spreads from investments supporting other general account liabilities, surplus and employee benefit plans. Lower interest rates or a narrowing of spreads will result in reduced investment income on new fixed income asset purchases. Conversely, higher interest rates or wider spreads will reduce the value of our existing assets. These exposures fall within our risk-taking philosophy and appetite and are therefore generally not hedged.

6.B.iii Market Risk Sensitivities

We utilize a variety of methods and measures to quantify our market risk exposures. These include duration management, key rate duration techniques, convexity measures, cash flow gap analysis, scenario testing, and sensitivity testing of earnings and regulatory capital ratios versus risk appetite limits.

Our net income is affected by the determination of policyholder obligations under our annuity and insurance contracts. These amounts are determined using internal valuation models and are recorded in our Annual Consolidated Financial Statements, primarily as Insurance contract liabilities. The determination of these obligations requires management to make assumptions about the future level of equity market performance, interest rates, credit and swap spreads and other factors over the life of our products. Differences between our actual experience and our best estimate assumptions are reflected in our Annual Consolidated Financial Statements. Refer to the section Additional Cautionary Language and Key Assumptions Related to Sensitivities for important additional information regarding these estimates.

Equity Market Sensitivities

The following table sets out the estimated immediate impact on, or sensitivity of, our net income and OCI to certain instantaneous changes in equity market prices as at December 31, 2018 and December 31, 2017:

As at December 31, 2018

(\$ millions, unless otherwise noted)

Change in Equity Markets ⁽¹⁾	25% decrease	10% decrease	10% increase	25% increase
Potential impact on net income ⁽²⁾⁽³⁾	\$ (300)	\$ (100)	\$ 100	\$ 250
Potential impact on OCI ⁽³⁾	\$ (100)	\$ (50)	\$ 50	\$ 100

As at December 31, 2017

(\$ millions, unless otherwise noted)

Change in Equity Markets ⁽¹⁾	25% decrease	10% decrease	10% increase	25% increase
Potential impact on net income ⁽²⁾⁽³⁾	\$ (300)	\$ (100)	\$ 100	\$ 300
Potential impact on OCI ⁽³⁾	\$ (200)	\$ (50)	\$ 50	\$ 200

- ⁽¹⁾ Represents the respective change across all equity markets as at December 31, 2018 and December 31, 2017. Assumes that actual equity exposures consistently and precisely track the broader equity markets. Since in actual practice equity-related exposures generally differ from broad market indices (due to the impact of active management, basis risk, and other factors), realized sensitivities may differ significantly from those illustrated above. Sensitivities include the impact of re-balancing equity hedges for dynamic hedging programs at 2% intervals (for 10% changes in equity markets) and at 5% intervals (for 25% changes in equity markets).
- ⁽²⁾ The market risk sensitivities include the estimated mitigation impact of our hedging programs in effect as at December 31, 2018 and December 31, 2017, and include new business added and product changes implemented prior to such dates.
- ⁽³⁾ Net income and OCI sensitivities have been rounded to the nearest \$50 million. The sensitivities exclude the market impacts on the income from our joint ventures and associates, which we account for on an equity basis.

Interest Rate Sensitivities

The following table sets out the estimated immediate impact on, or sensitivity of, our net income and OCI to certain instantaneous changes in interest rates as at December 31, 2018 and December 31, 2017:

(\$ millions, unless otherwise noted)

Change in Interest Rates ⁽¹⁾	As at December 31, 2018		As at December 31, 2017	
	50 basis point decrease	50 basis point increase	50 basis point decrease	50 basis point increase
Potential impact on net income ⁽²⁾⁽³⁾⁽⁴⁾	\$ (100)	\$ 50	\$ (100)	\$ 50
Potential impact on OCI ⁽³⁾	\$ 200	\$ (200)	\$ 250	\$ (250)

- ⁽¹⁾ Interest rate sensitivities assume a parallel shift in assumed interest rates across the entire yield curve as at December 31, 2018 and December 31, 2017 with no change to the Actuarial Standards Board ("ASB") promulgated Ultimate Reinvestment Rate ("URR"). Variations in realized yields based on factors such as different terms to maturity and geographies may result in realized sensitivities being significantly different from those illustrated above. Sensitivities include the impact of re-balancing interest rate hedges for dynamic hedging programs at 10 basis point intervals (for 50 basis point changes in interest rates).

- (2) The market risk sensitivities include the estimated mitigation impact of our hedging programs in effect as at December 31, 2018 and December 31, 2017, and include new business added and product changes implemented prior to such dates.
- (3) Net income and OCI sensitivities have been rounded to the nearest \$50 million. The sensitivities exclude the market impacts on the income from our joint ventures and associates, which we account for on an equity basis.
- (4) The majority of interest rate sensitivity, after hedging, is attributed to individual insurance products. We also have interest rate sensitivity, after hedging, from our fixed annuity and segregated funds products.

The above sensitivities were determined using a 50 basis point change in interest rates and a 10% change in our equity markets because we believe that these market shocks were reasonably possible as at December 31, 2018. We have also disclosed the impact of a 25% change in equity markets to illustrate that significant changes in equity market levels may result in other than proportionate impacts on our sensitivities.

Credit Spread and Swap Spread Sensitivities

We have estimated the immediate impact or sensitivity of our net income attributable to certain instantaneous changes in credit and swap spreads. The credit spread sensitivities reflect the impact of changes in credit spreads on our asset and liability valuations (including non-sovereign fixed income assets, provincial governments, corporate bonds, and other fixed income assets). The swap spread sensitivities reflect the impact of changes in swap spreads on swap-based derivative positions and liability valuations.

Credit Spread Sensitivities (after-tax)

(\$ millions, unless otherwise noted)	Credit Spread Sensitivities ⁽¹⁾		Swap Spread Sensitivities	
	50 basis point decrease	50 basis point increase	20 basis point decrease	20 basis point increase
Net income sensitivity ⁽²⁾				
December 31, 2018	\$ (50)	\$ 50	\$ 25	\$ (25)
December 31, 2017	\$ (75)	\$ 75	\$ 25	\$ (25)

(1) In most instances, credit spreads are assumed to revert to long-term insurance contract liability assumptions generally over a five-year period.

(2) Sensitivities have been rounded to the nearest \$25 million.

The credit and swap spread sensitivities assume a parallel shift in the indicated spreads across the entire term structure. Variations in realized spread changes based on different terms to maturity, geographies, asset classes and derivative types, underlying interest rate movements, and ratings may result in realized sensitivities being significantly different from those provided above. The credit spread sensitivity estimates exclude any credit spread impact that may arise in connection with asset positions held in segregated funds. Spread sensitivities are provided for the consolidated entity and may not be proportional across all reporting segments. Refer to Additional Cautionary Language and Key Assumptions Related to Sensitivities in this section for important additional information regarding these estimates.

Market Risk Management Strategies

We have implemented asset-liability management and hedging programs involving regular monitoring and adjustment of market risk exposures using assets, derivative instruments and repurchase agreements to maintain market risk exposures within our risk appetite. The general availability and cost of these hedging instruments may be adversely impacted by a number of factors including changes in interest rates, increased volatility in capital markets, and changes in the general market and regulatory environment within which these hedging programs operate. In particular, regulations for over-the-counter derivatives could impose additional costs and could affect our hedging strategy. In addition, these programs may themselves expose us to other risks.

6.B.iv Foreign Currency Risk

Foreign currency risk is the result of mismatches in the currency of our assets and liabilities (inclusive of capital), and cash flows. This risk may arise from a variety of sources such as foreign currency transactions

and services, foreign currency hedging, investments denominated in foreign currencies, investments in foreign subsidiaries and net income from foreign operations. Changes or volatility in foreign exchange rates could adversely affect our financial condition and results of operations.

As an international provider of financial services, we operate in a number of countries, with revenues and expenses denominated in several local currencies. In each country in which we operate, we generally maintain the currency profile of assets to match the currency of aggregate liabilities and required surplus. This approach provides an operational hedge against disruptions in local operations caused by currency fluctuations. Foreign currency derivative contracts such as currency swaps and forwards are used as a risk management tool to manage the currency exposure in accordance with our Asset Liability Management Policy. As at December 31, 2018 and December 31, 2017, the Company did not have a material foreign currency risk exposure on a functional currency basis.

Changes in exchange rates can affect our net income and surplus when financial results in functional currencies are translated into Canadian dollars. Net income earned outside of Canada is generally not currency hedged and a weakening in the local currency of our foreign operations relative to the Canadian dollar can have a negative impact on our net income reported in Canadian currency. A strengthening in the local currency of our foreign operations relative to the Canadian dollar would have the opposite effect. Regulatory capital ratios could also be impacted by changes in exchange rates.

6.B.v Embedded Derivatives Risk

An embedded derivative is contained within a host insurance contract if it includes an identifiable condition to modify the cash flows that are otherwise payable. This section is applicable to those embedded derivatives where we are not required to, and have not measured (either separately or together with the host contract) the embedded derivative at fair value.

A significant market risk exposure from embedded derivatives arises in connection with the benefit guarantees on segregated fund contracts. These benefit guarantees are linked to underlying fund performance and may be triggered upon death, maturity, withdrawal, or annuitization. We have implemented hedging programs to mitigate a portion of this market risk exposure.

We are also exposed to significant interest rate risk from embedded derivatives in certain general account products and segregated fund contracts, which contain explicit or implicit investment guarantees in the form of minimum crediting rates, guaranteed premium rates, settlement options, and benefit guarantees. If investment returns fall below guaranteed levels, we may be required to increase liabilities or capital in respect of these contracts. The guarantees attached to these products may be applicable to both past premiums collected and future premiums not yet received. Segregated fund contracts provide benefit guarantees that are linked to underlying fund performance and may be triggered upon death, maturity, withdrawal, or annuitization. These products are included in our asset-liability management program and the residual interest rate exposure is managed within our risk appetite limits.

We are also exposed to interest rate risk through guaranteed annuitization options included primarily in retirement contracts and pension plans. These embedded options give policyholders the right to convert their investment into a pension on a guaranteed basis, thereby exposing us to declining long-term interest rates as the annuity guarantee rates come into effect. Embedded options on unit-linked pension contracts give policyholders the right to convert their fund at retirement into pensions on a guaranteed basis, thereby exposing us to declining interest rates and increasing equity market returns (increasing the size of the fund which is eligible for the guaranteed conversion basis). Guaranteed annuity options are included in our asset-liability management program and most of the interest rate and equity exposure is mitigated through hedging.

Significant changes or volatility in interest rates or spreads could have a negative impact on sales of certain insurance and annuity products, and adversely impact the expected pattern of redemptions (surrenders) on existing policies. Increases in interest rates or widening spreads may increase the risk that policyholders will surrender their contracts, potentially forcing us to liquidate assets at a loss and accelerate recognition of

certain acquisition expenses. While we have established hedging programs in place and our insurance and annuity products often contain surrender mitigation features, these may not be sufficient to fully offset the adverse impact of the underlying losses.

Certain annuity and long-term disability contracts contain embedded derivatives as benefits are linked to the Consumer Price Index; however most of this exposure is hedged through the Company's ongoing asset-liability management program.

6.B.vi Additional Cautionary Language and Key Assumptions Related to Sensitivities

Our market risk sensitivities are measures of our estimated change in net income and OCI for changes in interest rates and equity market price levels described above, based on interest rates, equity market prices and business mix in place as at the respective calculation dates. These sensitivities are calculated independently for each risk factor, generally assuming that all other risk variables stay constant. The sensitivities do not take into account indirect effects such as potential impacts on goodwill impairment or valuation allowances on deferred tax assets. The sensitivities are provided for the consolidated entity and may not be proportional across all reporting segments. Actual results can differ materially from these estimates for a variety of reasons, including differences in the pattern or distribution of the market shocks, the interaction between these risk factors, model error, or changes in other assumptions such as business mix, effective tax rates, policyholder behaviour, currency exchange rates and other market variables relative to those underlying the calculation of these sensitivities. The extent to which actual results may differ from the indicative ranges will generally increase with larger capital market movements. Our sensitivities as at December 31, 2017 have been included for comparative purposes only.

The sensitivities reflect the composition of our assets and liabilities as at December 31, 2018 and December 31, 2017, respectively. Changes in these positions due to new sales or maturities, asset purchases/sales, or other management actions could result in material changes to these reported sensitivities. In particular, these sensitivities reflect the expected impact of hedging activities based on the hedge programs in place as at the December 31 calculation dates. The actual impact of hedging activity can differ materially from that assumed in the determination of these indicative sensitivities due to ongoing hedge re-balancing activities, changes in the scale or scope of hedging activities, changes in the cost or general availability of hedging instruments, basis risk (i.e., the risk that hedges do not exactly replicate the underlying portfolio experience), model risk, and other operational risks in the ongoing management of the hedge programs or the potential failure of hedge counterparties to perform in accordance with expectations.

The sensitivities are based on methods and assumptions in effect as at December 31, 2018 and December 31, 2017, as applicable. Changes in the regulatory environment, accounting or actuarial valuation methods, models, or assumptions (including changes to the ASB promulgated URR) after those dates could result in material changes to these reported sensitivities. Changes in interest rates and equity market prices in excess of the ranges illustrated may result in other than proportionate impacts.

Our hedging programs may themselves expose us to other risks, including basis risk (i.e., the risk that hedges do not exactly replicate the underlying portfolio experience), volatility risk, derivative counterparty credit risk, and increased levels of liquidity risk, model risk and other operational risks. These factors may adversely impact the net effectiveness, costs, and financial viability of maintaining these hedging programs and therefore adversely impact our profitability and financial position. While our hedging programs are intended to mitigate these effects (e.g., hedge counterparty credit risk is managed by maintaining broad diversification, dealing primarily with highly rated counterparties, and transacting through over-the-counter contracts, cleared through central clearing houses, exchange-traded contracts or bilateral over-the-counter contracts negotiated directly between counterparties that include credit support annexes), residual risk, potential reported earnings and capital volatility remain.

For the reasons outlined above, our sensitivities should only be viewed as directional estimates of the underlying sensitivities of each factor under these specialized assumptions, and should not be viewed as predictors of our future net income, OCI, and capital. Given the nature of these calculations, we cannot provide assurance that actual impact will be consistent with the estimates provided.

6.C Liquidity Risk

Risk Description

Liquidity risk is the possibility that we will not be able to fund all cash outflow commitments and collateral requirements as they fall due. This includes the risk of being forced to sell assets at depressed prices resulting in realized losses on sale. This risk also includes restrictions on our ability to efficiently allocate capital among our subsidiaries due to various market and regulatory constraints on the movement of funds. Our funding obligations arise in connection with the payment of policyholder benefits, expenses, reinsurance settlements, asset purchases, investment commitments, interest on debt, and dividends on common and preferred shares. Sources of available cash flow include general fund premiums and deposits, investment related inflows (such as maturities, principal repayments, investment income and proceeds of asset sales), proceeds generated from financing activities, and dividends and interest payments from subsidiaries. We have various financing transactions and derivative contracts under which we may be required to pledge collateral or to make payments to our counterparties for the decline in market value of specified assets. The amount of collateral or payments required may increase under certain circumstances (such as changes to interest rates, credit spreads, equity markets or foreign exchange rates), which could adversely affect our liquidity.

Liquidity Risk Management Governance and Control

We generally maintain a conservative liquidity position and employ a wide range of liquidity risk management practices and controls, which are described below:

- Liquidity risk governance practices are in place, including independent monitoring and review and reporting to senior management and the Risk & Conduct Review Committee.
- Liquidity is managed in accordance with our Asset Liability Management Policy and operating guidelines.
- Liquidity contingency plans are maintained for the management of liquidity in a liquidity event.
- Stress testing is performed by comparing liquidity coverage risk metrics under a one-month stress scenario to our policy thresholds. These liquidity coverage risk metrics are measured and managed at the enterprise and legal entity levels.
- Stress testing of our collateral is performed by comparing collateral coverage ratios to our policy threshold.
- Cash Management and asset-liability management programs support our ability to maintain our financial position by ensuring that sufficient cash flow and liquid assets are available to cover potential funding requirements. We invest in various types of assets with a view of matching them to our liabilities of various durations.
- Internal capital targets are established at an enterprise level to cover all risks and are above minimum regulatory and supervisory levels. Actual capital levels are monitored to ensure they exceed internal targets.
- We actively manage and monitor our capital and asset levels, and the diversification and credit quality of our investments.
- Various credit facilities for general corporate purposes are maintained.

We are subject to various regulations in the jurisdictions in which we operate. The ability of SLF Inc.'s subsidiaries to pay dividends and transfer funds is regulated in certain jurisdictions and may require local regulatory approvals and the satisfaction of specific conditions in certain circumstances. Through effective cash management and capital planning, SLF Inc. ensures that its subsidiaries, as a whole and on a stand-alone basis, are properly funded and maintain adequate liquidity to meet obligations, both individually and in aggregate.

Based on our historical cash flows and liquidity management processes, we believe that the cash flows from our operating activities will continue to provide sufficient liquidity for us to satisfy debt service obligations and to pay other expenses as they fall due.

The following table summarizes the contractual maturities of our significant financial liabilities and contractual commitments as at December 31, 2018 and December 31, 2017:

	Within 1 Year	1 Year to 3 Years	3 Years to 5 Years	Over 5 Years	Total
As at December 31, 2018					
Insurance and investment contract liabilities ⁽¹⁾	\$ 11,886	\$ 8,326	\$ 8,605	\$ 264,113	\$ 292,930
Senior debentures ⁽²⁾	45	89	89	1,812	2,035
Subordinated debt ⁽²⁾	10	19	19	191	239
Bond repurchase agreements	1,824	—	—	—	1,824
Accounts payable and accrued expenses	3,315	—	—	—	3,315
Secured borrowings from mortgage securitization	182	435	187	817	1,621
Funds withheld liabilities with related parties	—	—	—	7,991	7,991
Borrowed funds ⁽²⁾	55	49	45	68	217
Preferred shares	170	340	340	6,309	7,159
Total liabilities	\$ 17,487	\$ 9,258	\$ 9,285	\$ 281,301	\$ 317,331
Contractual commitments:⁽³⁾					
Contractual loans, equities and mortgages	\$ 1,140	\$ 1,044	\$ 536	\$ 1,026	\$ 3,746
Operating leases	99	157	117	356	729
Total contractual commitments	\$ 1,239	\$ 1,201	\$ 653	\$ 1,382	\$ 4,475
As at December 31, 2017					
Insurance and investment contract liabilities ⁽¹⁾	\$ 10,217	\$ 7,498	\$ 7,681	\$ 242,042	\$ 267,438
Senior debentures ⁽²⁾	45	89	89	1,813	2,036
Subordinated debt ⁽²⁾	17	32	32	402	483
Bond repurchase agreements	1,976	—	—	—	1,976
Accounts payable and accrued expenses	3,231	—	—	—	3,231
Secured borrowings from mortgage securitization	81	333	398	701	1,513
Funds withheld liabilities with related parties	—	—	—	7,601	7,601
Borrowed funds ⁽²⁾	80	52	49	83	264
Preferred shares	170	340	340	6,480	7,330
Total liabilities	\$ 15,817	\$ 8,344	\$ 8,589	\$ 259,122	\$ 291,872
Contractual commitments:⁽³⁾					
Contractual loans, equities and mortgages	\$ 1,114	\$ 820	\$ 214	\$ 729	\$ 2,877
Operating leases	83	143	91	327	644
Total contractual commitments	\$ 1,197	\$ 963	\$ 305	\$ 1,056	\$ 3,521

- ⁽¹⁾ These amounts represent the undiscounted estimated cash flows of insurance and investment contract liabilities on our Consolidated Statements of Financial Position. These cash flows include estimates related to the timing and payment of death and disability claims, policy surrenders, policy maturities, annuity payments, minimum guarantees on segregated fund products, policyholder dividends, amounts on deposit, commissions and premium taxes offset by contractual future premiums and fees on in-force contracts. These estimated cash flows are based on the best estimated assumptions used in the determination of insurance and investment contract liabilities. Due to the use of assumptions, actual cash flows will differ from these estimates.
- ⁽²⁾ Payments due based on maturity dates and include expected interest payments. Actual redemption of certain securities may occur sooner as some include an option for the issuer to call the security at par at an earlier date.
- ⁽³⁾ Contractual commitments and operating lease commitments are not reported on our Consolidated Statements of Financial Position. Additional information on these commitments is included in Note 23.

7. Insurance Risk Management

7.A Insurance Risk

Risk Description

Insurance risk is the uncertainty of product performance due to actual experience emerging differently than expected in the areas of policyholder behaviour, mortality, morbidity, and longevity. In addition, product design and pricing, expense and reinsurance risks impact multiple risk categories, including insurance risk.

Insurance Risk Management Governance and Control

We employ a wide range of insurance risk management practices and controls, as outlined below:

- Insurance risk governance practices are in place, including independent monitoring and review and reporting to senior management and the Risk & Conduct Review Committee.
- Risk appetite limits have been established for policyholder behaviour, mortality and morbidity, and longevity risks.
- Income and regulatory capital sensitivities are monitored, managed and reported against pre-established risk limits.
- Comprehensive Insurance Risk Policy, guidelines and practices are in place.
- The global underwriting manual aligns underwriting practices with our corporate risk management standards and ensures a consistent approach in insurance underwriting.
- Board-approved maximum retention limits are in place. Amounts issued in excess of these limits are reinsured.
- Detailed procedures, including criteria for approval of risks and for claims adjudication are established and monitored for each business segment.
- Underwriting and risk selection standards are established and overseen by the corporate underwriting and claims risk management function.
- Diversification and risk pooling is managed by aggregation of exposures across product lines, geography and distribution channels.
- The Insurance Risk Policy and Investment and Credit Risk Management Policy establish acceptance criteria and protocols to monitor the level of reinsurance ceded to any single reinsurer or group of reinsurers.
- Reinsurance counterparty risk is monitored, including annual reporting of reinsurance exposure to the Risk & Conduct Review Committee.
- Concentration risk exposure is monitored on group policies in a single location to avoid a catastrophic event occurrence resulting in a significant impact.
- Various limits, restrictions and fee structures are introduced into plan designs in order to establish a more homogeneous policy risk profile and limit potential for anti-selection.
- Regulatory solvency requirements include risk-based capital requirements and are monitored regularly.
- The Product Design and Pricing Policy requires detailed risk assessment and pricing provision for material risks.
- Company specific and industry level experience studies and sources of earnings analysis are monitored and factored into valuation, renewal and new business pricing processes.
- Stress-testing techniques, such as DCAT, are used to measure the effects of large and sustained adverse movements in insurance risk factors.
- Insurance contract liabilities are established in accordance with Canadian actuarial standards of practice.
- Internal capital targets are established at an enterprise level to cover all risks and are above minimum regulatory and supervisory levels. Actual capital levels are monitored to ensure they exceed internal targets.

We use reinsurance to limit losses, minimize exposure to significant risks and to provide additional capacity for growth. Our Insurance Risk Policy sets maximum global retention limits and related management standards and practices that are applied to reduce our exposure to large claims. Amounts in excess of the Board-approved maximum retention limits are reinsured. On a single life or joint-first-to-die basis our retention limit is \$25 in Canada and is US\$25 outside of Canada. For survivorship life insurance, our maximum global retention limit is \$30 in Canada and is US\$30 outside of Canada. In certain markets and jurisdictions, retention levels below the maximum are applied. Reinsurance is utilized for numerous products in most business segments, and placement is done on an automatic basis for defined insurance portfolios and on a facultative basis for individual risks with certain characteristics.

Our reinsurance coverage is well diversified and controls are in place to manage exposure to reinsurance counterparties. Reinsurance exposures are monitored to ensure that no single reinsurer represents an undue level of credit risk. This includes performing periodic due diligence on our reinsurance counterparties as well as internal credit assessments on counterparties with which we have material exposure. While reinsurance arrangements provide for the recovery of claims arising from the liabilities ceded, we retain primary responsibility to the policyholders.

Specific insurance risks and our risk management strategies are discussed below in further detail. The sensitivities provided below reflect the impact of any applicable ceded reinsurance arrangements.

7.A.i Policyholder Behaviour Risk

Risk Description

We can incur losses due to adverse policyholder behaviour relative to the assumptions used in the pricing and valuation of products with regard to lapse of policies or exercise of other embedded policy options.

Uncertainty in policyholder behaviour can arise from several sources including unexpected events in the policyholder's life circumstances, the general level of economic activity (whether higher or lower than expected), changes in the financial and capital markets, changes in pricing and availability of current products, the introduction of new products, changes in underwriting technology and standards, as well as changes in our financial strength or reputation. Uncertainty in future cash flows affected by policyholder behaviour can be further exacerbated by irrational behaviour during times of economic turbulence or at key option exercise points in the life of an insurance contract.

For individual life insurance products where fewer terminations would be financially adverse to us, net income and equity would be decreased by about \$250 (\$240 in 2017) if the termination rate assumption were reduced by 10%. For products where more terminations would be financially adverse to us, net income and equity would be decreased by about \$195 (\$175 in 2017) if the termination rate assumption were increased by 10%. These sensitivities reflect the impact of any applicable ceded reinsurance arrangements.

Policyholder Behaviour Risk Management Governance and Control

Various types of provisions are built into many of our products to reduce the impact of uncertain policyholder behaviour. These provisions include:

- Surrender charges that adjust the payout to the policyholder by taking into account prevailing market conditions.
- Limits on the amount that policyholders can surrender or borrow.
- Restrictions on the timing of policyholders' ability to exercise certain options.
- Restrictions on both the types of funds Clients can select and the frequency with which they can change funds.
- Policyholder behaviour risk is also mitigated through reinsurance on some insurance contracts.

Internal experience studies are monitored to review and update policyholder behaviour assumptions as needed, which could result in updates to policy liabilities.

7.A.ii Mortality and Morbidity Risk

Risk Description

Mortality and morbidity risk is the risk that future experience could be worse than the assumptions used in the pricing and valuation of products. Mortality and morbidity risk can arise in the normal course of business through random fluctuation in realized experience, through catastrophes, or in association with other risk factors such as product development and pricing or model risk. Adverse mortality and morbidity experience could also occur through systemic anti-selection, which could arise due to poor plan design, or underwriting process failure or the development of investor-owned and secondary markets for life insurance policies.

The risk of adverse morbidity experience also increases during economic slowdowns, especially with respect to disability coverages, as well as with increases in high medical treatment costs and growth in utilization of specialty drugs. This introduces the potential for adverse financial volatility in our financial results. External factors including medical advances could adversely affect our life insurance, health insurance, critical illness, disability, long-term care insurance and annuity businesses.

For life insurance products for which higher mortality would be financially adverse to the Company, a 2% increase in the best estimate assumption would decrease net income and equity by about \$35 (\$55 in 2017). This sensitivity reflects the impact of any applicable ceded reinsurance arrangements.

For products where morbidity is a significant assumption, a 5% adverse change in the assumptions would reduce net income and equity by about \$180 (\$160 in 2017). This sensitivity reflects the impact of any applicable ceded reinsurance arrangements.

Mortality and Morbidity Risk Management Governance and Control

Detailed uniform underwriting procedures have been established to determine the insurability of applicants and to manage exposure to large claims. These underwriting requirements are regularly scrutinized against industry guidelines and oversight is provided through a corporate underwriting and claim management function.

We do not have a high degree of concentration risk to single individuals or groups due to our well-diversified geographic and business mix. The largest portion of mortality risk within the Company is in North America. Individual and group insurance policies are underwritten prior to initial issue and renewals, based on risk selection, plan design, and rating techniques.

The Insurance Risk Policy approved by the Risk & Conduct Review Committee includes limits on the maximum amount of insurance that may be issued under one policy and the maximum amount that may be retained. These limits vary by geographic region and amounts in excess of limits are reinsured to ensure there is no exposure to unreasonable concentration of risk.

7.A.iii Longevity Risk

Risk Description

Longevity risk is the potential for economic loss, accounting loss or volatility in earnings arising from adverse changes in rates of mortality improvement relative to the assumptions used in the pricing and valuation of products. This risk can manifest itself slowly over time as socioeconomic conditions improve and medical advances continue. It could also manifest itself more quickly, for example, due to medical breakthroughs that significantly extend life expectancy. Longevity risk affects contracts where benefits or costs are based upon the likelihood of survival (for example, annuities, pensions, pure endowments, reinsurance, segregated funds, and specific types of health contracts). Additionally, our longevity risk exposure is increased for certain annuity products such as guaranteed annuity options by an increase in equity market levels.

For annuities products for which lower mortality would be financially adverse to us, a 2% decrease in the mortality assumption would decrease net income and equity by about \$120 (\$120 in 2017). These sensitivities reflect the impact of any applicable ceded reinsurance arrangements.

Longevity Risk Management Governance and Control

To improve management of longevity risk, we monitor research in the fields that could result in a change in expected mortality improvement. Stress-testing techniques are used to measure and monitor the impact of extreme mortality improvement on the aggregate portfolio of insurance and annuity products as well as our own pension plans.

7.A.iv Product Design and Pricing Risk

Risk Description

Product design and pricing risk is the risk a product does not perform as expected, causing adverse financial consequences. This risk may arise from deviations in realized experience versus assumptions used in the pricing of products. Risk factors include uncertainty concerning future investment yields, policyholder behaviour, mortality and morbidity experience, sales levels, mix of business, expenses and taxes. Although some of our products permit us to increase premiums or adjust other charges and credits during the life of the policy or contract, the terms of these policies or contracts may not allow for sufficient adjustments to maintain expected profitability. This could have an adverse effect on our profitability and capital position.

Product Design and Pricing Governance and Control

Our Product Design and Pricing Policy, approved by the Risk & Conduct Review Committee, establishes the framework governing our product design and pricing practices and is designed to align our product offerings with our strategic objectives and risk-taking philosophy. Consistent with this policy, product development, design and pricing processes have been implemented throughout the Company. New products follow a stage-gate process with defined management approvals based on the significance of the initiative, and each initiative is subject to a risk assessment process to identify key risks and risk mitigation requirements, and is reviewed by multiple stakeholders. Additional governance and control procedures are listed below:

- Pricing models, methods, and assumptions are subject to periodic internal peer reviews.
- Experience studies, sources of earnings analysis, and product dashboards are used to monitor actual experience against those assumed in pricing and valuation.
- On experience rated, participating, and adjustable products, emerging experience is reflected through changes in policyholder dividend scales as well as other policy adjustment mechanisms such as premium and benefit levels.
- Limits and restrictions may be introduced into the design of products to mitigate adverse policyholder behaviour or apply upper thresholds on certain benefits.

7.A.v Expense Risk

Risk Description

Expense risk is the risk that future expenses are higher than the assumptions used in the pricing and valuation of products. This risk can arise from general economic conditions, unexpected increases in inflation, slower than anticipated growth, or reduction in productivity leading to increases in unit expenses. Expense risk occurs in products where we cannot or will not pass increased costs onto the Client and will manifest itself in the form of a liability increase or a reduction in expected future profits.

The sensitivity of liabilities for insurance contracts to a 5% increase in unit expenses would result in a decrease in net income and equity of about \$175 (\$160 in 2017). These sensitivities reflect the impact of any applicable ceded reinsurance arrangements.

Expenses Risk Management Governance and Control

We closely monitor expenses through an annual budgeting process and ongoing monitoring of any expense gaps between unit expenses assumed in pricing and actual expenses.

7.A.vi Reinsurance Risk

Risk Description

We purchase reinsurance for certain risks underwritten by our various insurance businesses. Reinsurance risk is the risk of financial loss due to adverse developments in reinsurance markets (for example, discontinuance or diminution of reinsurance capacity, or an increase in the cost of reinsurance), insolvency of a reinsurer or inadequate reinsurance coverage.

Changes in reinsurance market conditions, including actions taken by reinsurers to increase rates on existing and new coverage and our ability to obtain appropriate reinsurance, may adversely impact the availability or cost of maintaining existing or securing new reinsurance capacity, with adverse impacts on our business strategies, profitability and financial position. There is an increased possibility of rate increases or renegotiation of legacy reinsurance contracts by our reinsurers, as the global reinsurance industry continues to review and optimize their business models. In addition, changes to the regulatory treatment of reinsurance arrangements could have an adverse impact on our capital position.

Reinsurance Risk Management Governance and Control

We have an Insurance Risk Policy and an Investment and Credit Risk Management Policy approved by the Risk & Conduct Review Committee, which set acceptance criteria and processes to monitor the level of reinsurance ceded to any single reinsurer or group of reinsurers. These policies also set minimum criteria for determining which reinsurance companies qualify as suitable reinsurance counterparties having the capability, expertise, governance practices and financial capacity to assume the risks being considered. Additionally, these policies require that all agreements include provisions to allow action to be taken, such as recapture of ceded risk (at a potential cost to the Company), in the event that the reinsurer loses its legal ability to carry on business through insolvency or regulatory action. Periodic due diligence is performed on the reinsurance counterparties with which we do business and internal credit assessments are performed on reinsurance counterparties with which we have material exposure. Reinsurance counterparty credit exposures are monitored closely and reported annually to the Risk & Conduct Review Committee.

New sales of our products can be discontinued or changed to reflect developments in the reinsurance markets. Rates for in-force reinsurance treaties can be either guaranteed or adjustable for the life of the ceded policy. There is generally more than one reinsurer supporting a reinsurance pool to diversify this risk.

8. Other Assets

Other assets consist of the following:

As at December 31,	2018	2017
Accounts receivable ⁽¹⁾	\$ 1,080	\$ 1,268
Investment income due and accrued	1,105	1,056
Property and equipment	487	486
Deferred acquisition costs	130	108
Prepaid expenses	254	227
Premium receivable	566	521
Accrued post-retirement benefit assets (Note 25)	167	79
Other	82	62
Total other assets	\$ 3,871	\$ 3,807

⁽¹⁾ Includes accounts receivable arising from related party transactions as described in Note 24.

9. Goodwill and Intangible Assets

9.A Goodwill

Changes in the carrying amount of goodwill acquired through business combinations by reportable segment are as follows:

	SLF Canada	SLF U.S.	SLF Asia	Corporate	Total
Balance, January 1, 2017	\$ 297	\$ 1,080	\$ 686	\$ 179	\$ 2,242
Acquisitions (Note 3)	—	—	16	—	16
Foreign exchange rate movements	—	(69)	(47)	4	(112)
Balance, December 31, 2017	\$ 297	\$ 1,011	\$ 655	\$ 183	\$ 2,146
Foreign exchange rate movements	—	85	50	4	139
Balance, December 31, 2018	\$ 297	\$ 1,096	\$ 705	\$ 187	\$ 2,285

Goodwill was not impaired in 2018 or 2017. The carrying amounts of goodwill allocated to our CGUs or groups of CGUs are as follows:

As at December 31,	2018	2017
SLA Canada		
Individual	\$ 173	\$ 173
Group retirement services	16	16
Group benefits	108	108
SLA U.S. Employee benefits group	1,096	1,011
SLA Asia	705	655
Corporate		
U.K.	187	183
Total	\$ 2,285	\$ 2,146

Goodwill acquired in business combinations is allocated to the CGUs or groups of CGUs that are expected to benefit from the synergies of the particular acquisition.

Goodwill is assessed for impairment annually or more frequently if events or circumstances occur that may result in the recoverable amount of a CGU falling below its carrying value. The recoverable amount is the higher of fair value less costs of disposal and value in use. We use fair value less costs of disposal as the recoverable amount.

We use the best evidence of fair value less costs of disposal as the price obtainable for the sale of a CGU, or group of CGUs. Fair value less costs of disposal is initially assessed by looking at recently completed market comparable transactions. In the absence of such comparables, we use either an appraisal methodology (with market assumptions commonly used in the valuation of insurance companies or asset management companies) or a valuation multiples methodology. The fair value measurements are categorized in Level 3 of the fair value hierarchy.

Under the appraisal methodology, fair value is assessed based on best estimates of future income, expenses, level and cost of capital over the lifetime of the policies and, where appropriate, adjusted for items such as transaction costs. The value ascribed to new business is based on sales anticipated in our business plans, sales projections for the valuation period based on reasonable growth assumptions, and anticipated levels of profitability of that new business. In calculating the value of new business, future sales are projected for 10 to 15 years. In some instances, market multiples are used to approximate the explicit projection of new business.

The discount rates applied reflect the nature of the environment for that CGU. The discount rates used range from 9.0% to 12.5% (after tax). More established CGUs with a stronger brand and competitive market position use discount rates at the low end of the range and CGUs with a weaker competitive position use discount rates at the high end of the range. The capital levels used are aligned with our business objectives.

Under the valuation multiples methodology, fair value is assessed with reference to multiples or ratios of comparable businesses. For life insurers and asset managers, these valuation multiples and ratios may include price-to-earnings or price-to-assets-under-management measures. This assessment takes into consideration a variety of relevant factors and assumptions, including expected growth, risk, and market conditions among others.

Judgment is used in estimating the recoverable amounts of CGUs and the use of different assumptions and estimates could result in material adjustments to the valuation of CGUs and the size of any impairment. Any material change in the key assumptions including those for capital, discount rates, the value of new business, and expenses, as well as cash flow projections used in the determination of recoverable amounts, may result in impairment charges, which could be material.

In considering the sensitivity of the key assumptions above, management determined that there is no reasonably possible change in any of the above that would result in the recoverable amount of any of the CGUs to be less than its carrying amount.

9.B Intangible Assets

Changes in intangible assets are as follows:

	Finite life		Total
	Internally generated software	Other	
Gross carrying amount			
Balance, January 1, 2017	\$ 292	\$ 497	\$ 789
Additions	36	—	36

As at December 31, 2017	\$ 121	\$ 422	\$ 543
As at December 31, 2018	\$ 152	\$ 423	\$ 575

The components of the intangible assets are as follows:

As at December 31,	2018	2017
Finite life intangible assets:		
Distribution, sales potential of field force	\$ 132	\$ 132
Client relationships and asset administration contracts	291	290
Internally generated software	152	121
Total intangible assets	\$ 575	\$ 543

10. Insurance Contract Liabilities and Investment Contract Liabilities

10.A Insurance Contract Liabilities

10.A.i Description of Business

The majority of the products sold by the Company are insurance contracts. These contracts include all forms of life, health and critical illness insurance sold to individuals and groups, life contingent annuities, accumulation annuities, and segregated fund products with guarantees.

10.A.ii Methods and Assumptions

General

The liabilities for insurance contracts represent the estimated amounts which, together with estimated future premiums and net investment income, will provide for outstanding claims, estimated future benefits, policyholders' dividends, taxes (other than income taxes), and expenses on in-force insurance contracts.

In determining our liabilities for insurance contracts, assumptions must be made about mortality and morbidity rates, lapse and other policyholder behaviour, interest rates, equity market performance, asset default, inflation, expenses, and other factors over the life of our products. Most of these assumptions relate to events that are anticipated to occur many years in the future. Assumptions require significant judgment and regular review and, where appropriate, revision.

We use best estimate assumptions for expected future experience and apply margins for adverse deviations to provide for uncertainty in the choice of the best estimate assumptions. The amount of insurance contract liabilities related to the application of margins for adverse deviations to best estimate assumptions is called a provision for adverse deviations.

Best Estimate Assumptions

Best estimate assumptions are intended to be current, neutral estimates of the expected outcome as guided by Canadian actuarial standards of practice. The choice of best estimate assumptions takes into account current circumstances, past experience data (Company and/or industry), the relationship of past to expected future experience, anti-selection, the relationship among assumptions, and other relevant factors. For assumptions on economic matters, the assets supporting the liabilities and the expected policy for asset-liability management are relevant factors.

Margins for Adverse Deviations

The appropriate level of margin for adverse deviations on an assumption is guided by Canadian actuarial standards of practice. For most assumptions, the standard range of margins for adverse deviations is 5% to 20% of the best estimate assumption, and the actuary chooses from within that range based on a number of considerations related to the uncertainty in the determination of the best estimate assumption. The level of uncertainty, and hence the margin chosen, will vary by assumption and by line of business and other factors. Considerations that would tend to indicate a choice of margin at the high end of the range include:

- The statistical credibility of the Company's experience is too low to be the primary source of data for choosing the best estimate assumption
- Future experience is difficult to estimate
- The cohort of risks lacks homogeneity
- Operational risks adversely impact the ability to estimate the best estimate assumption
- Past experience may not be representative of future experience and the experience may deteriorate

Provisions for adverse deviations in future interest rates are included by testing a number of scenarios of future interest rates, some of which are prescribed by Canadian actuarial standards of practice, and determining the liability based on the range of possible outcomes. A scenario of future interest rates includes, for each forecast period between the statement of financial position date and the last liability cash flow, interest rates for risk-free assets, premiums for asset default, rates of inflation, and an investment strategy consistent with the Company's investment policy. The starting point for all future interest rate scenarios is consistent with the current market environment. If few scenarios are tested, the liability would be at least as great as the largest of the outcomes. If many scenarios are tested, the liability would be within a range defined by the average of the outcomes that are above the 60th percentile of the range of outcomes and the corresponding average for the 80th percentile.

Provisions for adverse deviations in future equity returns are included by scenario testing or by applying margins for adverse deviations. In blocks of business where the valuation of liabilities uses scenario testing of future equity returns, the liability would be within a range defined by the average of the outcomes that are above the 60th percentile of the range of outcomes and the corresponding average for the 80th percentile. In blocks of business where the valuation of liabilities does not use scenario testing of future equity returns, the margin for adverse deviations on common share dividends is between 5% and 20%, and the margin for adverse deviations on capital gains would be 20% plus an assumption that those assets reduce in value by 20% to 50% at the time when the reduction is most adverse. A 30% reduction is appropriate for a diversified portfolio of North American common shares and, for other portfolios, the appropriate reduction depends on the volatility of the portfolio relative to a diversified portfolio of North American common shares.

In choosing margins, we ensure that, when taken one at a time, each margin is reasonable with respect to the underlying best estimate assumption and the extent of uncertainty present in making that assumption, and also that, in aggregate, the cumulative impact of the margins for adverse deviations is reasonable with respect to the total amount of our insurance contract liabilities. Our margins are generally stable over time and are generally only revised to reflect changes in the level of uncertainty in the best estimate assumptions. Our margins tend to be at the high end of the range for expenses and in the mid-range or higher for other assumptions. When considering the aggregate impact of margins, the actuary assesses the consistency of margins for each assumption across each block of business to ensure there is no double counting or omission and to avoid choosing margins that might be mutually exclusive. In particular, the actuary chooses similar margins for blocks of business with similar characteristics, and also chooses margins that are consistent with other assumptions, including assumptions about economic factors. The actuary is guided by Canadian actuarial standards of practice in making these professional judgments about the reasonableness of margins for adverse deviations.

The best estimate assumptions and margins for adverse deviations are reviewed at least annually and revisions are made when appropriate. The choice of assumptions underlying the valuation of insurance contract liabilities is subject to external actuarial peer review.

Mortality

Mortality refers to the rates at which death occurs for defined groups of people. Life insurance mortality assumptions are generally based on the past five to ten years of experience. Our experience is combined with industry experience where our own experience is insufficient to be statistically valid. Assumed mortality rates for life insurance and annuity contracts include assumptions about future mortality improvement based on recent trends in population mortality and our outlook for future trends.

Morbidity

Morbidity refers to both the rates of accident or sickness and the rates of recovery therefrom. Most of our disability insurance is marketed on a group basis. We offer critical illness policies on an individual basis in Canada and Asia, long-term care on an individual basis in Canada, and medical stop-loss insurance is offered on a group basis in the U.S. In Canada, group morbidity assumptions are based on our five-year average experience, modified to reflect any emerging trend in recovery rates. For long-term care and

critical illness insurance, assumptions are developed in collaboration with our reinsurers and are largely based on their experience. In the U.S., our experience is used for both medical stop-loss and disability assumptions, with some consideration of industry experience.

Lapse and Other Policyholder Behaviour

Lapse

Policyholders may allow their policies to lapse prior to the end of the contractual coverage period by choosing not to continue to pay premiums or by surrendering their policy for the cash surrender value. Assumptions for lapse experience on life insurance are generally based on our five-year average experience. Lapse rates vary by plan, age at issue, method of premium payment, and policy duration.

Premium Payment Patterns

For universal life contracts, it is necessary to set assumptions about premium payment patterns. Studies prepared by industry or the actuarial profession are used for products where our experience is insufficient to be statistically valid. Premium payment patterns usually vary by plan, age at issue, method of premium payment, and policy duration.

Expense

Future policy-related expenses include the costs of premium collection, claims adjudication and processing, actuarial calculations, preparation and mailing of policy statements, and related indirect expenses and overhead. Expense assumptions are mainly based on our recent experience using an internal expense allocation methodology. Inflationary increases assumed in future expenses are consistent with the future interest rates used in scenario testing.

Investment Returns

Interest Rates

We generally maintain distinct asset portfolios for each major line of business. In the valuation of insurance contract liabilities, the future cash flows from insurance contracts and the assets that support them are projected under a number of interest rate scenarios, some of which are prescribed by Canadian actuarial standards of practice. Reinvestments and disinvestments take place according to the specifications of each scenario, and the liability is set based on the range of possible outcomes.

Non-Fixed Income Rates of Return

We are exposed to equity markets through our segregated fund products (including variable annuities) that provide guarantees linked to underlying fund performance and through insurance products where the insurance contract liabilities are supported by non-fixed income assets.

For segregated fund products (including variable annuities), we have implemented hedging programs involving the use of derivative instruments to mitigate a large portion of the equity market risk associated with the guarantees. The cost of these hedging programs is reflected in the liabilities. The equity market risk associated with anticipated future fee income is not hedged.

The majority of non-fixed income assets that are designated as FVTPL support our participating and universal life products where investment returns are passed through to policyholders through routine changes in the amount of dividends declared or in the rate of interest credited. In these cases, changes in non-fixed income asset values are largely offset by changes in insurance contract liabilities.

Asset Default

As required by Canadian actuarial standards of practice, insurance contract liabilities include a provision for possible future default of the assets supporting those liabilities. The amount of the provision for asset

default included in the insurance contract liabilities is based on possible reductions in future investment yield that vary by factors such as type of asset, asset credit quality (rating), duration, and country of origin. The asset default assumptions are comprised of a best estimate plus a margin for adverse deviations, and are intended to provide for loss of both principal and income. Best estimate asset default assumptions by asset category and geography are derived from long-term studies of industry experience and the Company's experience. Margins for adverse deviation are chosen from the standard range (of 25% to 100%) as recommended by Canadian actuarial standards of practice based on the amount of uncertainty in the choice of best estimate assumption. The credit quality of an asset is based on external ratings if available (public bonds) and internal ratings if not (mortgages and loans). Any assets without ratings are treated as if they are rated below investment grade.

In contrast to asset impairment provisions and changes in FVTPL assets arising from impairments, both of which arise from known credit events, the asset default provision in the insurance contract liabilities covers losses related to possible future (unknown) credit events. Canadian actuarial standards of practice require the asset default provision to be determined taking into account known impairments that are recognized elsewhere on the statement of financial position. The asset default provision included in the insurance contract liabilities is reassessed each reporting period in light of impairments, changes in asset quality ratings, and other events that occurred during the period.

10.A.iii Insurance Contract Liabilities

Insurance contract liabilities consist of the following:

As at December 31, 2018	SLF Canada	SLF U.S.	SLF Asia	Corporate ⁽¹⁾	Total
Individual participating life	\$ 21,095	\$ 5,785	\$ 6,651	\$ 1,076	\$ 34,607
Individual non-participating life and health	11,435	13,580	12,463	391	37,869
Group life and health	9,591	5,623	32	—	15,246
Individual annuities	9,267	25	(44)	5,469	14,717
Group annuities	12,461	6	147	—	12,614
Insurance contract liabilities before other policy liabilities	63,849	25,019	19,249	6,936	115,053
Add: Other policy liabilities ⁽²⁾	3,049	1,450	2,276	238	7,013
Total insurance contract liabilities	\$ 66,898	\$ 26,469	\$ 21,525	\$ 7,174	\$ 122,066

⁽¹⁾ Primarily business from the U.K. and run-off reinsurance operations. Includes U.K. business of \$980 for Individual participating life, \$240 for Individual non-participating life and health, \$5,214 for Individual annuities, and \$170 for Other policy liabilities.

⁽²⁾ Consists of amounts on deposit, policy benefits payable, provisions for unreported claims, provisions for policyholder dividends, and provisions for experience rating refunds.

As at December 31, 2017	SLF Canada	SLF U.S. ⁽¹⁾	SLF Asia ⁽¹⁾	Corporate ⁽²⁾	Total
Individual participating life	\$ 20,918	\$ 5,582	\$ 6,705	\$ 1,186	\$ 34,391
Individual non-participating life and health	11,161	12,437	11,449	394	35,441
Group life and health	9,131	5,377	33	11	14,552
Individual annuities	9,178	25	(68)	6,077	15,212
Group annuities	11,607	7	106	—	11,720
Insurance contract liabilities before other policy liabilities	61,995	23,428	18,225	7,668	111,316
Add: Other policy liabilities ⁽³⁾	3,088	1,339	2,032	228	6,687
Total insurance contract liabilities	\$ 65,083	\$ 24,767	\$ 20,257	\$ 7,896	\$ 118,003

⁽¹⁾ Balances in 2017 have been changed to conform with current year presentation as a result of the resegmentation described in Note 4.

⁽²⁾ Primarily business from the U.K. and run-off reinsurance operations. Includes U.K. business of \$1,089 for Individual participating life, \$250 for Individual non-participating life and health, \$5,692 for Individual annuities, and \$158 for Other policy liabilities.

⁽³⁾ Consists of amounts on deposit, policy benefits payable, provisions for unreported claims, provisions for policyholder dividends, and provisions for experience rating refunds.

10.A.iv Changes in Insurance Contract Liabilities and Reinsurance Assets

Changes in Insurance contract liabilities and Reinsurance assets are as follows:

For the years ended December 31,	2018			2017		
	Insurance contract liabilities	Reinsurance assets	Net	Insurance contract liabilities	Reinsurance assets	Net
Balances, before Other policy liabilities and assets as at January 1,	\$ 111,316	\$ 11,292	\$ 100,024	\$ 108,733	\$ 11,676	\$ 97,057
Change in balances on in-force policies	(3,183)	(699)	(2,484)	2,684	251	2,433
Balances arising from new policies	3,780	128	3,652	2,941	156	2,785
Method and assumption changes	(375)	417	(792)	(354)	(65)	(289)
Increase (decrease) in Insurance contract liabilities and Reinsurance assets	222	(154)	376	5,271	342	4,929
Foreign exchange rate movements	3,515	881	2,634	(2,688)	(726)	(1,962)
Balances before Other policy liabilities and assets	115,053	12,019	103,034	111,316	11,292	100,024
Other policy liabilities and assets	7,013	519	6,494	6,687	912	5,775
Total Insurance contract liabilities and Reinsurance assets, December 31	\$ 122,066	\$ 12,538	\$ 109,528	\$ 118,003	\$ 12,204	\$ 105,799

10.A.v Impact of Method and Assumption Changes

Impacts of method and assumption changes on Insurance contract liabilities net of Reinsurance assets are as follows:

For the year ended December 31, 2018	Net increase (decrease) before income taxes	Description
Mortality / Morbidity	\$ (337)	Updates to reflect mortality/morbidity experience in all jurisdictions. The largest items were favourable mortality in SLF Asia International, SLF Canada Group Retirement Services and SLF U.K.
Lapse and other policyholder behaviour	164	Updates to lapse and other policyholder behaviour in all jurisdictions. The largest items, which all had unfavourable impacts, were updated lapse assumptions in SLF U.S. and SLF Asia International.
Expenses	6	Updates to reflect expense experience in all jurisdictions including updates to SLF Canada participating life accounts.
Investment returns	(331)	Updates to various investment-related assumptions across the Company including updates to SLF Canada participating life accounts.
Model enhancements and other	(294)	Various enhancements and methodology changes across all jurisdictions. The largest items were a favourable change to the participating provisions for adverse deviation in SLF Canada and SLF U.S.
Total impact of method and assumption changes	\$ (792)	

For the year ended December 31, 2017	Net increase (decrease) before income taxes	Description
Mortality / Morbidity	\$ (265)	Updates to reflect mortality/morbidity experience in all jurisdictions. The largest items were favourable mortality in SLF U.S. In-force Management and SLF Asia International insurance and favourable mortality improvement in SLF U.K.
Lapse and other policyholder behaviour	107	Updates to reflect lapse and other policyholder behaviour experience in all jurisdictions. The largest items were lower lapse rates on lapse supported business in SLF U.S. and updated lapse assumptions in SLF Canada's individual insurance business.
Expenses	68	Updates to reflect expense experience in all jurisdictions. The largest items were a refinement to the allocation of expenses in SLF Canada and increased expenses in the closed block of business in SLF Asia International wealth.
Investment returns	(65)	Updates to various investment related assumptions across the Company. This included a reduction of the provision for investment risk in SLF Canada and other updated investment related assumptions, offset partially by updates to promulgated ultimate reinvestment rates.
Model enhancements and other	(134)	Various enhancements and methodology changes across all jurisdictions. Includes the favourable impact from the SLF Canada participating individual life business and changes due to U.S. tax reform, partially offset by updates to reflect reinsurance market conditions.
Total impact of method and assumption changes	\$ (289)	

10.B Investment Contract Liabilities

10.B.i Description of Business

The following are the types of Investment contracts in-force:

- Term certain payout annuities in Canada
- Guaranteed Investment Contracts in Canada
- Unit-linked products issued in the U.K. and Hong Kong
- Non-unit-linked pensions contracts issued in the U.K. and Hong Kong

10.B.ii Method and Assumption Changes

Investment Contracts with Discretionary Participation Features

Investment contracts with DPF are measured using the same approach as insurance contracts.

Investment Contracts without Discretionary Participation Features

Investment contracts without DPF are measured at FVTPL if by doing so, a potential accounting mismatch is eliminated or significantly reduced or if the contract is managed on a fair value basis. Other investment contracts without DPF are measured at amortized cost.

The fair value liability is measured through the use of prospective discounted cash-flow techniques. For unit-linked contracts, the fair value liability is equal to the current unit fund value, plus additional non-unit liability amounts on a fair value basis if required. For non-unit-linked contracts, the fair value liability is equal to the present value of cash flows.

Amortized cost is measured at the date of initial recognition as the fair value of consideration received, less the net effect of principal payments such as transaction costs and front-end fees. At each reporting date, the amortized cost liability is measured as the present value of future cash flows discounted at the effective interest rate where the effective interest rate is the rate that equates the discounted cash flows to the liability at the date of initial recognition.

10.B.iii Investment Contract Liabilities

Investment contract liabilities consist of the following:

As at December 31, 2018	SLF Canada	SLF Asia	Corporate	Total
Individual participating life	\$ —	\$ —	\$ 6	\$ 6
Individual non-participating life and health	—	254	3	257
Individual annuities	2,646	—	43	2,689
Group annuities	—	212	—	212
Total investment contract liabilities	\$ 2,646	\$ 466	\$ 52	\$ 3,164

Included in the Investment contract liabilities of \$3,164 are liabilities of \$515 for investment contracts with DPF, \$2,646 for investment contracts without DPF measured at amortized cost, and \$3 for investment contracts without DPF measured at fair value.

As at December 31, 2017	SLF Canada	SLF Asia	Corporate	Total
Individual participating life	\$ —	\$ —	\$ 8	\$ 8
Individual non-participating life and health	—	260	3	263
Individual annuities	2,517	—	48	2,565
Group annuities	—	246	—	246
Total investment contract liabilities	\$ 2,517	\$ 506	\$ 59	\$ 3,082

Included in the Investment contract liabilities of \$3,082 are liabilities of \$562 for investment contracts with DPF, \$2,517 for investment contracts without DPF measured at amortized cost, and \$3 for investment contracts without DPF measured at fair value.

10.B.iv Changes in Investment Contract Liabilities

Changes in investment contract liabilities without DPF are as follows:

For the years ended December 31,	2018		2017	
	Measured at fair value	Measured at amortized cost	Measured at fair value	Measured at amortized cost
Balance as at January 1	\$ 3	\$ 2,517	\$ 3	\$ 2,305
Deposits	—	483	—	470
Interest	—	53	—	47
Withdrawals	—	(420)	—	(322)
Fees	—	(8)	—	(5)
Other	—	21	—	19
Change in assumptions	—	—	—	3
Balance as at December 31	\$ 3	\$ 2,646	\$ 3	\$ 2,517

Changes in investment contract liabilities with DPF are as follows:

For the years ended December 31,	2018	2017
Balance as at January 1	\$ 562	\$ 605
Change in liabilities on in-force	(84)	(10)
Liabilities arising from new policies	—	1
Increase (decrease) in liabilities	(84)	(9)
Foreign exchange rate movements	37	(34)
Balance as at December 31	\$ 515	\$ 562

10.C Gross Claims and Benefits Paid

Gross claims and benefits paid consist of the following:

For the years ended December 31,	2018	2017
Maturities and surrenders	\$ 2,607	\$ 2,388
Annuity payments	1,854	1,827
Death and disability benefits	3,942	3,832
Health benefits	6,406	6,061
Policyholder dividends and interest on claims and deposits	1,132	1,200
Total gross claims and benefits paid	\$ 15,941	\$ 15,308

10.D Total Assets Supporting Liabilities and Equity

The following tables show the total assets supporting total liabilities for the product lines shown (including insurance contract and investment contract liabilities) and assets supporting equity and other:

As at December 31, 2018	Debt securities	Equity securities	Mortgages and loans	Investment properties	Other	Total
Individual participating life	\$ 19,624	\$ 2,557	\$ 7,978	\$ 4,736	\$ 4,397	\$ 39,292
Individual non-participating life and health	18,491	1,303	14,387	1,638	13,134	48,953
Group life and health	5,947	70	9,217	—	3,126	18,360
Individual annuities	11,698	49	5,769	—	1,011	18,527
Group annuities	6,448	35	6,298	—	822	13,603
Equity and other	8,482	576	2,974	783	13,448	26,263
Total assets	\$ 70,690	\$ 4,590	\$ 46,623	\$ 7,157	\$ 35,938	\$ 164,998

As at December 31, 2017	Debt securities	Equity securities	Mortgages and loans	Investment properties	Other	Total
Individual participating life	\$ 18,855	\$ 3,190	\$ 7,458	\$ 4,645	\$ 4,508	\$ 38,656
Individual non-participating life and health	18,160	1,720	12,359	1,348	12,943	46,530
Group life and health	5,713	73	8,799	—	3,236	17,821
Individual annuities	11,791	50	5,505	—	1,334	18,680
Group annuities	6,076	45	5,840	—	538	12,499
Equity and other	8,260	902	2,666	1,074	12,494	25,396
Total assets	\$ 68,855	\$ 5,980	\$ 42,627	\$ 7,067	\$ 35,053	\$ 159,582

10.E Role of the Appointed Actuary

The Appointed Actuary is appointed by the Board and is responsible for ensuring that the assumptions and methods used in the valuation of policy liabilities and reinsurance recoverables are in accordance with accepted actuarial practice in Canada, applicable legislation, and associated regulations or directives.

The Appointed Actuary is required to provide an opinion regarding the appropriateness of the policy liabilities net of reinsurance recoverables at the statement dates to meet all policy obligations of the Company. Examination of supporting data for accuracy and completeness and analysis of our assets for their ability to support the amount of policy liabilities net of reinsurance recoverables are important elements of the work required to form this opinion.

The Appointed Actuary is required each year to investigate the financial condition of the Company and prepare a report for the Board. The 2018 analysis tested our capital adequacy until December 31, 2022, under various adverse economic and business conditions. The Appointed Actuary reviews the calculation of our LICAT Ratios.

11. Reinsurance

Reinsurance is used primarily to limit exposure to large losses. We have a retention policy that requires that such arrangements be placed with well-established, highly-rated reinsurers. Coverage is well-diversified and controls are in place to manage exposure to reinsurance counterparties. While reinsurance arrangements provide for the recovery of claims arising from the liabilities ceded, we retain primary responsibility to the policyholders.

11.A Reinsurance Assets

Reinsurance assets are measured using the amounts and assumptions associated with the underlying insurance contracts and in accordance with the terms of each reinsurance contract. Reinsurance assets are comprised of the following:

As at December 31, 2018	SLF Canada	SLF U.S.	SLF Asia	Corporate ⁽¹⁾	Total
Individual participating life	\$ 20	\$ 10	\$ 180	\$ —	\$ 210
Individual non-participating life and health	(205)	9,581	36	21	9,433
Group life and health	358	1,848	2	—	2,208
Individual annuities	—	—	—	47	47
Group annuities	121	—	—	—	121
Reinsurance assets before other policy assets	294	11,439	218	68	12,019
Add: Other policy assets ⁽²⁾	80	339	42	58	519
Total Reinsurance assets	\$ 374	\$ 11,778	\$ 260	\$ 126	\$ 12,538

⁽¹⁾ Primarily business from the U.K. and run-off reinsurance operations. Includes U.K. business of \$21 for Individual non-participating life and health, and \$47 for Individual annuities.

⁽²⁾ Consists of amounts on deposit, policy benefits payable, provisions for unreported claims, provisions for policyholder dividends, and provisions for experience rating refunds.

As at December 31, 2017	SLF Canada	SLF U.S. ⁽¹⁾	SLF Asia ⁽¹⁾	Corporate ⁽²⁾	Total
Individual participating life	\$ 4	\$ (33)	\$ 207	\$ —	\$ 178
Individual non-participating life and health	129	8,731	73	22	8,955
Group life and health	342	1,630	2	—	1,974
Individual annuities	—	—	—	58	58
Group annuities	127	—	—	—	127
Reinsurance assets before other policy assets	602	10,328	282	80	11,292
Add: Other policy assets ⁽³⁾	85	741	32	54	912
Total Reinsurance assets	\$ 687	\$ 11,069	\$ 314	\$ 134	\$ 12,204

⁽¹⁾ Balances in 2017 have been changed to conform with current year presentation as a result of the resegmentation described in Note 4.

⁽²⁾ Primarily business from the U.K. and run-off reinsurance operations. Includes U.K. business of \$22 for Individual non-participating life and health and \$58 for Individual annuities.

⁽³⁾ Consists of amounts on deposit, policy benefits payable, provisions for unreported claims, provisions for policyholder dividends, and provisions for experience rating refunds.

There was no impairment of Reinsurance assets in 2018 or 2017. Changes in Reinsurance assets are included in Note 10.A.iv.

11.B Reinsurance (Expenses) Recoveries

Reinsurance (expenses) recoveries are comprised of the following:

For the years ended December 31,	2018	2017
Recovered claims and benefits	\$ 2,000	\$ 5,110
Commissions	141	345
Reserve adjustments	25	224
Investment income ceded	275	(711)
Operating expenses and other	96	397
Reinsurance (expenses) recoveries	\$ 2,537	\$ 5,365

11.C Reinsurance Gains or Losses

We did not enter into reinsurance arrangements with non-related parties that resulted in profits on inception in 2018 or 2017. Reinsurance arrangements with related parties are included in Note 24.

12. Other Liabilities

12.A Composition of Other Liabilities

Other liabilities consist of the following:

As at December 31,	2018	2017
Accounts payable	\$ 1,653	\$ 1,484
Bank overdrafts and cash pooling	104	140
Repurchase agreements (Note 5)	1,824	1,976
Accrued expenses and taxes	1,047	946
Borrowed funds ⁽¹⁾	188	227
Accrued post-retirement benefit liability (Note 25)	524	583
Secured borrowings from mortgage securitization (Note 5)	1,453	1,355
Funds withheld liabilities with related parties (Note 24)	7,991	7,601
Other	511	661
Total other liabilities	\$ 15,295	\$ 14,973

⁽¹⁾ The change in Borrowed funds relates to net cash flow changes of \$(40) in 2018 (\$(45) in 2017) and foreign exchange rate movements of \$1 in 2018 (\$(2) in 2017).

12.B Borrowed Funds

Borrowed funds include the following:

As at December 31,	Currency of borrowing	Maturity	2018	2017
Encumbrances on real estate	Cdn. dollars	Current – 2033	\$ 177	\$ 206
Encumbrances on real estate	U.S. dollars	Current – 2020	11	21
Total borrowed funds			\$ 188	\$ 227

Interest expense for the borrowed funds was \$8 and \$10 for 2018 and 2017. The aggregate maturities of borrowed funds are included in Note 6.

13. Senior Debentures and Innovative Capital Instruments

13.A Senior Debentures⁽¹⁾

The following obligations are included in Senior debentures as at December 31:

	Interest rate	Earliest par call or redemption date	Maturity	2018	2017
Issued to Sun Life Capital Trust ("SLCT I") Series B issued June 25, 2002	7.09%	June 30, 2032 ⁽²⁾	2052	\$ 200	\$ 200
Issued to Sun Life Capital Trust II ("SLCT II") Series C issued November 20, 2009 ⁽³⁾	6.06%	December 31, 2019 ⁽⁴⁾	2108	500	500
Total senior debentures				\$ 700	\$ 700
Fair value				\$ 771	\$ 802

⁽¹⁾ All senior debentures are unsecured and redemptions are subject to regulatory approval.

⁽²⁾ Redeemable in whole or in part on any interest payment date or in whole upon the occurrence of a Regulatory Event or Tax Event, as described in the debenture. Prior to June 30, 2032, the redemption price is the greater of par and a price based on the yield of a corresponding Government of Canada bond plus 0.32%; from June 30, 2032, the redemption price is par.

⁽³⁾ On December 31, 2019, and every fifth anniversary thereafter ("Interest Reset Date"), the interest rate will reset to an annual rate equal to the five-year Government of Canada bond yield plus 3.60%.

⁽⁴⁾ Redeemable in whole or in part. If redemption occurs on an Interest Reset Date, the redemption price is par; otherwise, it is the greater of par and a price based on the yield of a corresponding Government of Canada bond plus (i) 0.65% if redemption occurs prior to December 31, 2019, or (ii) 1.30% if redemption occurs after December 31, 2019. Also redeemable in whole at par at any time upon the occurrence of a Regulatory Event or Tax Event, as described in the debenture.

Fair value is determined based on quoted market prices for identical or similar instruments. When quoted market prices are not available, fair value is determined from observable market data by dealers that are typically the market makers. The fair value is categorized in Level 2 of the fair value hierarchy.

Interest expense for senior debentures was \$44 for 2018 and 2017, respectively.

13.B Innovative Capital Instruments

Innovative capital instruments consist of Sun Life Exchangeable Capital Securities ("SLEECs"), which were issued by SLCT I and SLCT II (together "SL Capital Trusts"), established as trusts under the laws of Ontario. SLCT I issued Sun Life Exchangeable Capital Securities – Series B ("SLEECs B"), which are units representing an undivided beneficial ownership interest in the assets of that trust. SLEECs B are non-voting except in certain limited circumstances. Holders of the SLEECs B are eligible to receive semi-annual non-cumulative fixed cash distributions. SLCT II issued Sun Life Exchangeable Capital Securities – Series 2009-1 ("SLEECs 2009-1"), which are subordinated unsecured debt obligations. Holders of SLEECs 2009-1 are eligible to receive semi-annual interest payments. The proceeds of the issuances of SLEECs B and SLEECs 2009-1 were used by the SL Capital Trusts to purchase senior debentures of Sun Life Assurance. The SL Capital Trusts are not consolidated by us. As a result, the innovative capital instruments are not reported on our Consolidated Financial Statements. However, the senior debentures issued by Sun Life Assurance to the SL Capital Trusts are reported on our Consolidated Financial Statements.

The SLEECs are structured to achieve Tier 1 regulatory capital treatment for SLF Inc. and Sun Life Assurance and, as such, have features of equity capital. No interest payments or distributions will be paid in cash by the SL Capital Trusts on the SLEECs if Sun Life Assurance fails to declare regular dividends (i) on its Class B Non-Cumulative Preferred Shares Series A, or (ii) on its public preferred shares, if any are outstanding (each, a "Missed Dividend Event"). In the case of the SLEECs 2009-1, if a Missed Dividend Event occurs or if an interest payment is not made in cash on the SLEECs 2009-1 for any reason, including at the election of Sun Life Assurance, holders of the SLEECs 2009-1 will be required to invest interest paid on the SLEECs 2009-1 in non-cumulative perpetual preferred shares of Sun Life Assurance. In the case of

the SLEECs B, if a Missed Dividend Event occurs, the net distributable funds of SLCT I will be distributed to Sun Life Assurance as the holder of Special Trust Securities of that trust. If the SL Capital Trusts fail to pay in cash the semi-annual interest payments or distributions on the SLEECs in full for any reason other than a Missed Dividend Event, then, for a specified period of time, Sun Life Assurance will not declare dividends of any kind on any of its public preferred shares, and if no such public preferred shares are outstanding, SLF Inc. will not declare dividends of any kind on any of its preferred shares or common shares.

Each SLEECs B unit and each one thousand dollars principal amount of SLEECs 2009-1 will be automatically exchanged for 40 non-cumulative perpetual preferred shares of Sun Life Assurance if any one of the following events occurs: (i) proceedings are commenced or an order is made for the winding-up of Sun Life Assurance; (ii) OSFI takes control of Sun Life Assurance or its assets; (iii) Sun Life Assurance's capital ratios fall below applicable thresholds; or (iv) OSFI directs Sun Life Assurance to increase its capital or provide additional liquidity and Sun Life Assurance either fails to comply with such direction or elects to have the SLEECs automatically exchanged ("Automatic Exchange Event"). Upon an Automatic Exchange Event, former holders of the SLEECs will cease to have any claim or entitlement to distributions, interest or principal against the issuing SL Capital Trusts and will rank as preferred shareholders of Sun Life Assurance in a liquidation of Sun Life Assurance.

According to OSFI guidelines, innovative capital instruments can comprise up to 15% of net Tier 1 capital with an additional 5% eligible for Tier 2B capital. As at December 31, 2018, for regulatory capital purposes of Sun Life Assurance, \$699 (2017 – \$699) represented Tier 1 capital.

The table below presents additional significant terms and conditions of the SLEECs:

Issuer	Issuance date	Distribution or interest payment dates	Annual yield	Redemption date at the issuer's option	Conversion date at the holder's option	Principal amount
Sun Life Capital Trust ⁽¹⁾⁽²⁾⁽³⁾⁽⁴⁾ SLEECs B	June 25, 2002	June 30, December 31	7.093%	June 30, 2007	Any time	\$ 200
Sun Life Capital Trust II ⁽¹⁾⁽²⁾ SLEECs 2009-1	November 20, 2009	June 30, December 31	5.863% ⁽⁵⁾	December 31, 2014	No conversion option	500
Total						\$ 700

- (1) Subject to regulatory approval, the SL Capital Trusts may (i) redeem any outstanding SLEECs, in whole or in part, on the redemption date specified above or on any distribution date thereafter, or in the case of SLCT II, on any date thereafter, and (ii) may redeem all, but not part of any class of SLEECs upon occurrence of a Regulatory Event or a Tax Event, prior to the redemption date specified above.
- (2) The SLEECs B may be redeemed for cash equivalent to (i) the greater of the Early Redemption Price or the Redemption Price if the redemption occurs prior to June 30, 2032 or (ii) the Redemption Price if the redemption occurs on or after June 30, 2032. Redemption Price is equal to one thousand dollars plus the unpaid distributions, other than unpaid distributions resulting from a Missed Dividend Event, to the redemption date. Early Redemption Price for the SLEECs B is the price calculated to provide an annual yield, equal to the yield of a Government of Canada bond issued on the redemption date that has a maturity date of June 30, 2032, plus 32 basis points, plus the unpaid distributions, other than unpaid distributions resulting from a Missed Dividend Event, to the redemption date. The SLEECs 2009-1 may be redeemed for cash equivalent to, on any day that is not an Interest Reset Date, accrued and unpaid interest on the SLEECs 2009-1 plus the greater of par and a price calculated to provide an annual yield equal to the yield of a Government of Canada bond maturing on the next Interest Reset Date plus (i) 0.60% if the redemption date is prior to December 31, 2019 or (ii) 1.20% if the redemption date is any time after December 31, 2019. On an Interest Reset Date, the redemption price is equal to par plus accrued and unpaid interest on the SLEECs 2009-1.
- (3) The non-cumulative perpetual preferred shares of Sun Life Assurance issued upon an Automatic Exchange Event in respect of the SLEECs B will become convertible, at the option of the holder, into a variable number of common shares of SLF Inc. on distribution dates on or after December 31, 2032.
- (4) Holders of SLEECs B may exchange, at any time, all or part of their SLEECs B units for non-cumulative perpetual preferred shares of Sun Life Assurance at an exchange rate for each SLEECs of 40 non-cumulative perpetual preferred shares of Sun Life Assurance. SLCT I will have the right, at any time before the exchange is completed, to arrange for a substituted purchaser to purchase SLEECs tendered for surrender to SLCT I so long as the holder of the SLEECs so tendered has not

withheld consent to the purchase of its SLEECs. Any non-cumulative perpetual preferred shares issued in respect of an exchange by the holders of SLEECs B will become convertible, at the option of the holder, into a variable number of common shares of SLF Inc. on distribution dates on or after December 31, 2032.

- (5) Holders of SLEECs 2009-1 are eligible to receive semi-annual interest payments at a fixed rate until December 31, 2019. The interest rate on the SLEECs 2009-1 will reset on December 31, 2019 and every fifth anniversary thereafter to equal the five-year Government of Canada bond yield plus 3.40%.

14. Subordinated Debt

The following obligations are included in Subordinated debt as at December 31, and qualify as capital for Canadian regulatory purposes:

	Interest rate	Maturity	2018	2017
Sun Life Assurance:				
Issued May 15, 1998 ⁽¹⁾	6.30%	2028	\$ 150	\$ 150
Issued March 31, 2008 ⁽²⁾	5.75%	2023	—	200
Total subordinated debt			\$ 150	\$ 350
Fair value			\$ 184	\$ 389

- (1) 6.30% Debentures, Series 2, due 2028, issued by The Mutual Life Assurance Company of Canada, which subsequently changed its name to Clarica Life Insurance Company ("Clarica") and was amalgamated with Sun Life Assurance.

- (2) Issued to SLF Inc. Sun Life Assurance redeemed all of the outstanding \$200 principal amount of these debentures at a redemption price equal to the principal amount together with accrued and unpaid interest on March 31, 2018.

Fair value is determined based on quoted market prices for identical or similar instruments. When quoted market prices are not available, fair value is determined from observable market data by dealers that are typically the market makers. The fair value is categorized in Level 2 of the fair value hierarchy.

Interest expense on subordinated debt was \$12 and \$21 for 2018 and 2017, respectively.

15. Share Capital

The authorized share capital of Sun Life Assurance consists of the following:

- An unlimited number of common shares without nominal or par value. Each common share is entitled to one vote at meetings of the shareholders of Sun Life Assurance, except for meetings at which only holders of another specified class or series of shares of Sun Life Assurance are entitled to vote separately as a class or series, and meetings at which only policyholders of Sun Life Assurance are entitled to vote separately as policyholders.
- An unlimited number of Class A, Class B, Class C, Class D and Class E shares ("Preferred shares"), without nominal or par value, issuable in series. Before issuance of the shares, the Board is authorized to fix the number of shares for each series and to determine the designation, rights, privileges, restrictions, and conditions to be attached to the Class A, Class B, Class C, Class D, and Class E Shares of the series. Class A, Class B, Class C, and Class E shares rank equally with one another and they are entitled to preference over Class D Shares and common shares with respect to dividend payments and return of capital. Holders of Class E shares will be entitled to vote under certain circumstances. Holders of the Class A, Class B, Class C, and Class D shares are not entitled to vote.

Dividends and Restrictions on the Payment of Dividends

Under the *Insurance Companies Act* (Canada), Sun Life Assurance is prohibited from declaring or paying a dividend on any of its shares if there are reasonable grounds for believing that it is, or by paying the dividend would be, in contravention of: (i) the requirement that it maintains adequate capital and adequate

and appropriate forms of liquidity, (ii) any regulations under the *Insurance Companies Act* (Canada) in relation to capital and liquidity, and (iii) any order by which OSFI directs it to increase its capital or provide additional liquidity.

Sun Life Assurance has covenanted that, if a distribution is not paid when due on any outstanding SLEECs issued by the SL Capital Trusts, then Sun Life Assurance will not pay dividends on its public preferred shares, if any are outstanding until the 12th month (in the case of the SLEECs issued by SLCT I) or 6th month (in the case of SLEECs issued by SLCT II) following the failure to pay the required distribution in full, unless the required distribution is paid to the holders of SLEECs. Public preferred shares means preferred shares issued by Sun Life Assurance which: (a) have been issued to the public (excluding any preferred shares held beneficially by affiliates of Sun Life Assurance); (b) are listed on a recognized stock exchange; and (c) have an aggregate liquidation entitlement of at least \$200. As at December 31, 2018, Sun Life Assurance did not have outstanding any shares that qualify as public preferred shares.

Currently, the above limitations do not restrict the payment of dividends on the Preferred shares or common shares of Sun Life Assurance.

The declaration and payment of dividends on shares of Sun Life Assurance are at the sole discretion of the Board of Directors and will be dependent upon our earnings, financial condition and capital requirements. Dividends may be adjusted or eliminated at the discretion of the Board on the basis of these or other considerations.

15.A Common Shares

The common shares issued and outstanding are included in the following table. All common shares are held by SLF Inc.

	2018		2017	
	Number of shares	Amount	Number of shares	Amount
Common shares (in millions of shares)				
Balance, December 31	427	\$ 2,495	427	\$ 2,495

15.B Preferred Shares

The Preferred shares of Sun Life Assurance have been classified either as equity or as liabilities on the Consolidated Statements of Financial Position.

The issued and outstanding Preferred shares classified as equity qualify as capital for Canadian regulatory purposes and are as follows:

As at December 31,	2018		2017	
	Number of shares	Amount	Number of shares	Amount
Preferred shares (in thousands of shares)				
Class B, Series A shares ⁽¹⁾	40	\$ 1	40	\$ 1
Class C, Series 1 shares ⁽²⁾	28,000	700	28,000	700
Balance, December 31	28,040	\$ 701	28,040	\$ 701

⁽¹⁾ Issued on October 19, 2001 to SLF Inc. at \$25 per share. SLF Inc. is entitled to receive non-cumulative quarterly dividends of \$0.375 per share.

⁽²⁾ Issued on December 29, 2005 to SLF Inc. at \$25 per share. SLF Inc. is entitled to receive non-cumulative quarterly dividends of \$0.275 per share. Subject to regulatory approval, Sun Life Assurance may redeem these shares, in whole or in part, at a redemption price equal to \$25 per share together with any declared and unpaid dividends.

Dividends on the Preferred shares classified as equity of \$31 for 2018 and 2017 were recorded in Retained earnings on the Consolidated Statements of Changes in Equity and are deducted from Shareholder's net income (loss) when arriving at Common shareholder's net income (loss) in our Consolidated Statements of Operations.

The issued and outstanding Preferred shares classified as liabilities are as follows:

As at December 31,	2018		2017	
	Number of shares	Amount	Number of shares	Amount
Preferred shares (in thousands of shares)				
Class C, Series 2 shares ⁽¹⁾	14,000	\$ 350	14,000	\$ 350
Class C, Series 10 shares ⁽²⁾	29,669	742	29,669	742
Class C, Series 11 shares ⁽³⁾	14,000	350	14,000	350
Class C, Series 12 shares ⁽⁴⁾	50,000	1,250	50,000	1,250
Class C, Series 14 shares ⁽⁵⁾	32,000	800	32,000	800
Balance, December 31	139,669	\$ 3,492	139,669	\$ 3,492

- (1) Issued to SLF Inc. on September 30, 2008, at \$25 per share. SLF Inc. is entitled to receive cumulative quarterly dividends of \$0.328 per share. Subject to regulatory approval, on or after September 30, 2013, Sun Life Assurance may redeem these shares, in whole or in part, at a declining premium, together with any accrued and unpaid dividends. Subject to regulatory approval, on or after September 30, 2023, SLF Inc. may require Sun Life Assurance to redeem these shares, in whole or in part, at \$25 per share together with any accrued and unpaid dividends. The shares are required to be redeemed on September 30, 2028 at \$25 per share together with accrued and unpaid dividends as at that date. These shares qualify as capital for Canadian regulatory purposes.
- (2) Issued to SLF Inc. on December 16, 2014, at \$25 per share. SLF Inc. is entitled to receive cumulative quarterly dividends of \$0.213 per share. The shares are required to be redeemed on December 16, 2034 at \$25 per share together with accrued and unpaid dividends. SLF Inc. may require Sun Life Assurance to redeem all or any part of the outstanding shares at \$25 per share, together with accrued and any unpaid dividends. These shares do not qualify as capital for Canadian regulatory purposes. On May 23, 2017, Sun Life Assurance redeemed 62 million of the outstanding Class C Series 10 shares issued to SLF Inc. at \$25 per share together with all declared and unpaid dividends to, but not including May 23, 2017.
- (3) Issued to SLF Inc. on April 15, 2016, at \$25 per share. SLF Inc. is entitled to receive cumulative quarterly dividends of \$0.3388 per share. Subject to regulatory approval, on or after March 31, 2041, Sun Life Assurance may redeem these shares, in whole or in part, at par together with accrued and any unpaid dividends to but not including the date on which redemption occurs. Subject to regulatory approval, the shares are required to be redeemed on March 31, 2046 at \$25 per share together with accrued and unpaid dividends to, but not including March 31, 2046. These shares qualify as capital for Canadian regulatory purposes.
- (4) Issued to SLF Inc. on December 29, 2015, at \$25 per share. SLF Inc. is entitled to receive cumulative quarterly dividends of \$0.344 per share. Subject to regulatory approval, on or after December 31, 2040, Sun Life Assurance may redeem these shares, in whole or in part, at par together with accrued and any unpaid dividends to but not including the date on which redemption occurs. Subject to regulatory approval, the shares are required to be redeemed on December 31, 2045 at \$25 per share together with accrued and unpaid dividends to, but not including December 31, 2045. These shares qualify as capital for Canadian regulatory purposes.
- (5) Issued to SLF Inc. on June 30, 2017, at \$25 per share. SLF Inc. is entitled to receive cumulative quarterly dividends of \$0.300 per share. Subject to regulatory approval, on or after June 30, 2032, Sun Life Assurance may redeem these shares, in whole or in part, at par together with accrued and any unpaid dividends to but not including the date on which redemption occurs. Subject to regulatory approval, the shares are required to be redeemed on June 30, 2037 at \$25 per share together with accrued and unpaid dividends to, but not including June 30, 2037. These shares qualify as capital for Canadian regulatory purposes.

Dividends on the Preferred shares classified as liabilities of \$170 and \$185 for 2018 and 2017, respectively, were recorded in Interest expense on the Consolidated Statements of Operations.

16. Interests in Other Entities

16.A Subsidiaries

Our principal subsidiaries operate our insurance operations in the U.K., the Philippines, Hong Kong, Indonesia and Vietnam. Our insurance operations in Canada and the U.S. are operated directly by Sun Life Assurance.

We are required to comply with various regulatory capital and solvency requirements in the jurisdictions in which we operate that may restrict our ability to access or use the assets of the group and to pay dividends. Further details on these restrictions are included in Notes 15 and 21.

16.B Joint Ventures and Associates

We have interests in various joint ventures and associates that principally operate in India, Malaysia, China and the Philippines. We also have interests in joint ventures related to certain real estate investments in Canada. Our interests in these joint ventures and associates range from 24.99% to 50%. The following table summarizes, in aggregate, the financial information of these joint ventures and associates:

As at or for the years ended December 31,	2018	2017
Carrying amount of interests in joint ventures and associates	\$ 1,500	\$ 1,369
Our share of:		
Net income (loss)	91	67
Other comprehensive income (loss)	7	(31)
Total comprehensive income (loss)	\$ 98	\$ 36

In 2018, we increased our investment in our joint ventures and associates by \$64 (\$121 in 2017), primarily in Asia.

During 2018, we received dividends from our joint ventures and associates of \$34 (\$36 in 2017). We also incurred rental expenses of \$16 (\$9 in 2017) related to leases with our joint ventures and associates, with the remaining future rental payments payable to our joint ventures and associates totaling \$228 over 14 years.

16.C Joint Operations

We invest jointly in investment properties and owner-occupied properties which are co-managed under contractual relationships with the other investors. We share in the revenues and expenses generated by these properties in proportion to our investment. The carrying amount of these jointly controlled assets, which is included in Investment properties and in Other Assets for owner-occupied properties, is \$1,223 as at December 31, 2018 (\$1,205 as at December 31, 2017). The fair value of these jointly controlled assets is \$1,307 as at December 31, 2018 (\$1,293 as at December 31, 2017).

16.D Unconsolidated Structured Entities

Sun Life Assurance and its subsidiaries have interests in various structured entities that are not consolidated by us. A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements. We have an interest in a structured entity when we have a contractual or non-contractual involvement that exposes us to variable returns from the performance of the entity. Our interest includes investments held in securities or units issued by these entities and fees earned from management of the assets within these entities.

Information on our interests in unconsolidated structured entities is as follows:

As at December 31,		2018		2017		
Type of structured entity	Type of investment held	Consolidated Statements of Financial Position	Carrying amount	Maximum exposure to loss ⁽¹⁾	Carrying amount	Maximum exposure to loss ⁽¹⁾
Securitization entities	Debt securities	Debt securities	\$ 5,887	\$ 5,887	\$ 4,779	\$ 4,779
Securitization entities	Short-term securities	Cash, cash equivalents and short-term securities	\$ 430	\$ 430	\$ 607	\$ 607
Investment funds ⁽²⁾	Investment fund units	Equity securities	\$ 3,934	\$ 3,934	\$ 5,477	\$ 5,477
Limited Partnerships ⁽³⁾	Limited partnership units	Other invested assets	\$ 2,246	\$ 2,246	\$ 1,658	\$ 1,658

⁽¹⁾ The maximum exposure to loss is the maximum loss that we could record through comprehensive income as a result of our involvement with these entities.

⁽²⁾ Includes investments in funds managed by our joint ventures and other related parties with a carrying amount of \$504 (\$582 in 2017).

⁽³⁾ Includes investments in limited partnerships managed by related parties with a carrying amount of \$690 (\$400 in 2017).

16.D.i Securitization Entities

Securitization entities are structured entities that are generally financed primarily through the issuance of debt securities that are backed by a pool of assets, such as mortgages or loans.

Our investments in third-party managed securitization entities consist of asset-backed securities, such as commercial mortgage-backed securities, residential mortgage-backed securities, collateralized debt obligations ("CDOs"), and commercial paper. These securities are generally large-issue debt securities designed to transform the cash flows from a specific pool of underlying assets into tranches providing various risk exposures for investment purposes. We do not provide financial or other support to these entities other than our original investment and therefore our maximum exposure to loss on these investments is limited to the carrying amount of our investment. We do not have control over these investments since we do not have power to direct the relevant activities of these entities, regardless of the level of our investment.

16.D.ii Investment Funds and Limited Partnerships

Investment funds and limited partnerships are investment vehicles that consist of a pool of funds collected from a group of investors for the purpose of investing in assets such as money market instruments, debt securities, equity securities, real estate, and other similar assets. Investment funds and limited partnerships are generally financed through the issuance of investment fund units or limited partnership units.

We hold units in investment funds and limited partnerships managed by third-party asset managers and related parties. The preceding table includes our investments in all investment funds, including exchange-traded funds and our investments in certain limited partnerships. Some of these investment funds and limited partnerships are structured entities. For all investment funds and limited partnerships, our maximum exposure to loss is equivalent to the carrying amount of our investment in the fund or partnership. Our investments in fund units and limited partnership units generally give us an undivided interest in the investment performance of a portfolio of underlying assets managed or tracked to a specific investment mandate for investment purposes. We do not have control over third-party managed investment funds or limited partnerships that are structured entities since we do not have power to direct their relevant activities.

16.E Consolidated Structured Entities

We consolidate an investment fund managed by Sun Life Institutional Investments (Canada) Inc., a subsidiary of SLF Inc. that invests primarily in investment properties. We consolidate this fund because we are exposed to a significant amount of variability and have power over the relevant activities of the fund through a related party.

17. Fee Income

Fee income for the years ended December 31 consists of the following:

	2018	2017 ⁽¹⁾
Fee income from insurance contracts	\$ 965	\$ 890
Fee income from service contracts:		
Distribution fees	203	185
Fund management and other asset-based fees	152	195
Administrative service and other fees	514	534
Total fee income	\$ 1,834	\$ 1,804

⁽¹⁾ Balances in 2017 have been changed to conform with current year presentation as a result of the adoption of IFRS 15 described in Note 2.

Administrative service and other fees are primarily earned in the SLF Canada segment. The fee income by reportable segment is presented in Note 4.

18. Operating Expenses

Operating expenses for the years ended December 31 consist of the following:

	2018	2017
Employee expenses ⁽¹⁾	\$ 2,192	\$ 2,162
Premises and equipment	220	209
Capital asset depreciation	75	65
Service fees	473	438
Amortization of intangible assets (Note 9)	61	60
Other expenses ⁽²⁾	975	1,084
Total operating expenses	\$ 3,996	\$ 4,018

⁽¹⁾ See table below for further details.

⁽²⁾ Includes restructuring costs of \$60 recorded in 2017 for the Company's plan to enhance business processes and organizational structures and capabilities.

Employee expenses for the years ended December 31 consist of the following:

	2018	2017
Salaries, bonus, employee benefits	\$ 2,084	\$ 2,015
Share-based payments (Note 19)	73	110
Other personnel costs	35	37
Total employee expenses	\$ 2,192	\$ 2,162

19. Share-Based Payments

We have share-based payment plans that use notional units that are valued based on SLF Inc.'s common share price on the Toronto Stock Exchange ("TSX"). Any fluctuation in SLF Inc.'s common share price changes the value of the units, which affects our share-based payment compensation expense. Upon redemption of these units, payments are made to the employees with a corresponding reduction in the accrued liability. We use equity swaps and forwards to hedge our exposure to variations in cash flows due to changes in SLF Inc.'s common share price for all of these plans.

Details of these plans are as follows:

Senior Executives' Deferred Share Unit ("DSU") Plan: Under the DSU plan, designated executives may elect to receive all or a portion of their annual incentive award in the form of DSUs. Each DSU is equivalent in value to one common share of SLF Inc. and earns dividend equivalents in the form of additional DSUs at the same rate as the dividends on common shares of SLF Inc. The designated executives must elect to participate in the plan prior to the beginning of the plan year and this election is irrevocable. Awards generally vest immediately; however, participants are not permitted to redeem the DSUs until after termination, death, or retirement. The value at the time of redemption will be based on the fair value of the common shares of SLF Inc. immediately before their redemption.

Sun Share Unit ("Sun Share") Plan: Under the Sun Share plan, participants are granted units that are equivalent in value to one common share of SLF Inc. and have a grant price equal to the average of the closing price of a common share of SLF Inc. on the TSX on the five trading days immediately prior to the date of grant. Participants generally hold units for up to 36 months from the date of grant. The units earn dividend equivalents in the form of additional units at the same rate as the dividends on common shares.

Units may vest or become payable if we meet specified threshold performance targets. The plan provides for performance factors to motivate participants to achieve a higher return for shareholders (performance factors are determined through a multiplier that can be as low as zero or as high as two times the number of units that vest). Payments to participants are based on the number of units vested multiplied by the average closing price of a common share of SLF Inc. on the TSX on the five trading days immediately prior to the vesting date.

Additional information for other share-based payment plans: The units outstanding under these plans and the liabilities recognized for these units in our Consolidated Statements of Financial Position are summarized in the following table:

Number of units (in thousands)	Sun Shares	DSUs	Total
Units outstanding December 31, 2018	4,600	785	5,385
Units outstanding December 31, 2017	5,224	1,012	6,236
Liability accrued as at December 31, 2018	\$ 154	\$ 33	\$ 187
Liability accrued as at December 31, 2017	\$ 200	\$ 49	\$ 249

Compensation expense and the income tax expense (benefit) for share-based payment plans for the years ended December 31 are shown in the following table. Since expenses for the DSUs are accrued as part of incentive compensation in the year awarded, the expenses below do not include these accruals. The expenses presented in the following table include increases in the liabilities for Sun Shares and DSUs due to changes in the fair value of the common shares of SLF Inc. and the accruals of the Sun Shares liabilities over the vesting period, and exclude any adjustment in expenses due to the impact of hedging.

For the years ended December 31,	2018	2017
Compensation expense	\$ 73	\$ 110
Income tax expense (benefit)	\$ (18)	\$ (28)

20. Income Taxes

20.A Deferred Income Taxes

The following represents the deferred tax assets and liabilities in the Consolidated Statements of Financial Position by source of temporary differences:

As at December 31,	2018		2017	
	Assets ⁽¹⁾	Liabilities ⁽¹⁾	Assets ⁽¹⁾	Liabilities ⁽¹⁾
Investments	\$ (750)	\$ 14	\$ (855)	\$ 9
Policy liabilities ⁽²⁾	1,113	(2)	1,215	12
Deferred acquisition costs	96	12	83	18
Losses available for carry forward	537	(40)	502	—
Pension and other employee benefits	183	27	201	—
Other ⁽³⁾	8	30	142	9
Total	\$ 1,187	\$ 41	\$ 1,288	\$ 48
Total net deferred tax asset	<u>\$ 1,146</u>		<u>\$ 1,240</u>	

(1) Our deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred taxes relate to the same taxable entity and the same taxation authority. Negative amounts reported under Assets are deferred tax liabilities included in a net deferred tax asset position; negative amounts under Liabilities are deferred tax assets included in a net deferred tax liability position.

(2) Consists of Insurance contract liabilities and Investment contract liabilities net of Reinsurance assets.

(3) Includes unused tax credits.

The movement in net deferred tax assets for the years ended December 31, are as follows:

	Investments	Policy liabilities ⁽¹⁾	Deferred acquisition costs	Losses available for carry forward	Pension and other employee benefits	Other	Total
As at December 31, 2017	\$ (864)	\$ 1,203	\$ 65	\$ 502	\$ 201	\$ 133	\$ 1,240
Acquisitions (disposals)	—	—	—	42	—	—	42
Charged to statement of operations	98	(126)	13	43	(32)	(161)	(165)
Charged to other comprehensive income	24	—	—	(13)	(13)	8	6
Foreign exchange rate movements	(22)	38	6	3	—	(2)	23
As at December 31, 2018	\$ (764)	\$ 1,115	\$ 84	\$ 577	\$ 156	\$ (22)	\$ 1,146

(1) Consists of Insurance contract liabilities and Investment contract liabilities net of Reinsurance assets.

	Investments	Policy liabilities ⁽¹⁾	Deferred acquisition costs	Losses available for carry forward	Pension and other employee benefits	Other	Total
As at December 31, 2016	\$ (1,019)	\$ 1,370	\$ 136	\$ 410	\$ 182	\$ 234	\$ 1,313
Acquisitions (disposals)	—	—	—	108	—	(10)	98
Charged to statement of operations	147	(109)	(57)	(12)	(6)	(84)	(121)
Charged to other comprehensive income	(37)	—	—	(9)	25	(3)	(24)
Foreign exchange rate movements	45	(58)	(14)	5	—	(4)	(26)
As at December 31, 2017	\$ (864)	\$ 1,203	\$ 65	\$ 502	\$ 201	\$ 133	\$ 1,240

(1) Consists of Insurance contract liabilities and Investment contract liabilities net of Reinsurance assets.

We have accumulated tax losses, primarily in Canada, the Philippines, the U.K. and Indonesia, totaling \$3,001 (\$2,504 in 2017). The benefit of these tax losses has been recognized to the extent that it is probable that the benefit will be realized. Unused tax losses for which a deferred tax asset has not been recognized amount to \$702 as of December 31, 2018 (\$511 in 2017), primarily in the Philippines and Indonesia. In addition, we have capital losses of \$460 in the U.K. (\$449 in 2017) for which a deferred tax asset of \$78 (\$76 in 2017) has not been recognized.

We will realize the benefit of tax losses carried forward in future years through a reduction in current income taxes as and when the losses are utilized. These tax losses are subject to examination by various tax authorities and could be reduced as a result of the adjustments to tax returns. Furthermore, legislative, business or other changes may limit our ability to utilize these losses.

Included in the deferred tax asset related to losses available for carry forward are tax benefits that have been recognized on losses incurred in either the current or the preceding year. In determining if it is appropriate to recognize these tax benefits we rely on projections of future taxable profits, and we also consider tax planning opportunities that will create taxable income in the period in which the unused tax losses can be utilized.

The non-capital losses carried forward in Canada expire beginning in 2028. The operating and capital losses in the U.K. can be carried forward indefinitely. The non-capital losses in the Philippines can be carried forward three years, and the non-capital losses in Indonesia can be carried forward five years.

We recognize a deferred tax liability on all temporary differences associated with investments in subsidiaries, branches, joint ventures, and associates unless we are able to control the timing of the reversal of these differences and it is probable that these differences will not reverse in the foreseeable future. As at December 31, 2018, temporary differences associated with investments in subsidiaries, branches, joint ventures and associates for which a deferred tax liability has not been recognized amount to \$5,675 (\$5,314 in 2017).

20.B Income Tax Expense (Benefit)

20.B.i In our Consolidated Statements of Operations, Income tax expense (benefit) for the years ended December 31 has the following components:

	2018	2017
Current income tax expense (benefit):		
Current year	\$ 260	\$ 224
Adjustments in respect of prior years, including resolution of tax disputes	2	(17)
Total current income tax expense (benefit)	262	207
Deferred income tax expense (benefit):		
Origination and reversal of temporary differences	176	(69)
Tax expense (benefit) arising from unrecognized tax losses	4	—
Adjustments in respect of prior years, including resolution of tax disputes	(15)	(4)
Tax rate and other legislative changes	—	194
Total deferred income tax expense (benefit)	165	121
Total income tax expense (benefit)	\$ 427	\$ 328

20.B.ii Income tax benefit (expense) recognized directly in equity for the years ended December 31:

	2018	2017
Recognized in other comprehensive income:		
Current income tax benefit (expense)	\$ 2	\$ 2
Deferred income tax benefit (expense)	6	(24)
Total recognized in other comprehensive income	8	(22)
Total income tax benefit (expense) recorded in equity, including tax benefit (expense) recorded in other comprehensive income	\$ 8	\$ (22)

20.B.iii Our effective income tax rate differs from the combined Canadian federal and provincial statutory income tax rate as follows:

For the years ended December 31,	2018	2017
	%	%
Total net income (loss)	\$ 2,333	\$ 1,825
Add: Income tax expense (benefit)	427	328
Total net income (loss) before income taxes	\$ 2,760	\$ 2,153
Taxes at the combined Canadian federal and provincial statutory income tax rate	\$ 738 26.8	\$ 576 26.8
Increase (decrease) in rate resulting from:		
Higher (lower) effective rates on income subject to taxation in foreign jurisdictions	(205) (7.4)	(248) (11.5)
Tax exempt investment income	(86) (3.1)	(165) (7.7)
Tax (benefit) cost of unrecognized tax losses	4 0.1	— —
Tax rate and other legislative changes	— —	194 9.0
Adjustments in respect of prior years, including resolution of tax disputes	(13) (0.5)	(21) (1.0)
Other	(11) (0.4)	(8) (0.4)
Total tax expense (benefit) and effective income tax rate	\$ 427 15.5	\$ 328 15.2

Statutory income tax rates in other jurisdictions in which we conduct business range from 0% to 30%, which creates a tax rate differential and corresponding tax provision difference compared to the Canadian federal and provincial statutory rate when applied to foreign income not subject to tax in Canada. Generally, higher earnings in jurisdictions with higher statutory tax rates result in an increase of our tax expense, while earnings arising in tax jurisdictions with statutory rates lower than 26.75% (rounded to 26.8% in the table above) reduce our tax expense. These differences are reported in higher (lower) effective rates on income subject to taxation in foreign jurisdictions. The benefit reported in 2018 included lower income in jurisdictions with low statutory income tax rates compared to 2017, and there were also losses in jurisdictions with high statutory income tax rates in 2017.

Tax exempt investment income includes tax rate differences related to various types of investment income that is taxed at rates lower than our statutory income tax rate, such as dividend income, capital gains arising in Canada, and various others. Fluctuations in foreign exchange rates, changes in market values of real estate properties and other investments have an impact on the amount of these tax rate differences.

Tax (benefit) cost of unrecognized tax losses/tax credits reflects unrecognized losses in Asia that were recognized in 2018.

U.S. tax reform legislation was signed into law on December 22, 2017 and took effect on January 1, 2018. The legislation included a reduction to the corporate tax rate from 35% to 21% for tax years beginning after 2017. Tax rate and other legislative changes in 2017 included a charge relating to the revaluation of our deferred tax balances of \$194.

Adjustments in respect of prior periods, including the resolution of tax disputes relates primarily to tax audit adjustments and the finalization of tax filings in Canada and Asia in 2018, and in Canada in 2017.

Other in 2018 and 2017 includes mostly tax differences related to investments in joint ventures in Asia which are accounted for using the equity method.

21. Capital Management

21.A Capital

Our capital base is structured to exceed minimum regulatory and internal capital targets and maintain strong credit and financial strength ratings while maintaining a capital efficient structure. We strive to achieve an optimal capital structure by balancing the use of debt and equity financing. Capital is managed both on a consolidated basis under principles that consider all the risks associated with the business as well as at the business group level under the principles appropriate to the jurisdiction in which each operates. We manage the capital for all of our international subsidiaries on a local statutory basis in a manner commensurate with their individual risk profiles.

The Board of Directors of Sun Life Assurance is responsible for the annual review and approval of the Company's capital plan and capital risk policy. Management oversight of our capital programs and position is provided by the Company's Executive Risk Committee, the membership of which includes senior management from the finance, actuarial, and risk management functions.

We engage in a capital planning process annually in which capital deployment options, fundraising, and dividend recommendations are presented to the Risk & Conduct Review Committee of the Board of Directors. Capital reviews are regularly conducted which consider the potential impacts under various business, interest rate, and equity market scenarios. Relevant components of these capital reviews, including dividend recommendations, are presented to the Risk & Conduct Review Committee on a quarterly basis. The Board of Directors is responsible for the approval of the dividend recommendations.

The capital risk policy is designed to ensure that adequate capital is maintained to provide the flexibility necessary to take advantage of growth opportunities, to support the risks associated with our businesses and to optimize return to our shareholder. This policy is also intended to provide an appropriate level of risk management over capital adequacy risk, which is defined as the risk that capital is not or will not be sufficient to withstand adverse economic conditions, to maintain financial strength or to allow us and our subsidiaries to support ongoing operations and to take advantage of opportunities for expansion.

OSFI may intervene and assume control of a Canadian life insurance company if it deems the amount of available capital insufficient. Capital requirements may be adjusted by OSFI in the future, as experience develops or the risk profile of Canadian life insurers changes or to reflect other risks. Sun Life Assurance exceeded levels that would require regulatory or corrective action as at December 31, 2018 and December 31, 2017.

The Company's regulated subsidiaries must comply with the capital adequacy requirements imposed in the jurisdictions in which they operate. In certain jurisdictions, the payment of dividends from our subsidiaries is subject to maintaining capital levels exceeding regulatory targets and/or receiving regulatory approval. We maintained capital levels above minimum local requirements as at December 31, 2018 and December 31, 2017.

Effective January 1, 2018, OSFI has replaced the Minimum Continuing Capital and Surplus Requirements ("MCCSR") with LICAT. Results as measured under LICAT are fundamentally different than under MCCSR and are not directly comparable to MCCSR. The LICAT Guideline sets a Supervisory Target Total Ratio of 100% and a minimum Total Ratio of 90%. The Company has established capital targets in excess of the Supervisory Target Total Ratio.

With a LICAT Ratio of 131% as at December 31, 2018, Sun Life Assurance's LICAT Ratio is above OSFI's Supervisory Target Total Ratio of 100% and minimum Total Ratio of 90%. In the U.S., Sun Life Assurance operates through a branch which is subject to U.S. regulatory supervision and it exceeded the levels under which regulatory action would be required as at December 31, 2018 and December 31, 2017.

Our capital base consists mainly of common shareholder's equity, participating policyholders' equity, preferred shareholder's equity and certain other capital securities that qualify as regulatory capital. For regulatory reporting purposes under the LICAT framework, there were further adjustments, including goodwill, non-life investments, and others as was prescribed by OSFI to the total capital figure presented in the table below:

As at December 31,	2018	2017
Preferred shares ⁽¹⁾	\$ 2,750	\$ 2,750
Subordinated debt	150	350
Innovative capital instruments ⁽²⁾	699	699
Equity:		
Participating policyholders' equity	\$ 864	\$ 650
Preferred shareholder's equity	701	701
Common shareholder's equity	16,327	15,518
Non-controlling interests	75	70
Total capital	\$ 21,566	\$ 20,738

⁽¹⁾ Preferred shares that qualify as capital for Canadian regulatory purposes are described in Note 15.B.

⁽²⁾ Innovative capital instruments are SLEECs issued by the SL Capital Trusts (Note 13). The SL Capital Trusts are not consolidated by us.

21.B Participating Account Seed Capital

In the first quarter of 2018, with OSFI's approval, seed capital, together with interest earned since demutualization, was transferred from the participating account to the shareholder account. The transfer of seed capital is recorded on our Consolidated Statements of Changes in Equity as a Transfer from participating policyholders' equity totaling \$89, comprised of \$50 in SLF Canada and \$39 (US\$30) in SLF U.S. The transfer of interest on seed capital is included as a reduction in Participating policyholders' net income (loss) and an increase in Shareholders' net income (loss) totaling \$110, on a pre- and post-tax basis, comprised of \$75 in SLF Canada and \$35 (US\$28) in SLF U.S. At the time of demutualization, OSFI required shareholders to transfer seed capital into the participating account to support participating insurance policies sold after demutualization. It was anticipated that over time the seed capital would no longer be needed and that the seed capital and accumulated interest would be returned to the shareholders, subject to OSFI's approval. The transfer has no impact on regulatory capital requirements, and will have no adverse impact on the policy dividends or security of benefits of participating policyholders.

22. Segregated Funds

We have segregated fund products, including variable annuities, unit-linked products and universal life insurance policies, in Canada, the U.S., the U.K., and Asia. Under these contracts, the benefit amount is contractually linked to the fair value of the investments in the particular segregated fund. Policyholders can select from a variety of categories of segregated fund investments. Although the underlying assets are registered in our name and the segregated fund contract holder has no direct access to the specific assets, the contractual arrangements are such that the segregated fund policyholder bears the risk and rewards of the funds' investment performance. Therefore, net realized gains and losses, other net investment income earned, and expenses incurred on the segregated funds are attributable to policyholders and not to us. However, certain contracts include guarantees from us. We are exposed to equity market risk and interest rate risk as a result of these guarantees. Further details on these guarantees and our risk management activities related to these guarantees are included in Note 6.

We derive fee income from segregated funds. Market value movements in the investments held for segregated fund holders impact the management fees earned on these funds.

The segregated fund types offered, by percentage of total investments for account of segregated fund holders, were within the following ranges as at December 31, 2018 and 2017:

Type of fund	%
Money market	1 to 5
Fixed income	10 to 15
Balanced	40 to 45
Equity	40 to 45

Money market funds include investments that have a term to maturity of less than one year. Fixed income funds are funds that invest primarily in investment grade fixed income securities and where less than 25% can be invested in diversified equities or high-yield bonds. Balanced funds are a combination of fixed income securities with a larger equity component. The fixed income component is greater than 25% of the portfolio. Equity consists primarily of broad-based diversified funds that invest in a well-diversified mix of Canadian, U.S. or global equities. Other funds in this category include low volatility funds, intermediate volatility funds, and high volatility funds.

22.A Investments for Account of Segregated Fund Holders

The carrying value of investments held for segregated fund holders are as follows:

As at December 31,	2018	2017
Segregated and mutual fund units	\$ 89,001	\$ 91,585
Equity securities	9,771	10,799
Debt securities	3,448	3,517
Cash, cash equivalents and short-term securities	711	457
Investment properties	400	374
Mortgages	23	20
Other assets	156	148
Total assets	\$ 103,510	\$ 106,900
Less: Liabilities arising from investing activities	496	559
Total investments for account of segregated fund holders	\$ 103,014	\$ 106,341

22.B Changes in Insurance Contracts and Investment Contracts for Account of Segregated Fund Holders

Changes in insurance contracts and investment contracts for account of segregated fund holders are as follows:

For the years ended December 31,	Insurance contracts		Investment contracts	
	2018	2017	2018	2017
Balance as at January 1	\$ 99,070	\$ 90,339	\$ 7,271	\$ 6,779
Additions to segregated funds:				
Deposits	11,468	10,772	85	86
Net transfer (to) from general funds	(307)	(120)	—	—
Net realized and unrealized gains (losses)	(7,121)	4,133	(658)	883
Other investment income	4,576	4,853	178	152
Total additions	8,616	19,638	(395)	1,121
Deductions from segregated funds:				
Payments to policyholders and their beneficiaries	10,220	9,437	614	643
Management fees	1,004	963	57	57
Taxes and other expenses	255	266	—	12
Foreign exchange rate movements	(408)	241	(194)	(83)
Total deductions	\$ 11,071	\$ 10,907	\$ 477	\$ 629
Net additions (deductions)	\$ (2,455)	\$ 8,731	\$ (872)	\$ 492
Balance as at December 31	\$ 96,615	\$ 99,070	\$ 6,399	\$ 7,271

23. Commitments, Guarantees and Contingencies

23.A Lease Commitments

We lease offices and certain equipment. These are operating leases with rents charged to operations in the year to which they relate. Total future rental payments for the remainder of these leases total \$729. The future rental payments by year of payment are included in Note 6.

23.B Contractual Commitments

In the normal course of business, various contractual commitments are outstanding, which are not reflected in our Consolidated Financial Statements. In addition to loan commitments for debt securities and mortgages included in Note 6.A.i, we have equity, investment property, and property and equipment commitments. As at December 31, 2018, we had a total of \$3,746 of contractual commitments outstanding. The expected maturities of these commitments are included in Note 6.

23.C Letters of Credit

We issue commercial letters of credit in the normal course of business. As at December 31, 2018, we had credit facilities of \$209 available for the issuance of letters of credit (\$206 as at December 31, 2017), from which a total of \$123 in letters of credit were outstanding (\$108 as at December 31, 2017). We also have access to credit facilities totaling US\$500 where SLF Inc. is the principal borrower, from which a total of \$2 in letters of credit were outstanding as at December 31, 2018 (\$2 as at December 31, 2017).

23.D Indemnities and Guarantees

In the normal course of our business, we have entered into agreements that include indemnities in favour of third parties, such as confidentiality agreements, engagement letters with advisors and consultants, outsourcing agreements, leasing contracts, trade-mark licensing agreements, underwriting and agency agreements, information technology agreements, distribution agreements, financing agreements, the sale of equity interests, and service agreements. These agreements may require us to compensate the

counterparties for damages, losses or costs incurred by the counterparties as a result of breaches in representation, changes in regulations (including tax matters), or as a result of litigation claims or statutory sanctions that may be suffered by the counterparty as a consequence of the transaction. We have also agreed to indemnify our directors and certain of our officers and employees in accordance with our by-laws. These indemnification provisions will vary based upon the nature and terms of the agreements. In many cases, these indemnification provisions do not contain limits on our liability, and the occurrence of contingent events that will trigger payment under these indemnities is difficult to predict. As a result, we cannot estimate our potential liability under these indemnities. We believe that the likelihood of conditions arising that would trigger these indemnities is remote and, historically, we have not made any significant payment under such indemnification provisions. In certain cases, we have recourse against third parties with respect to the aforesaid indemnities, and we also maintain insurance policies that may provide coverage against certain of these claims.

In the normal course of our business, we have entered into purchase and sale agreements that include indemnities in favour of third parties. These agreements may require us to compensate the counterparties for damages, losses, or costs incurred by the counterparties as a result of breaches in representation. As at December 31, 2018, we are not aware of any breaches in representations that would result in any payment required under these indemnities that would have a material impact on our Consolidated Financial Statements.

Guarantees made by us that can be quantified are included in Note 6.A.i.

23.E Legal and Regulatory Proceedings

We are regularly involved in legal actions, both as a defendant and as a plaintiff. Legal actions naming us as a defendant ordinarily involve our activities as a provider of insurance protection and wealth management products, as an investor and investment advisor, and as an employer. In addition, government and regulatory bodies in Canada, the U.S., the U.K., and Asia, including federal, provincial, and state securities and insurance regulators and government authorities, from time to time, make inquiries and require the production of information or conduct examinations or investigations concerning our compliance with insurance, securities, and other laws.

Provisions for legal proceedings related to insurance contracts, such as for disability and life insurance claims and the cost of litigation, are included in Insurance contract liabilities in our Consolidated Statements of Financial Position. Other provisions are established outside of the Insurance contract liabilities if, in the opinion of management, it is both probable that a payment will be required and a reliable estimate can be made of the amount of the obligation. Management reviews the status of all proceedings on an ongoing basis and exercises judgment in resolving them in such manner as management believes to be in our best interest.

Two class action lawsuits have been filed against Sun Life Assurance in connection with sales practices relating to, and the administration of, individual policies issued by the Metropolitan Life Insurance Company ("MLIC"). These policies were assumed by Clarica when Clarica acquired the bulk of MLIC's Canadian operations in 1998 and subsequently assumed by Sun Life Assurance as a result of its amalgamation with Clarica. One of the lawsuits (*Fehr et al v Sun Life Assurance Company of Canada*) is issued in Ontario and the other (*Alamwala v Sun Life Assurance Company of Canada*) is in British Columbia. In the *Fehr* action, the motions judge dismissed the plaintiff's motion for certification in its entirety by way of a two-part decision released on November 12, 2015 and December 7, 2016. The plaintiffs appealed and, in a decision released on September 5, 2018, the Ontario Court of Appeal overturned part of the lower court's decision and certified three alleged breach of contract claims related to the policies. Sun Life Assurance has sought leave to appeal this decision to the Supreme Court of Canada. The other action (*Alamwala v Sun Life Assurance Company of Canada*) has remained largely dormant since it was commenced in 2011 and has not been certified. We will continue to vigorously defend against the claims in these actions. In connection with the acquisition of the Canadian operations of MLIC, MLIC agreed to indemnify Clarica for certain losses, including those incurred relating to the sales of its policies. Should either of the *Fehr* or the

Alamwala lawsuits result in a loss, Sun Life Assurance will seek recourse against MLIC under that indemnity through arbitration.

Management does not believe that the probable conclusion of any current legal or regulatory matter, either individually or in the aggregate, will have a material adverse effect on the Consolidated Statements of Financial Position or results of operations of the Company.

24. Related Party Transactions

Our related parties include SLF Inc. and its other subsidiaries, our joint ventures and associates, and our key management personnel.

24.A Transactions with Key Management Personnel, Remuneration and Other Compensation

Key management personnel refers to the executive team and Board of Directors of Sun Life Assurance. These individuals have the authority and responsibility for planning, directing, and controlling the activities of the Company. The aggregate compensation to the executive team and directors are as follows:

For the years ended December 31,	2018		2017	
	Executive team	Directors	Executive team	Directors
Number of individuals	12	10	11	10
Base salary and annual incentive compensation	\$ 18	\$ —	\$ 18	\$ —
Additional short-term benefits and other	\$ 3	\$ 1	\$ 1	\$ 1
Share-based long-term incentive compensation	\$ 24	\$ 2	\$ 18	\$ 2
Value of pension and post-retirement benefits	\$ 2	\$ —	\$ 3	\$ —

24.B Transactions with SLF Inc. and its Subsidiaries

Sun Life Assurance and its subsidiaries transact business worldwide. Sun Life Assurance and its subsidiaries are primarily involved in the businesses described in Note 1 and the other subsidiaries of SLF Inc. are primarily involved in asset management and provide services to us as described in Note 24.B.ii and Note 24.B.iii. All the companies discussed in this Note are subsidiaries of SLF Inc. unless otherwise stated. All transactions between Sun Life Assurance and its subsidiaries have been eliminated on consolidation and are not discussed in this Note.

Transactions with joint ventures and associates, which are also related parties, are disclosed in Note 16. Transactions between the Company and related parties are accounted for in accordance with the Related Party Transactions policy in Note 1.

24.B.i Loan Agreements

Loans to related parties on our Consolidated Statements of Financial Position consist of the following:

As at December 31,	Currency of borrowing	Maturity date	Interest rate	2018	2017
Loans to related parties:					
Loan receivable	U.S. dollars	2036	7.41%	\$ —	\$ 629
Promissory note	U.S. dollars	2036	6.10%	682	—
Promissory note	Cdn. dollars	Demand note	Non-interest bearing	820	820
Total loans to related parties				\$ 1,502	\$ 1,449

In December 2018, the loan receivable with interest rate of 7.41%, maturing in 2036, was repaid by assigning and transferring a promissory note with interest rate of 6.10%, maturing in 2036.

Total interest on loans to related parties was \$48 for the year ended December 31, 2018 (\$61 in 2017).

24.B.ii Reinsurance Agreements

We have reinsurance agreements under which we have ceded business to related parties in the U.S. and Bermuda.

We have a coinsurance with funds withheld reinsurance agreement under which we ceded certain of our universal life policies to Sun Life Financial (U.S.) Reinsurance Company ("SLFRC"), a subsidiary of SLF Inc. Under this agreement, we hold and manage assets on a funds withheld basis in a segregated asset portfolio for the benefit of SLFRC. SLFRC holds additional assets required for statutory purposes in a trust.

We also have a coinsurance with funds withheld reinsurance agreement under which we ceded certain of our universal life policies to Independence Life and Annuity Company ("Indy"), a subsidiary of SLF Inc. Under this agreement, we hold and manage assets on a funds withheld basis in a segregated asset portfolio for the benefit of Indy.

On February 28, 2018 we recaptured a 100% coinsurance funds withheld treaty with Sun Life Financial (Bermuda) Reinsurance Ltd. ("SLF Bermuda"), a subsidiary of SLF Inc. Under the terms of the agreement, we ceded 100% of the risks associated with our medical stop loss business in the United States Branch of Sun Life Assurance of Canada to SLF Bermuda. The recapture had no net income impact to the Company, we received a recapture premium of \$324 (US\$254), which is included in Ceded Premiums in our Consolidated Statements of Operations, and there was a corresponding decrease in the Reinsurance asset.

We have 100% coinsurance agreement with SLF Bermuda. Under the terms of the agreement, Sun Life and Health Insurance Company (U.S.) ("SLHIC"), a wholly-owned subsidiary, cedes 100% of the risks associated with certain portions of its medical stop loss business to SLF Bermuda. SLF Bermuda holds the assets backing the assumed reserves in Trust with SLHIC as the beneficiary.

Financial Impact of Reinsurance Agreements

The amounts included in the Consolidated Statements of Financial Position related to these reinsurance transactions consist of the following:

As at December 31,	2018	2017
Funds withheld assets included in Other assets	\$ 3	\$ —
Reinsurance assets	\$ 8,538	\$ 8,314
Funds withheld liabilities included in Other liabilities	\$ 7,991	\$ 7,601
Derivative liabilities	\$ 37	\$ 479

The amounts included in our Consolidated Statements of Operations related to these reinsurance transactions consist of the following:

For the years ended December 31,	2018	2017
Ceded premiums	\$ 91	\$ 1,722
Decrease (increase) in reinsurance assets	\$ 66	\$ (1,151)
Reinsurance expenses (recoveries)	\$ (538)	\$ (1,015)

24.B.iii Other Agreements and Guarantees

We have service agreements with various related parties under which we provide administrative and other services. Under these agreements, we are reimbursed for costs we incur from providing these services. Amounts received under these agreements for the year ended December 31, 2018 were \$117 (\$115 in 2017).

We have an administrative services agreement with Sun Life Financial (U.S.) Service Company, Inc. ("SLFSC") under which we receive general administrative services from SLFSC. Expenses recorded under this agreement for the year ended December 31, 2018 were \$621 (\$612 in 2017) and are included in Operating expenses in our Consolidated Statements of Operations.

Disability Reinsurance Management Services, Inc. ("DRMS"), which is a subsidiary of SLF Inc., is a related party to us. We have a reinsurance management services agreement with DRMS under which we receive general reinsurance management services from DRMS. Expenses recorded under this agreement for the year ended December 31, 2018 were \$51 (\$43 in 2017) and were included in Commissions in our Consolidated Statements of Operations.

We have service and advisory agreements with various related parties, under which they provide investment advisory services to us and manage certain of our investment portfolios. During 2018, we paid fees of \$147 (\$105 in 2017) under all of these investment advisory and service agreements.

We have distribution agreements with various related parties, under which we receive fees for the sale of their products. In 2018, we received fees of \$30 (\$37 in 2017) from the sale of these products that are included in Fee income in our Consolidated Statements of Operations.

We have additional service agreements with related parties that did not have a material impact on the net income reported for the years ended December 31, 2018 and 2017.

24.B.iv Other Transactions

In the first quarter of 2018, we redeemed \$200 of the subordinated debt issued to SLF Inc. This transaction is described in Note 14.

In the fourth quarter of 2018, we purchased the outstanding shares of a subsidiary of SLF Inc. for cash of \$24. The net assets of this subsidiary, which consisted of deferred tax assets, were recorded at their carrying value of \$42. The difference between the amount paid and the carrying value of the net assets acquired of \$18 was recorded to Retained Earnings in our Consolidated Statements of Changes in Equity.

We have foreign currency derivatives with SLF Inc. and external counterparties to mitigate the foreign currency exposure on foreign currency denominated assets. The notional amount and fair value of the foreign currency derivatives with SLF Inc. are \$356 and \$(58), respectively, as at December 31, 2018 (\$356 and \$(28) in 2017). The fair value of the derivatives is included in Derivative liabilities on the Consolidated Statements of Financial Position, while the change in fair value of the foreign currency derivatives is included in Net investment income and is substantially offset by foreign currency changes on the related assets. In 2018 and 2017, we recognized derivative gains (losses) of \$(30) and \$21. None of the derivatives were unwound or matured in 2018 or 2017.

During 2018, SLF Inc. contributed capital of \$53 (\$54 in 2017) to us. These amounts are reported as Contributed surplus in our Consolidated Statements of Changes in Equity.

24.C Other Related Party Transactions

We provide investment management services for our pension plans. The services are provided on substantially the same terms as for comparable transactions with third parties. We also hold units of investment funds managed by certain of our joint ventures and other related parties. The carrying amount of our investment in these funds is included in Note 16.D.

25. Pension Plans and Other Post-Retirement Benefits

We sponsor defined benefit pension plans and defined contribution plans for eligible employees. All of our material defined benefit plans worldwide are closed to new entrants with new hires participating in defined contribution plans. Material defined benefit plans are located in Canada and the U.K. The defined benefit pension plans offer benefits based on length of service and final average earnings and certain plans offer some indexation of benefits. The specific features of these plans vary in accordance with the employee group and countries in which employees are located. In addition, we maintain supplementary non-contributory defined benefit pension arrangements for eligible employees, which are primarily for benefits

which are in excess of local tax limits. As at December 31, 2014, there are no active members in the U.K. defined benefit plans continuing to accrue future service benefits. On January 1, 2009, the Canadian defined benefit plans were closed to new employees. Canadian employees hired before January 1, 2009 continue to earn future service benefits in the previous plans, which includes both defined benefit and defined contribution components, while new hires since then are eligible to join a defined contribution plan. In addition, one small defined benefit plan in the Philippines remains open to new hires.

Our funding policy for defined benefit pension plans is to make at least the minimum annual contributions required by regulations in the countries in which the plans are offered. Our U.K. defined benefit pension scheme is governed by pension trustees. In other countries in which we operate, the defined benefit pension arrangements are governed by local pension committees. Significant plan changes require the approval of the Board of Directors of Sun Life Assurance.

We also established defined contribution plans for eligible employees. Our contributions to these defined contribution pension plans may be subject to certain vesting requirements. Generally, our contributions are a set percentage of employees' annual income and may be a set percentage of employee contributions, up to specified levels.

In addition to our pension plans, we provide certain post-retirement health care and life insurance benefits to eligible employees and to their dependents upon meeting certain requirements. Eligible retirees may be required to pay a portion of the premiums for these benefits and, in general, deductible amounts and co-insurance percentages apply to benefit payments. These post-retirement benefits are not pre-funded. In Canada, certain post-retirement health care and life insurance benefits are provided for eligible employees who retired before December 31, 2015. Eligible employees who retire after December 31, 2015 will have access to voluntary retiree-paid health-care coverage.

25.A Risks Associated with Employee Defined Benefit Plans

With the closure of the material defined benefit pension and retiree benefit plans to new entrants, the volatility associated with future service accruals for active members has been limited and will decline over time.

The major risks remaining in relation to past service obligations are increases in liabilities due to a decline in discount rates, greater life expectancy than assumed and adverse asset returns. We have significantly de-risked the investments of our material defined benefit pension plans Company-wide by shifting the pension asset mix away from equities and into more fixed income and liability-matching investments. In 2018, the risk in our U.K. pension plan was reduced through a buy-in insurance contract protecting the majority of pensioner benefits. The target for our material funded defined benefit plans is to minimize volatility in funded status arising from changes in discount rates and exposure to equity markets.

25.B Defined Benefit Pension and Other Post-Retirement Benefit Plans

The following tables set forth the status of the defined benefit pension and other post-retirement benefit plans:

	2018			2017		
	Pension	Other post-retirement	Total	Pension	Other post-retirement	Total
Change in defined benefit obligations:						
Defined benefit obligation, January 1	\$ 3,171	\$ 197	\$ 3,368	\$ 2,964	\$ 188	\$ 3,152
Current service cost	54	3	57	47	1	48
Interest cost	100	7	107	100	7	107
Actuarial losses (gains)	(213)	(6)	(219)	176	10	186
Benefits paid	(155)	(12)	(167)	(132)	(9)	(141)
Plan amendments	(1)	—	(1)	(2)	—	(2)
Foreign exchange rate movement	21	—	21	18	—	18
Defined benefit obligation, December 31	\$ 2,977	\$ 189	\$ 3,166	\$ 3,171	\$ 197	\$ 3,368
Change in plan assets:						
Fair value of plan assets, January 1	\$ 2,864	\$ —	\$ 2,864	\$ 2,724	\$ —	\$ 2,724
Interest income on plan assets	88	—	88	90	—	90
Return on plan assets over (under) interest	(134)	—	(134)	99	—	99
Employer contributions	124	12	136	63	9	72
Benefits paid	(155)	(12)	(167)	(132)	(9)	(141)
Foreign exchange rate movement	22	—	22	20	—	20
Fair value of plan assets, December 31	\$ 2,809	\$ —	\$ 2,809	\$ 2,864	\$ —	\$ 2,864
Amounts recognized on Statement of Financial Position:						
Fair value of plan assets	\$ 2,809	\$ —	\$ 2,809	\$ 2,864	\$ —	\$ 2,864
Defined benefit (obligation)	(2,977)	(189)	(3,166)	(3,171)	(197)	(3,368)

25.C Principal Assumptions for Significant Plans

	2018		2017	
	Canada %	U.K. %	Canada %	U.K. %
To determine defined benefit obligation at end of year:				
Discount rate for pension plans	3.60	2.85	3.40	2.30
Rate of compensation increase	3.00	n/a	3.10	n/a
Pension increases	0.00-0.15	3.15	0.00-0.15	3.50
To determine net benefit expense for year:				
Discount rate for pension plans	3.40	2.30	3.70	2.55
Rate of compensation increase	3.10	n/a	3.00	n/a
Pension increases	0.00-0.15	3.50	0.00-0.15	3.55
Health care trend rates:				
Initial health care trend rate	5.42	n/a	5.47	n/a
Ultimate health care trend rate	4.50	n/a	4.50	n/a
Year ultimate health care trend rate reached	2030	n/a	2030	n/a

	2018		2017	
	Canada	U.K.	Canada	U.K.
Mortality rates:				
Life expectancy (in years) for individuals currently at age 65:				
Male	23	24	22	24
Female	25	25	25	26
Life expectancy (in years) at 65 for individuals currently at age 45:				
Male	24	25	24	26
Female	26	28	25	29
Average duration (in years) of pension obligation	17.3	16.9	17.1	19.0

Discount Rate, Rate of Compensation Increase and Health Care Cost

The major economic assumptions which are used in determining the actuarial present value of the accrued benefit obligations vary by country.

The discount rate assumption used for material plans is determined by reference to the market yields, as of December 31, of high-quality corporate bonds that have terms to maturity approximating the terms of the related obligation. In countries where a deep corporate market does not exist, government bonds are used. Compensation and health care trend assumptions are based on expected long-term trend assumptions which may differ from actual results.

25.D Sensitivity of Key Assumptions

The following table provides the potential impact of changes in key assumptions on the defined benefit obligation for pension and other post-retirement benefit plans as at December 31, 2018. These sensitivities are hypothetical and should be used with caution. The impact of changes in each key assumption may result in greater than proportional changes in sensitivities.

	Pension	Post-retirement benefits
Interest/discount rate sensitivity ⁽¹⁾ :		
1% decrease	\$ 580	\$ 24
1% increase	\$ (447)	\$ (20)
Rate of compensation increase assumption:		
1% decrease	\$ (75)	n/a
1% increase	\$ 78	n/a
Health care trend rate assumption:		
1% decrease	n/a	\$ (11)
1% increase	n/a	\$ 13
Mortality rates ⁽²⁾ :		
10% decrease	\$ 77	\$ 4

⁽¹⁾ Represents a parallel shift in interest rates across the entire yield curve, resulting in a change in the discount rate assumption.

⁽²⁾ Represents 10% decrease in mortality rates at each age.

25.E Fair Value of Plan Assets

Composition of fair value of plan assets, December 31:

	2018	2017
Equity investments	3%	3%
Fixed income investments	74%	85%
Real estate investments	8%	7%
Qualifying insurance contract	10%	—
Other	5%	5%
Total composition of fair value of plan assets	100%	100%

The fair value of our equity investments in 2018 and 2017 are consistent with Level 1 or Level 2 fair value hierarchy.

The assets of the defined benefit pension plans are primarily held in trust for plan members, and are managed within the provisions of each plan's investment policies and procedures. Diversification of the investments is used to limit credit, market, and foreign currency risks. We have significantly de-risked the investments of our material defined benefit pension plans by shifting the pension asset mix away from equities and into more fixed income and liability-matching investments. In 2018, the risk in our U.K. pension plan was reduced through a buy-in insurance contract, protecting the majority of pensioner benefits. The long-term investment objectives of the defined benefit pension plans are to equal or exceed the rate of growth of the liabilities. Over shorter periods, the objective of the defined benefit pension plan investment strategy is to minimize volatility in the funded status. Liquidity is managed with consideration to the cash flow requirements of the liabilities.

25.F Future Cash Flows

The following tables set forth the expected contributions and expected future benefit payments of the defined benefit pension and other post-retirement benefit plans:

	Pension	Post-Retirement	Total
Expected contributions for the next 12 months	\$ 114	\$ 12	\$ 126

Expected Future Benefit Payments

	2019	2020	2021	2022	2023	2024 to 2028
Pension	\$ 133	\$ 140	\$ 147	\$ 154	\$ 161	\$ 875
Post-retirement	12	12	12	13	13	68
Total	\$ 145	\$ 152	\$ 159	\$ 167	\$ 174	\$ 943

25.G Defined Contribution Plans

We expensed \$49 in 2018 (\$38 for 2017) with respect to defined contribution plans.

26. Accumulated Other Comprehensive Income (Loss) and Non-Controlling Interests

26.A Accumulated Other Comprehensive Income (Loss)

Changes in accumulated other comprehensive income (loss), net of taxes, are as follows:

For the years ended December 31,	2018			2017		
	Balance, beginning of period	Other comprehensive income (loss)	Balance, end of period	Balance, beginning of period	Other comprehensive income (loss)	Balance, end of period
Items that may be reclassified subsequently to income:						
Unrealized foreign currency translation gains (losses), net of hedging activities	\$ 811	\$ 696	\$ 1,507	\$ 1,377	\$ (566)	\$ 811
Unrealized gains (losses) on available-for-sale assets	290	(306)	(16)	220	70	290
Unrealized gains (losses) on cash flow hedges	(11)	(10)	(21)	(6)	(5)	(11)
Share of other comprehensive income (loss) in joint ventures and associates	(31)	7	(24)	—	(31)	(31)
Items that will not be reclassified subsequently to income:						
Remeasurement of defined benefit plans	(283)	71	(212)	(224)	(59)	(283)
Revaluation surplus on transfers to investment properties	150	—	150	11	139	150
Total	\$ 926	\$ 458	\$ 1,384	\$ 1,378	\$ (452)	\$ 926
Total attributable to:						
Participating policyholders	\$ 9	\$ 5	\$ 14	\$ 16	\$ (7)	\$ 9
Non-controlling interests	11	6	17	16	(5)	11
Shareholders	906	447	1,353	1,346	(440)	906
Total	\$ 926	\$ 458	\$ 1,384	\$ 1,378	\$ (452)	\$ 926

26.B Non-Controlling Interests

Non-controlling interests for 2018 and 2017 in our Consolidated Statements of Financial Position, Consolidated Statements of Changes in Equity, and Net income (loss) attributable to non-controlling interests include SLF Inc.'s interest in an entity that is consolidated by us. SLF Inc. holds all of the voting rights and power related to this entity. We have consolidated this entity since we are exposed to a significant amount of the variability associated with this entity and have power over the relevant activities of this entity through a related party.

The following table summarizes changes to non-controlling interests during 2018 and 2017, respectively:

For the years ended December 31,	2018	2017
Balance, beginning of year	\$ 70	\$ 72
Acquisition of control in subsidiary and capital transaction	—	—
Net income (loss)	(1)	3
Total other comprehensive income (loss) for the year	6	(5)
Acquisition of interest in subsidiary from non-controlling interests	—	—
Total non-controlling interests, end of year	\$ 75	\$ 70

Sources of earnings

The following is provided in accordance with the OSFI guideline requiring Sources of Earnings (SOE) disclosure. SOE is a non-International Financial Reporting Standard (IFRS) financial measure. There is no standard SOE methodology. The calculation of SOE is dependent on, and sensitive to, the methodology, estimates and assumptions used.

SOE identifies various sources of IFRS net income. It provides an analysis of the difference between actual net income and expected net income based on business in-force and assumptions made at the beginning of the reporting period. The terminology used in the discussion of sources of earnings is described below:

Expected profit on inforce business

The portion of the consolidated pre-tax net income on business inforce at the start of the reporting period that was expected to be realized based on the achievement of the best-estimate assumptions made at the beginning of the reporting period. Expected profit for asset management companies is set equal to their pre-tax net income.

Impact of new business

The point-of-sale impact on pre-tax net income of writing new business during the reporting period. Issuing new business may produce a gain or loss at the point-of sale, primarily because valuation assumptions are different than pricing assumptions and/or actual acquisition expenses may differ from those assumed in pricing. For example, new business losses in individual life insurance would emerge where valuation margins and acquisition expenses are relatively high.

Experience gains and losses

Pre-tax gains and losses that are due to differences between the actual experience during the reporting period and the best-estimate assumptions at the start of the reporting period.

Management actions and changes in assumptions

Impact on pre-tax net income resulting from changes in actuarial methods and assumptions or other management actions.

Other

Impact on pre-tax net income not addressed under the previous categories. Examples include acquisition/integration/restructuring and other related costs.

Sources of earnings

For the Year Ended December 31, 2018 (in millions of Canadian dollars)	SLF				Total
	Canada	SLF U.S.	SLF Asia	Corporate

Analysis of results

For the year ended December 31, 2018, the pre-tax expected profit on inforce business of \$1,623 million was \$233 million higher than 2017. The increase in expected profit was largely driven by business growth in Canada, US, and Asia, as well as currency impacts from the change in the Canadian dollar relative to foreign currencies.

The new business gains in 2018 was \$12 million compared to \$65 million a year ago. The change was mainly due to sales level in Canada and sales mix in Asia.

The 2018 experience gain of \$441 million pre-tax was primarily due to favourable Participating policy experience in Canada, interest on par seed capital in Canada and the U.S., favourable morbidity experience in the U.S. Group Benefits business, positive net credit experience and gains from investing activity on insurance contract liabilities. This is partially offset by unfavourable equity market impacts.

For the year 2018, management actions and changes in assumptions resulted in a pre-tax gain of \$269 million. In Canada, the pre-tax gain of \$32 million reflected favourable changes to mortality assumptions in Group Retirement Services, the favourable change to provision in the Canada participating account, offset partially by model enhancement and methodology changes. In the U.S., the pre-tax gain of \$15 million reflected the favourable changes to provisions in the participating account, offset partially by updates to policyholder assumptions. In Asia, the pre-tax gain of \$77 million reflected favourable mortality, offset partially by updates to policyholder assumptions, both items were in the Asia International business. In Corporate, the pre-tax gain of \$145 million reflected favourable mortality in the U.K.

Other in 2018 resulted in a pre-tax loss of \$56 million. In the U.S., the loss of \$34 million was due to the impact of integration costs related to the U.S. employee benefits businesses acquired. In Asia, the loss of \$14 million mainly pertains to a distribution arrangement in India for asset management. In Corporate, the loss of \$7 million was primarily due to the restructuring charge related to actions to enhance business processes and organizational structures and capabilities.

Net pre-tax earnings on surplus of \$471 million in 2018 was \$36 million higher than a year ago. The increase was mainly due to increasing investment income from Cash & Short-term and Bonds, partially offset by weaker Available-for-Sale asset gains.

The 2018 Sources of Earnings has been changed to reflect the International business move to Asia from the U.S. In addition, expected profit on inforce business and impact of new business reflect a change in presentation for U.S. employee benefits business. Amounts in expected profit on inforce business and impact of new business in 2017 was previously \$304 million and \$(47) million for U.S. excluding International, and \$1,450 million and \$5 million for the Total Company, respectively, with a net change of \$60 million between the two categories.

Our subsidiaries and associates

The following table lists our direct and indirect subsidiaries as at December 31, 2018 and provides the book values (in millions of Canadian dollars, based on the equity method) of the shares of those subsidiaries that are principal operating subsidiaries. The table also lists significant joint venture entities in which we directly or indirectly hold 50% or less of the issued and outstanding voting securities. Subsidiaries which are inactive or which have been set up for the sole purpose of holding investments are not listed in the table.

Appendix A

Policyholder dividend and participating account management policies

Dividend Policy for Participating Policies of Sun Life Assurance Company of Canada

Sun Life Assurance Company of Canada (“Sun Life”) is a company governed by the *Insurance Companies Act* (Canada) that was converted from a mutual company into a company with common shares in 2000. (Such a transaction is referred to as a “Conversion”.) Clarica Life Insurance Company (“Clarica”) was converted from a mutual company into a company with common shares in 1999 and was amalgamated with Sun Life in 2002. (The amalgamated company, named Sun Life Assurance Company of Canada, is referred to as the “Company”.)

This Dividend Policy applies to participating policies of the Company.

Participating policyholders of the Company are eligible to receive distributions in respect of their policies, commonly referred to as policy dividends, as declared from time to time at the discretion of the Board of Directors of the Company in accordance with applicable law.

Participating policies issued by Sun Life before its Conversion are accounted for separately, by territory, from policies issued by Sun Life after its Conversion. Similarly, participating policies issued by Clarica before its Conversion are accounted for separately from policies issued by Clarica after its Conversion.

The assets and earnings of the pre-Conversion blocks of participating business that are specified by the terms of the Conversion plans of Sun Life and Clarica are exclusively for the benefit of the participating policies in the applicable pre-Conversion block. (These blocks of participating business are referred to as “Closed Blocks”.) Earnings include all sources of gain and loss including those related to experience factors such as investment returns, mortality, policy surrender, expenses, and taxes (these and other applicable factors are referred to as “Experience Factors”). The amount of dividends distributed generally reflects changes in experience, by Closed Block, over time, as adjusted to maintain consistency in distribution from one period to another. This is done with the objectives of ensuring no unnecessary build-up or deficiency in surplus and exhausting the assets in the Closed Block over the lifetime of the business in the Closed Block.

Dividends on pre-Conversion participating policies that are not in Closed Blocks are determined as required by the terms of the Conversion plans or are determined in the same manner as dividends on participating policies issued after Conversion.

Dividends on participating policies issued after Conversion are distributed from the earnings of the post-Conversion participating business consisting of those policies. Earnings include all sources of gain and loss including those related to Experience Factors. The amount of dividends distributed generally reflects changes in the experience of the post-Conversion participating business, over time, as adjusted to maintain consistency in distribution from one period to another, the growth of that business, the need to retain a portion of earnings to support the business, and the overall capital adequacy position of the Company.

Any distribution of funds from the participating accounts to shareholders of the Company is limited by the provisions of the *Insurance Companies Act* (Canada) and the Conversion plans of Sun Life and Clarica.

The dividend allocation process followed by the Company in respect of participating policies recognizes the contributions made by the policies to the pre-Conversion or post-Conversion participating business to which they belong. Not all policies contribute to the same extent or at the same time, and there are certain practical limits, legal constraints and prevailing local practices that apply to the allocation in some circumstances. This process seeks to achieve reasonable equity among classes and generations of policies. In order to determine the contribution of policies, policies are grouped into classes with common Experience Factors.

The dividend scales of the Company are established by the Board of Directors of the Company from time to time, and reviewed at least once each year based on a recommendation from the Appointed Actuary that is required to be in compliance with all relevant standards of the Canadian Institute of Actuaries. If any significant deviation from the recommendation is approved, it will be documented in Board minutes and with the final dividend recommendation.

Dividends are credited to policies on the anniversary date or as otherwise specified by the policy. For certain groups of policies, dividends may vary according to the amount of any policy loan. Other dividends called terminal or special maturity dividends may be credited to a policy upon surrender or maturity of the policy, or upon death of the insured. The type of policy, the amount of time it has been in force and the manner of its termination will affect eligibility for, and the amount of, the terminal or special maturity dividend, if any.

The Company may, from time to time, acquire participating business from other insurers. This Dividend Policy is intended to apply to such acquired business, subject to the terms and conditions applying to the acquisition.

This Dividend Policy is subject to change from time to time at the discretion of the Board of Directors of the Company, subject to applicable law. The principal factors that might cause the Board of Directors of the Company to review this policy include legislative or regulatory changes, significant corporate restructuring, significant unforeseen events, or a desire to clarify this policy.

Participating Account Management Policy for Sun Life Assurance Company of Canada

Sun Life Assurance Company of Canada (“Sun Life”) is a company governed by the *Insurance Companies Act* (Canada) (ICA) that was converted from a mutual company into a company with common shares in 2000. (Such a transaction is referred to as a “Conversion”.) Clarica Life Insurance Company (“Clarica”) was converted from a mutual company into a company with common shares in 1999 and was amalgamated with Sun Life in 2002. (The amalgamated company, named Sun Life Assurance Company of Canada, is referred to as the “Company”).

This Participating Account Management Policy applies to participating (par) accounts of the Company set up pursuant to section 456 of the ICA.

(a) Business Governed by the Participating Account Management Policy

The Company maintains territorial par accounts, some of which have sub-accounts, for its par policies that are separate from the accounts for its non-par policies and other businesses. Each par account records the assets, liabilities, premiums and any earnings for par policies only. Par policies issued by Sun Life are also accounted for separately from par policies issued by Clarica in order to be able to administer all business in accordance with commitments made by Sun Life and Clarica at the time of their Conversions.

The Company has 6 territorial par accounts, one each for

- Canadian par policies issued by Sun Life
- Par policies issued or acquired by Clarica (all of which were issued in Canada)
- US par policies issued by Sun Life
- Philippines par policies issued by Sun Life prior to its Conversion
- Malta par policies issued by Sun Life
- Other Foreign par policies issued by Sun Life

Only the par account for Canadian par policies issued by Sun Life is open to new business.

(b) Investment Policy for the Participating Account

The Company has an investment policy for the assets in each par account. These policies are reviewed regularly to ensure they meet the Board approved requirements. The Company monitors each par account to ensure that its investment policy is followed consistently and controls are in place to ensure target mixes by type of asset, quality and term are maintained within defined tolerance limits.

(c) Allocating Investment Income to the Participating Account

Assets are maintained in each par account in an amount equal to the account’s total liabilities and surplus. The investment income credited to each account is the earnings on assets allocated to that account. The Appointed Actuary of the

Company provides an annual opinion to the Board as to whether the allocations are fair and equitable to participating policyholders.

(d) Allocation of Expenses, including Taxes, to the Participating Account

The allocation of Company expenses to each par account is supported by expense analysis prepared in accordance with professional standards and legal requirements. The allocation includes an appropriate assignment of overhead costs. Premium taxes are allocated directly with the premium that gives rise to the tax. Income taxes are allocated based on accounting income subject to tax multiplied by the effective tax rate. In the Philippines, final taxes relating to investment income are allocated in the same proportion as the investment income. The Appointed Actuary provides an annual opinion to the Board as to whether the allocations are fair and equitable to participating policyholders.

Commitments made at the time of demutualization may impact allocations of expenses at the sub-account level.

(e) Management and Use of Surplus

Blocks of par business sold pre-Conversion do not generate surplus as these were funded at Conversion to meet policyholders' reasonable expectations and all funds are expected to be returned to policyholders over time. For any post-Conversion business, surplus is contributed by Shareholders if required to support new sales. Transfers of surplus to shareholders are limited by the ICA.

(f) Factors which Might Result in Modification of the Policy

Changes might be contemplated to clarify the intent of this policy or in the event of legislative and regulatory changes, changes in accounting rules, acquisitions, divestitures, or any significant corporate restructuring.

(g) Management and Disposal of Surplus in Par Accounts for which New Business is Not Accepted

The par accounts are managed in accordance with the commitments made at the time of Conversion. Under the ICA, Sun Life has the right to transfer surplus amounts not required by the participating business to the shareholders with the permission of the Regulator.

(h) Measures to Ensure Fairness to Participating Policyholders whose Policies form part of a Closed Block Created as Part of Conversion Terms:

The management of Closed Blocks of par business sold pre-Conversion are specified by the terms of the Conversion plans of Sun Life and Clarica.

Measures to ensure fairness to par policyholders in the Closed Blocks were described in the Conversion Plans which provided the information upon which participating policyholders voted for Conversion. As part of Conversion, each of Sun Life and Clarica made commitments to provide for Policyholders Reasonable Expectations (PRE). The commitments were further described in supplementary documents which guide the administration of par business.

The Appointed Actuary provides an annual opinion to the Regulator as to whether all par blocks are being managed according to the commitments made at Conversion. The Appointed Actuary also provides fairness opinions with respect to the dividend policy, the dividend recommendations, participating account management and allocations of income and expenses to the par accounts.

(i) Percentage of Par Account Income Transferred to Shareholders or Shareholder Accounts as a Percentage of Maximum Allowed

Transfers made from the par account under ICA section 461 are restricted to between 2.5% and 10% (depending on the size of the par account of the Company) of total amounts distributed in respect of participating policies issued after demutualization. The maximum percentage is redetermined annually and is close to 2.5% at this time. The Company intends to transfer the maximum amount allowed.

Life's brighter under the sun

At Sun Life Financial, we believe that being accountable for the impact of our operations on the environment is one part of building sustainable, healthier communities for life. This year's booklet has been printed at a reduced size resulting in the following environmental savings:

						
37 Trees	3.5 lbs of water pollutants	34,280 gallons of water	1,890 lbs of solid waste	28,780 lbs of greenhouse gases	40.4 mil. BTUs of total energy	106 lbs of ink

This booklet is printed on FSC® certified paper. The fibre used in the manufacture of the paper stock comes from well managed forests and controlled sources.

The greenhouse gas emissions associated with the production, distribution and paper lifecycle of this booklet have been calculated and offset by Carbonzero.

Being a sustainable company is essential to our overall business success. Learn more at sunlife.com/sustainability
